

ElonEmails

Every publicly available Elon Musk email we could source, with the published text, dates, tags and sources.

349 emails · 234 written by Musk · 225 with full text · 41,532 words · 2006–2026

Compiled October 3, 2026. An unofficial, independent compilation, not affiliated with Elon Musk or any of his companies.

How to read this archive

Each entry reproduces an email as it was published by the source linked beneath it: a court exhibit, a news outlet that obtained the email, a government release, or Musk himself. Nothing has been reconstructed or filled in.

Every entry is marked Full text, Partial text or Excerpt. Partial means the source printed most of the email or several passages; a bracketed ellipsis [...] marks a gap. Excerpt means only a line or two was ever made public. Two entries have no published text at all and carry only a summary.

Entries are grouped by company and run in date order. Replies from other people are included where they belong to a published thread, so exchanges can be read in sequence. The sender is always shown.

Most text was transcribed from web pages and court PDFs by automated retrieval. Wording was checked against a second source where one existed, but small differences in punctuation or line breaks from the originals are possible. For anything you intend to quote, follow the source link.

The 'How it became public' line records provenance (court record, leak, government release and so on) and how firmly the email is attributed. Entries whose authenticity is disputed say so in their notes.

Contents

Tesla (103)	13
July 18, 2006 - 'Incredibly insulting': Musk demands credit in Roadster press	13
July 20, 2006 - Threat to fire PR firm over New York Times article	14

'Incredibly insulting': Musk demands credit in Roadster press

From: Elon Musk

Date: July 18, 2006

To: Mike Harrigan (Tesla VP of marketing)

PARTIAL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · WIDELY REPORTED

like to talk with every major publication within reason.

[...]

The way that my role as been portrayed to date, where I am referred to merely as 'an early investor' is outrageous.

[...]

Apart from me leading the Series A & B and co-leading the Series C, my influence on the car itself runs from the headlights to the styling to the door sill to the trunk, and my strong interest in electric transport predates Tesla by a decade.

[...]

Martin should certainly be the front and center guy, but the portrayal of my role to date has been incredibly insulting.

[...]

I'm not blaming you or others at Tesla — the media is difficult to control. However, we need to make a serious effort to correct this perception.

About this email: Days before the Roadster unveiling, Musk complains to Tesla's marketing chief that press coverage calls him merely an early investor, lists his influence on the car, and demands a serious effort to correct the perception.

Notes: Business Insider published images of the emails 'pasted from court documents' (Eberhard v. Musk, San Mateo County Superior Court, 2009); the images did not render, so only the passages quoted in the article text are recorded, in article order. First passage begins mid-sentence as quoted ('as been' is as printed). Recipient's title is from general reporting, not the email header.

Threat to fire PR firm over New York Times article

From: Elon Musk

Date: July 20, 2006

To: Tesla's PR firm PCGC; cc Martin Eberhard and Mike Harrigan

PARTIAL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · WIDELY REPORTED

I was incredibly insulted and embarrassed by the NY Times article

[...]

where I am not merely unmentioned, but where Martin is actually referred to as the chairman.

[...]

If anything like this happens again, please consider the PCGC relationship with Tesla to end immediately upon publication of such a piece. Please ensure that the NYT publishes a correction as soon as possible.

About this email: After a New York Times piece on the Roadster omitted him and called Eberhard chairman, Musk tells Tesla's PR agency he was insulted and embarrassed, demands a correction, and warns the relationship will end if it happens again.

Notes: From emails filed in Eberhard v. Musk (2009) and reproduced as images by Business Insider; only article-text quotations could be retrieved. The article says the email was cc'd to Eberhard and Harrigan; the primary addressee is inferred from the reference to 'the PCGC relationship' and should be checked against the exhibit.

'This is not good': board warned about Eberhard

From: Elon Musk

Date: August 9, 2007

To: Jim Marver; Ira Ehrenpreis; Antonio J. Gracias; Kimbal Musk (Tesla board members)

Subject: Fw: meeting

FULL TEXT · BOARD, INVESTORS & ADVISERS · PUBLISHED BY MUSK · CONFIRMED

This is not good. Sounds like there are more issues that the board was not informed about. I will send out a note as soon as I talk with Marks and will ask him to email an assessment to the board as soon as he can.

Martin seems to be focused on his public image and position within Tesla, rather than solving these critical problems. If you should speak with Martin, please urge him to spend all his energy on making sure that the Roadster works and arrives on time. He doesn't seem to understand that the best way to maximize his reputation and position within the company is to help get this right.

About this email: Forwarding a message about a meeting, Musk tells fellow directors that the board was apparently not told about more problems and that Martin Eberhard is focused on his image rather than fixing the Roadster.

Notes: Header as published: 'From: Elon Musk / Sent: Thursday, August 09, 2007 08:56 AM Pacific Standard Time / To: Jim Marver; Ira Ehrenpreis; Antonio J. Gracias; kimbal / Subject: Fw: meeting'. Text is Musk's message

as reproduced by TechCrunch; the forwarded message beneath it was not reproduced. Musk published it in his 2009 Tesla blog rebuttal to the Eberhard v. Musk lawsuit; the original blog page (teslamotors.com) and its Wayback copy could not be reached in this session. The same post also printed emails TO Musk from Michael Marks (15 Nov 2007, 'completely agree with the idea that Martin shouldn't stay on the board') and Darryl Siry (8 May 2008).

Marks to Musk: Eberhard shouldn't stay on the board

From: Michael Marks (then Tesla interim CEO)

Date: November 15, 2007

To: Elon Musk

Subject: board

FULL TEXT · BOARD, INVESTORS & ADVISERS · PUBLISHED BY MUSK · CONFIRMED

I've thought about it, and completely agree with the idea that Martin shouldn't stay on the board, just fyi

About this email: Interim CEO Michael Marks tells Musk he agrees with the idea that Martin Eberhard should not remain on Tesla's board. Musk published it in 2009 to rebut Eberhard's lawsuit.

Notes: Email TO Musk, published by Musk himself; header as published: From Michael Marks, Sent Thursday, November 15, 2007 10:38 PM, To Elon Musk, Subject 'board'. Musk's side of the exchange was not published. Marks's title is from general reporting, not the header.

Forwarding leaker Peng Zhou's apology to all staff

From: Elon Musk

Date: November 3, 2008

To: Everybody (all Tesla employees)

Subject: FW: Letter of Apology

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Below is what I believe to be a sincere apology from Peng Zhou for the leak to Valleywag.

About this email: Musk forwards to the whole company an apology letter from engineer Peng Zhou, who admitted leaking a Musk email about Tesla's finances to Valleywag and resigned.

Notes: Header as published: Monday, November 03, 2008 4:22 PM, From Elon Musk, To Everybody, Subject 'FW: Letter of Apology'. Musk's own text is the single line; the forwarded letter from Peng Zhou ('Dear Tesla Motors Employees ... I became very upset and did the very foolish thing of writing a letter to Valleywag ... I have submitted my resignation') follows it in the source. First published by Valleywag.

Sources: [The Truth About Cars](#)

Tags: leaks, valleywag, layoffs, culture

Peng Zhou's apology for the Valleywag leak

From: Peng Zhou (Tesla engineer)

Date: November 3, 2008 (Date of Musk's forward; the letter itself was sent to Musk the same day or shortly before)

To: Elon Musk (addressed to all Tesla employees; forwarded company-wide by Musk)

Subject: Re: Letter of Apology

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Dear Tesla Motors Employees,

Tesla Motors is a great company and is pioneering the green revolution. I have always been a proud Tesla employee and we all worked extremely hard towards the company mission. Throughout past two years, I also took a wild ride in the great emotional roller-coaster of WhiteStar 1.0, 2.0 and Model S. Having driven Model S mule few times, I truly believe this is the vehicle that will change the world.

However, macro economic climate changed so dramatically and Model S is getting delayed and the company is refocusing. The past month has been very difficult, sitting through planning meetings and watch employees make in or out of the layoff list. It is so sad to lose 87 employees in a week. I became very upset and did the very foolish thing of writing a letter to Valleywag. I have never thought this letter would create such an upsetting situation for Tesla Motors and I should have never sent that letter. When Elon asked the originator of the letter to step forward, I should have done so. I am deeply sorry things happened this way.

I have submitted my resignation with my manager, who had no knowledge of this. I'll try my best to make situations better for Tesla Motors.

Again, my sincere apologies.

Best Regards,

Peng

About this email: Tesla engineer Peng Zhou admits he wrote the letter to Valleywag about Tesla's cash position after the October 2008 layoffs, apologizes for not stepping forward when Musk asked, and says he has resigned. Musk forwarded it to the whole company.

Notes: Email TO Musk, included because Musk forwarded it to all employees (see the companion entry). Original wording kept as published. Musk's earlier email asking the leaker to step forward was not found in full text.

Explaining the Roadster option price increase to customers

From: Elon Musk

Date: January 20, 2009

To: Tesla Roadster customers

Subject: The Importance of Options

FULL TEXT · CUSTOMERS & PUBLIC · PUBLISHED BY RECIPIENT · WIDELY REPORTED

A much fuller account of the history of Tesla is worth telling at some point, but for now I will just talk about the essentials of why we needed to raise prices on options.

Fundamentally, it boils down to taking the tough steps that are difficult but necessary for Tesla to be a healthy company and not fall prey to the recession.

When the initial base price, for cars after the Signature 100 series, of \$92k was approved by the board a few years ago, it was based on an estimated vehicle cost of roughly \$65k provided by management at the time. This turned out to be wrong by a very large margin.

An audit by one of the Series D investors in the summer of 2007 found that the true cost was closer to \$140k, which was obviously an extremely alarming discovery and ultimately led to a near complete change in the makeup of the senior management team. Over the past 18 months, observers will note that Tesla has transformed from having a senior team with very little automotive experience to one with deep automotive bench strength. We now have executives with world class track records running everything from design to engineering to production to finance.

To bring the cost of the car down, we have reengineered the entire drivetrain, which is now at version 1.5 and will be at version 2 by June. The body supplier was also switched out from a little company that was charging us nutty money and had a max production of three per week to Sotira, who supplies high paint quality body panels to Lotus, Aston Martin and others. In the process, we had to pay several million dollars for a whole new set of body tooling, as the old tooling had been made incorrectly. The old HVAC system was unreliable and cost almost as much as a new compact car, so also had to be replaced. The wiring harness, seats, navigation system and instrument panel also had to be modified or replaced.

After reengineering and retooling virtually the entire Roadster and completely restructuring our supply chain, we are now finally coming to the point where the variable cost of the car (to be clear, this excludes fixed cost allocation) is between \$90k to \$100k. With a lot of additional effort by the Tesla team and the help of our suppliers, we should be at or below \$80k by this summer. There is some variability here due to exchange rate shifts. Although we gain an automatic currency hedge by selling in both Europe and the US, we are still vulnerable to the Yen, which is very strong right now.

Obviously, this still creates a serious problem for Tesla in the first half of 2009, given the \$92k to \$98k price of most cars delivered over this time period. The board and I did not want to do a retroactive increase of the base vehicle price, as that would create an unavoidable hardship for customers. Instead, apart from a \$1k destination charge increase to match our true cost of logistics, we only raised the price of the optional

elements and provided new options and a new model (Roadster Sport) to help improve the average margin per car.

The plan as currently projected, and which I believe is now realistic, shows a high likelihood of reaching profitability on the Roadster business this summer. By that time, we will be delivering cars that have a base price of \$109k plus about \$20k or so of options (having worked our way through the \$92k to \$98k early buyers) at a rate of 30 per week. We are fortunately in the position, rare among carmakers, of not having to worry too much about meeting 2009 sales targets, as we are already sold out through October and have barely touched the European market.

My paramount duty is to ensure that we get from here to there without needing to raise more money in this capital scarce environment, even if things don't go as well as expected. I firmly believe that the plan above will achieve that goal and that it strikes a reasonable compromise between being fair to early customers and ensuring the viability of Tesla, which is obviously in the best interests of all customers. It's also important to note that the price increases will affect 400 customers, all of whom will take delivery after Jan. 1 and receive a \$7,500 federal tax credit. We made the pricing changes to ensure the viability of Tesla in the long term, regardless of government incentives, but we hope the credit will offset the increase for most customers.

There is one additional point that relates to the government loans that Tesla is seeking for the Model S program, a much more affordable sedan that we are trying to bring to market as soon as possible. A key requirement is that any company applying be able to show that it is viable without the loans. If we allow ourselves to lose money on the cars we are shipping today, we place those loans at risk. Mass market electric cars have been my goal from the beginning of Tesla. I don't want and I don't think the vast majority of Tesla customers want us to do anything to jeopardize that objective.

Elon Musk

CEO & Product Architect

About this email: Musk explains to Roadster reservation holders why Tesla raised option prices: the car's true cost was far above the original estimate, the Roadster had to be re-engineered, and Tesla must show viability to obtain government loans for the Model S.

Notes: Mass email to Roadster reservation holders; header as reproduced by recipient: From 'Elon Musk, Tesla Motors', Tue, 20 Jan 2009 12:45 pm PST.

Leak crackdown: sign a declaration or confess for amnesty

From: Elon Musk

Date: March 2009 (Published by The Truth About Cars on 2009-03-06 as 'recently sent'; exact send date not given)

To: All Tesla employees and contractors (Bay Area)

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

I'm a big believer in trusting employees and sharing information widely within the company, rather than confining it to a narrow set of senior execs and giving everyone else the mushroom treatment. Providing people with an understanding of what problems need to be overcome helps them align and prioritize their actions in pursuit of the greater good. It also ensures that all employees feel included and part of the same team.

This is why I'm so concerned about the continuing leaks to media. It really hurts free communication when even minor issues are leaked and blown way out of proportion. It is nutty that a company like Tesla, which is doing really well right now (how many companies can say that they're sold out through October?) should suffer from misleading articles on blog sites that would have no credibility, but for a purported inside leak. The leaks often aren't even accurate!

This kills trust and creates a negative atmosphere within Tesla. It has to stop.

Today, the legal department will circulate a declaration form to all employees and contractors within the Bay Area. People will be asked to provide their word of honor and signature that they haven't knowingly leaked any Tesla confidential information to the media. They'll be reminded in clearly written language of the substantial liability they would incur for disclosure of confidential information in willful violation of the confidentiality agreement they signed with Tesla. If someone does not tell the full truth here, please take my word that you will be prosecuted to the fullest extent of the law.

Alternatively, people will be given the option of listing every leak they have made, whether published or not. If you fully disclose any leak you have done, the consequences will be precisely nothing. You will be completely forgiven and, unlike Peng, won't be asked to publicly apologize to the company.

The actions of any one person can't be allowed to hurt the vast majority of people at Tesla who are working incredibly hard to make a difference in the world.

Elon

About this email: Musk tells staff that continuing leaks to the media are destroying trust, announces that legal will circulate a declaration every Bay Area employee and contractor must sign, and offers full amnesty to anyone who discloses past leaks.

Notes: TTAC inserted its own editorial aside '(ed: as opposed to convoluted plumb-and-purge operations?)' after 'negative atmosphere within Tesla.'; that aside is not Musk's and has been removed here. TTAC reported each copy carried subtle textual variations to trace leakers, so wording of other copies may differ slightly. Originally surfaced via Valleywag/Gawker.

Disputed: alleged Musk email to employee who missed event for child's birth

From: Elon Musk

Date: 2015 (send date unknown; 2015 is the year the book quoting it was published)

To: Unnamed Tesla employee

EXCERPT · EXECUTIVE & INTERNAL · BOOK/BIOGRAPHY · SINGLE-SOURCE

That is no excuse. I am extremely disappointed. You need to figure out where your priorities are. We're changing the world and changing history, and you either commit or you don't.

About this email: Ashlee Vance's 2015 biography quotes an anonymous Tesla employee's recollection of an email from Musk rebuking him for missing a company event to attend his child's birth. Musk publicly denied ever writing or saying it.

Notes: AUTHENTICITY DISPUTED. The wording is an anonymous employee's recollection as printed in Vance's book and first reported by the Washington Post; no copy of the email has been published. Musk's denial on Twitter (May 2015): "I have never written or said this. It is total BS & hurtful to claim that I told a guy to miss his child's birth just to attend a company meeting." Tesla-related, so it may overlap with the Tesla slice.

Launching the owner referral program

From: Elon Musk

Date: July 29, 2015

To: Tesla Model S owners

Subject: Trying something new (plus party at the Gigafactory and a Founder Series Model X)

FULL TEXT · CUSTOMERS & PUBLIC · PUBLISHED BY RECIPIENT · WIDELY REPORTED

Word of mouth has always been a major part of how Tesla sales have grown. When I meet Tesla owners, one of the first things they often tell me is how they have convinced many others to buy the car. As you may already know, Tesla does not advertise or pay for endorsements or product placement. Maybe by doing so we could sell more cars, but I don't like the idea of trying to trick people into buying a product by false association. If you see somebody famous driving a Model S, it is because they genuinely like the car.

If you see it in a movie or TV show, it is because the people associated with that production genuinely like the car. Besides word of mouth, another way that our cars are sold is through stores. These will always be important to allow people to check out new models and ask our product specialists detailed questions. However, stores are quite expensive to set up and operate. In reviewing the Tesla cost of sales, we found that it is approximately \$2,000 to sell a car through our stores, higher in some regions and lower in others.

Both ways of reaching potential customers are important, but, if we can amplify word of mouth, then we don't need to open as many new stores in the future. So, we are going to try an experiment. This is similar to the customer growth program that I worked on at PayPal/X.com back in '99. What worked for PayPal may not work for Tesla, but it is

worth trying, as the net result would be lowering our costs by \$2,000, allowing us to give that money to our customers.

From now through October 31st, if someone buys a new Model S through your link, they will get \$1,000 off the purchase price and you will get a \$1,000 credit in your Tesla account, which can be applied to a future car purchase, service charge or accessories. To put some limits on the experiment, each Tesla owner can grant a maximum of ten \$1,000 discounts.

Just for fun, there will also be some things that money can't buy. If five of your friends order a Model S, you and a guest will receive an invitation to tour the Gigafactory in Nevada – the world's biggest factory by footprint – and attend the grand opening party. This will be awesome. At ten orders, you get the right to purchase a Founder Series Model X, which is not available to the public, with all options free (value of about \$25,000). The first person to reach ten will get the entire car for free.

Elon

About this email: Musk emails Model S owners to announce an experimental referral program: \$1,000 off for a referred buyer and \$1,000 credit for the owner, with a Gigafactory opening invitation at five referrals and a Founder Series Model X at ten.

Notes: Mass email to owners; header as reproduced: From "Elon Musk" <elon@teslamotors.com>, July 29, 2015 at 2:05:31 PM PDT. Paragraph breaks follow Teslarati's reproduction and may differ from the original.

To Fortune: Autopilot death 'not material', 'do the bloody math'

From: Elon Musk

Date: July 4, 2016 (Sent while Fortune sought comment on July 4, 2016; article published July 5)

To: Carol J. Loomis (Fortune)

EXCERPT · PRESS & JOURNALISTS · PUBLISHED BY RECIPIENT · CONFIRMED

is not material to the value of Tesla.

[...]

Indeed, if anyone bothered to do the math (obviously, you did not) they would realize that of the over 1M auto deaths per year worldwide, approximately half a million people would have been saved if the Tesla autopilot was universally available. Please, take 5 mins and do the bloody math before you write an article that misleads the public.

About this email: Challenged by Fortune over Tesla selling stock without disclosing the fatal May 2016 Autopilot crash, Musk replies that the death is not material to Tesla's value and berates the writer for not doing the math on lives Autopilot could save.

Notes: Only the passages Fortune quoted from the exchange are public; the first fragment begins mid-sentence.

Q3 2016 push: 'throw a pie in the face of all naysayers'

From: Elon Musk

Date: August 29, 2016

To: All Tesla employees

PARTIAL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

I thought it was important to write you a note directly to let you know how critical this quarter is. The third quarter will be our last chance to show investors that Tesla can be at least slightly positive cash flow and profitable before the Model 3 reaches full production.

[...]

on the razor's edge of achieving a good Q3, but it requires building and delivering every car we possibly can, while simultaneously trimming any cost that isn't critical, at least for the next 4.5 weeks.

[...]

We will need to raise additional cash in Q4 to complete the Model 3 vehicle and the Gigafactory.

[...]

The simple reality of it is that we will be in a far better position to convince potential investors to bet on us if the headline is not 'Tesla Loses Money Again,' but rather 'Tesla

Defies All Expectations and Achieves Profitability.' That would be amazing!

[...]

It would be awesome to throw a pie in the face of all naysayers on Wall Street who keep insisting that Tesla will always be a money loser!

About this email: Musk tells employees the third quarter of 2016 is Tesla's last chance to show positive cash flow and profit before Model 3, urging them to deliver every possible car and cut non-critical costs ahead of a Q4 capital raise.

Notes: Email obtained by Bloomberg, which printed only passages. Passages assembled from Electrek and the Bloomberg reprint; their original order within the email is not certain. The 'razor's edge' passage begins mid-sentence as quoted.

No discounts on new cars, ever

From: Elon Musk

Date: September 28, 2016 (Date Musk tweeted an image of the email; it was sent to employees that week)

To: All Tesla employees

PARTIAL TEXT · COMPANY-WIDE MEMO · PUBLISHED BY MUSK · CONFIRMED

That said, it is absolutely vital that we adhere to the no negotiation and no discount policy that has been true since we first started taking orders ten years ago. This is fundamental to our integrity and we maintained this policy even through the terrible depths of the great recession of 2008/2009.

It is fine to have a discount on cars that have been floor models , were used in test drives or were damaged before delivery. All we are doing there is assigning an accurate price to the vehicle. However, there can never — and I mean never — be a discount on a new car coming out of the factory in pristine condition, where there is no underlying rationale. This is why I always pay full price when I buy a car and the same applies to my family, friends and celebrities, no matter how famous or influential.

[...]

The acid test is that if you can't explain to a customer who paid full price why another customer didn't without being embarrassed, then it is not right. We either win in a way that is fair and right or we lose with our honor intact and accept the consequences.

[...]

I'm sorry for the Draconian language, as I am super grateful for your hard work, but there is nothing that matters more than our integrity as a company... Customers need to know with absolute certainty that they can always trust Tesla to do the right thing.

About this email: After a Reddit/analyst report of end-of-quarter discounting, Musk tells employees the no-negotiation, no-discount policy is fundamental to Tesla's integrity: floor models and damaged cars may be marked down, but never a pristine new car.

Notes: Musk posted the email as an image on Twitter; the image text could not be read in this session, so the text is assembled from passages quoted by Electrek (first two paragraphs), Autoblog ('acid test') and Jalopnik

('Draconian' passage, whose ellipsis is Jalopnik's). Fortune also quotes Musk saying the quarter 'is likely to be the best ever in Tesla history.' The opening of the email is missing.

Saudi PIF asks Musk for a meeting with Yasir Al-Rumayyan

From: Saad Al-Jarboa (Saudi Public Investment Fund)

Date: November 7, 2016

To: Elon Musk (via EM Desk - SpaceX); cc: Turqi Alnowaiser and a redacted recipient

Subject: Request to Meet with H.E. Yasir Al

FULL TEXT · BOARD, INVESTORS & ADVISERS · COURT RECORD · CONFIRMED

Dear Mr. Musk,

My name is Saad Al-Jarboa and I work with H.E. Mr. Yasir Al-Rumayyan at the Public Investment Fund (PIF).

H.E. has asked me to reach out to you in order to inquire about your availability to meet with him next week. HE would be willing to meet with you in either London or New York.

I would appreciate it if you could get back to us with some times that might work for you next week.

Best,

Saad Al-Jarboa

PIF

About this email: An aide at the Saudi Public Investment Fund writes to Musk's office asking when he could meet PIF governor Yasir Al-Rumayyan in London or New York the following week.

Notes: Trial Exhibit 105. Email TO Musk (addressed 'Dear Mr. Musk', sent to emdesk@spacex.com) that he answered internally on Nov 10, 2016. Standard PIF disclaimer footer omitted by the transcription.

Musk declines to travel to meet Saudi PIF's Yasir Al-Rumayyan

From: Elon Musk

Date: November 10, 2016

To: Sam Teller (cc: Emma Gallagher)

Subject: Re: NEXT WEEK - FW: Request to Meet with H.E. Yasir Al

FULL TEXT · BOARD, INVESTORS & ADVISERS · COURT RECORD · CONFIRMED

I appreciate the offer, but my obligations prevent me from traveling to those locations on those dates. Let's just schedule something when he is next in California. This is not an urgent matter.

About this email: Replying to a forwarded request from the Saudi Public Investment Fund for a meeting with Yasir Al-Rumayyan in London or New York, Musk tells his chief of staff he cannot travel and that the matter is not urgent.

Notes: Trial Exhibit 105. Sent from erm@spacex.com, Thursday Nov 10, 2016, 3:35 PM. The thread begins with a Nov 7, 2016 email from PIF's Saad Al-Jarboa to EM Desk asking for a meeting with H.E. Yasir Al-Rumayyan; Sam Teller then told Emma Gallagher: "Don't say not urgent / Just say not possible unfortunately / Hope to soon".

Sources: [U.S. District Court, N.D. Cal. - admitted trial exhibits, In re Tesla Inc. Securities Litigation \(18-cv-04865-EMC\)](#); [N.D. Cal. admitted-evidence directory for In re Tesla Inc. Securities Litigation](#)

Response to UAW drive: safety, pay, frozen yogurt, roller coaster

From: Elon Musk

Date: February 23, 2017 (Sent Thursday night, 23 Feb 2017, per BuzzFeed News; published 24 Feb)

To: All Tesla employees

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

For Tesla to become and remain one of the great companies of the 21st century, we must have an environment that is as safe, fair and fun as possible. It is incredibly important to me that you look forward to coming to work every day. For that, we must be a fair and just company – the only kind worth creating.

This is vital to succeed in our mission to accelerate the advent of a clean, sustainable energy future. The forces arrayed against us are many and incredibly powerful. This is David vs Goliath if David were six inches tall! Only by being smarter, faster and working well as a tightly integrated team do we have any chance of success. We should never forget the history of car startups originating in the United States: dozens have gone bankrupt and only two, Tesla and Ford, have not. Despite the odds being strongly against us, my faith in you is why I am confident that we will succeed.

That is why I was so distraught when I read the recent blog post promoting the UAW, which does not share our mission and whose true allegiance is to the giant car

companies, where the money they take from employees in dues is vastly more than they could ever make from Tesla.

The tactics they have resorted to are disingenuous or outright false. I will address their underhanded attacks below. While this discussion focuses on Fremont, these same principles apply to every Tesla facility worldwide.

Safety First

The workplace issue that comes before any other is safety. If you do not have your health, then nothing else matters. Simply due to size and bad luck, there will always be some injuries in a company with over 30,000 employees, but our goal is simple: to have as close to zero injuries as possible and be the safest factory in the auto industry by far. The Tesla executive team and I are absolutely committed to this goal.

That is why I was particularly troubled by the safety claim in last week's blog post, which said: "A few months ago, six out of eight people in my work team were out on medical leave at the same time due to various work-related injuries. I hear the ergonomics are even more severe in other areas of the factory."

Obviously, this cannot be true: if three quarters of his team suddenly went on medical leave, we would not be able to operate that part of the factory. Furthermore, if things were really even worse in other departments, that would mean something like 80% or more of the factory would be out on injury, production would drop to virtually nothing and the parking lot would be almost empty. As you know firsthand, we have the *opposite* problem – there is never enough room to park! In fact, we are working at top speed to build more parking. Also, hopefully our darn BART train station will open before all hell freezes over!

After looking into this claim, not only was it untrue for this individual's team, it was untrue for any of the hundreds of teams in the factory.

That said, reducing excess overtime and improving safety are extremely important. This is why we hired thousands of additional team members to create a third shift, which has reduced the burden on everyone. Moreover, since the beginning of Tesla production at Fremont five years ago, there have been dedicated health and safety experts covering the factory and we hold regular safety meetings with operations leaders. Since the majority of the injuries in the factory are ergonomic in nature, we have an ergonomics department focused exclusively on this issue.

The net result is that since January 1st, our total recordable incident rate (TRIR) is under 3.3, which is less than half the industry average of 6.7.

Of course, the goal is to have as close to zero injuries as humanly possible, so we need to keep improving. If you have a safety concern or an idea on how to make things better, please let your manager, safety representative or HR partner know. You can also send an anonymous note through the Integrity Hotline (it applies broadly to any problems you notice at our company) or you can email safety@tesla.com.

Compensation

At Tesla, we believe it is important for everyone to be an owner of the company. This is your company. That is why, unlike other car companies, everyone is awarded shares and you get to buy stock at a discount compared to the public through the employee stock purchase program. Last year, stock equity grants were increased significantly and it will happen again later this year once Model 3 achieves high volume.

The chart below contrasts the total comp received by a Tesla production team member who started on January 1, 2013 against the total comp received over the same period at GM, Ford, and Fiat Chrysler (FCA). A four year period is used because that's the vesting length of a new hire equity grant. I believe the equity gain over the next four years will be similar. As shown below, a Tesla team member earned between \$70,000 and \$100,000 more in total compensation than the employees at other US auto companies!

Work Hours

Another issue raised in the UAW blog was hours worked. First, I want to recognize how hard you worked to make our company successful. Those hours mattered to you, to your family and to our company, and I can't tell you how much I appreciate them.

However, the pace needs to be sustainable. This is why the third shift was established and why we created alternate work schedules based on feedback from various teams in the factory.

These changes have had a big impact. The average amount of hours worked by production team members this year is about 43 hours per week. The percentage of overtime hours has declined by almost 50% since the super tough time we had last year achieving rate on the Model X, which is probably the hardest car to build in history. What an amazing accomplishment! It is also a lesson learned, which is why Model 3 is designed to be dramatically easier to manufacture.

Fun

As we get closer to being a profitable company, we will be able to afford more and more fun things. For example, as I mentioned at the last company talk, we are going to hold a really amazing party once Model 3 reaches volume production later this year. There will also be little things that come along like free frozen yogurt stands scattered around the factory and my personal favorite: a Tesla electric pod car roller coaster (with an optional loop the loop route, of course!) that will allow fast and fun travel throughout our Fremont campus, dipping in and out of the factory and connecting all the parking lots. It's going to get crazy good :)

Thanks again for all your effort and I look forward to working alongside you to create an amazing future!

Elon

About this email: Responding to worker Jose Moran's pro-UAW blog post, Musk disputes its injury and overtime claims, defends Tesla's safety record and equity-based pay, and promises perks including free frozen yogurt stands and an electric pod-car roller coaster at Fremont.

Notes: First reported by BuzzFeed News; Electrek printed the full text. The original email included a compensation comparison chart that is not reproduced. Section headings (Safety First, Compensation, Work

Hours, Fun) were bold in the source.

'Doing the right thing': don't be a jerk, accept apologies

From: Elon Musk

Date: May 31, 2017

To: All Tesla employees

Subject: Doing the right thing

PARTIAL TEXT · COMPANY-WIDE MEMO · COURT RECORD · CONFIRMED

Part of not being a huge jerk is considering how someone might feel who is part of an historically less represented group. This doesn't mean there is a different standard of performance or that you can't give critical feedback. You should -- doing anything else would be an insult to the hard work it took to get there -- but don't ever intentionally allow someone to feel excluded, uncomfortable or unfairly treated. Sometimes these things happen unintentionally, in which case you should apologize.

In fairness, if someone is a jerk to you, but sincerely apologizes, it is important to be thick-skinned and accept that apology. If you are part of a less represented group, you don't get a free pass on being a jerk yourself. We have had a few cases at Tesla where someone in a less represented group was actually given a job or promoted over more qualified highly represented candidates and then decided to sue Tesla for millions of dollars because they felt they weren't promoted enough. That obviously is not cool.

About this email: In a company-wide email on workplace conduct, Musk says employees must consider how members of historically less represented groups feel, should apologize for unintended offence and accept sincere apologies, and that minority employees get no free pass; he complains some have sued Tesla after being promoted. A racial-harassment suit quoted it and Tesla then released it in full.

Notes: First quoted in the [Vaughn v. Tesla class-action complaint](#) (Alameda County, Nov 2017); Tesla then published the whole email in its 14 Nov 2017 blog post 'Hotbed of Misinformation', which is no longer on

tesla.com. Fortune and Teslarati reproduce the full email only as an image that could not be read in this session, so the text here is the contiguous passage printed by Bloomberg (two consecutive quotations; paragraph break is Bloomberg's). 'apologies' is as printed by Bloomberg; Jalopnik prints 'apologizes' and '[a] historically'. The opening and close of the email are missing. The safety email Musk sent the same day ('No words can express how much I care about your safety...') may be the first part of this same message; that could not be confirmed.

Report every injury to me; I will do the same task

From: Elon Musk

Date: May 31, 2017 (Teslarati reports it was sent on 31 May 2017; Electrek (2 June) said 'this week')

To: All Tesla employees

PARTIAL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

No words can express how much I care about your safety and wellbeing. It breaks my heart when someone is injured building cars and trying their best to make Tesla successful.

Going forward, I've asked that every injury be reported directly to me, without exception. I'm meeting with the safety team every week and would like to meet every injured person as soon as they are well, so that I can understand from them exactly what we need to do to make it better. I will then go down to the production line and perform the same task that they perform.

This is what all managers at Tesla should do as a matter of course. At Tesla, we lead from the front line, not from some safe and comfortable ivory tower. Managers must always put their team's safety above their own.

About this email: After reports about injury rates at Fremont, Musk tells employees that every injury must be reported directly to him, that he will meet each injured worker and then perform the same task on the line himself.

Notes: Electrek and Inc. printed these three paragraphs; no greeting, subject or sign-off was published. Teslarati says the email first surfaced as an image on the Model 3 Owners Club Facebook page. Tesla's company-wide email 'Doing the right thing' was sent the same day (31 May 2017), so these paragraphs may be the opening of that email rather than a separate message; this could not be confirmed because the full email is only available as an image.

Communication Within Tesla: talk to anyone, no chain of command

From: Elon Musk

Date: August 30, 2017 (Date of first publication by Inc.; send date unknown. Inc. said Musk sent it 'a few years ago'; it is often dated to around 2013 but that could not be verified)

To: All Tesla employees

Subject: Communication Within Tesla

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · CONFIRMED

There are two schools of thought about how information should flow. By far the most common way is chain of command, which means that you always flow communication through your manager. The problem with this approach is that, while it enhances the power of the manager, it fails to serve the company.

To solve a problem quickly, two people in different depts should simply talk and make the right thing happen. Instead, people are forced to talk to their manager, who talks to their manager, who talks to the manager in the other dept, who talks to someone on his

team. Then the info has to flow back the other way again. This is incredibly dumb. Any manager who allows this to happen, let alone encourages it, will soon find themselves working at another company. No kidding.

Anyone at Tesla can and should email/talk to anyone else according to what they think is the fastest way to solve a problem for the benefit of the whole company.

You can talk to your manager's manager without his permission, you can talk directly to a VP in another dept, you can talk to me, you can talk to anyone without anyone else's permission. Moreover, you should consider yourself obligated to do so until the right thing happens. The point here is to ensure that we execute ultra-fast and well. We obviously cannot compete with the big car companies in size, so we must do so with intelligence and agility.

One final point is that managers should work hard to ensure that they are not creating silos within the company that create an "us vs. them" mentality, or impede communication in any way. This is unfortunately a natural tendency and needs to be actively fought. How can it possibly help Tesla for depts to erect barriers between themselves, or see their success as relative within the company instead of collective?

We are all in the same boat. Always view yourself as working for the good of the company and never your dept.

Thanks,
Elon

About this email: Musk tells all staff that information should flow by the shortest path, not the chain of command: anyone may email or talk to anyone else, including him, and managers who enforce chain-of-command communication or build silos will be out.

Notes: Inc. described it as 'a previously unpublished email Musk sent to Tesla employees a few years ago' and said Tesla verified it was sent to all employees. Text taken from a reprint; sign-off rendered there as 'Thanks, Elon'.

Musk: 'That is more than intended' - cuts award to 20.915M shares

From: Elon Musk

Date: December 1, 2017

To: Todd Maron

PARTIAL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

That is more than intended. Let's go with 10% of the current FDS number, so 20.915M.

About this email: After Maron sent share calculations on November 29, Musk replies that the figure is more than he intended and sets the award at 10% of the then-current fully diluted share count. At trial he called this 'me negotiating against myself'.

Notes: Known only through the passages quoted in Chancellor McCormick's post-trial opinion (factual background); the full email is not public. FDS = fully diluted shares. Also quoted at para. 120 of the amended complaint.

Sources: [Tornetta v. Musk, C.A. No. 2018-0408-KSJM \(Del. Ch. Jan. 30, 2024\), post-trial opinion](#); [Harvard Law School Forum on Corporate Governance \(reproduces the opinion text\)](#); [Amended derivative complaint \(Bernstein Litowitz\)](#)

Musk on M&A adjustment: 'no chance I will game the economics'

From: Elon Musk

Date: January 16, 2018 (on or shortly after January 16, 2018)

To: Todd Maron and Deepak Ahuja

EXCERPT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

I don't think we will be making big acquisitions[.]

[...]

[T]here is no chance I will game the economics here, so I'm fine with limits that prevent that.

About this email: In negotiating how acquisitions would be excluded from the pay plan's milestones, Musk proposes a stricter threshold and says he does not expect big acquisitions.

Notes: Known only through the passages quoted in Chancellor McCormick's post-trial opinion (factual background); the full email is not public. The opinion says Musk 'told Maron and Ahuja' this in countering Maron's January 16, 2018 proposal; it does not expressly say whether the message was an email, so treat the medium as probable rather than certain.

Sources: [Tornetta v. Musk, C.A. No. 2018-0408-KSJM \(Del. Ch. Jan. 30, 2024\)](#), post-trial opinion; [Harvard Law School Forum on Corporate Governance \(reproduces the opinion text\)](#); [Amended derivative complaint \(Bernstein Litowitz\)](#)

Model 3 passes 2,000 cars per week

From: Elon Musk

Date: April 2, 2018 (Sent about 3:01 a.m. PDT on Monday April 2, 2018)

To: All Tesla employees

EXCERPT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

It has been extremely difficult to pass the 2000 cars per week rate for Model 3, but we are finally there. If things go as planned today, we will comfortably exceed that number over a seven-day period!

[...]

This is already double the pace of 2017!

[...]

By the end of the year, I believe we will be producing vehicle sat least four times faster than last year.

[...]

It took five years to reach the 2000/week production rate for S and X combined, but only nine months to achieve that output with Model 3. Mind-blowing progress!

About this email: Musk tells staff that Model 3 production has finally passed 2,000 cars a week, double the 2017 pace, and predicts output four times faster by year-end.

Notes: Only excerpts were published. Passages combined from Electrek (first and last) and Jalopnik (middle two); order within the email is not certain. 'vehicle sat least' typo is as quoted by Jalopnik.

Sources: [Electrek](#); [Jalopnik](#); [TechCrunch](#)

Model 3 ramp to 6,000/week, 24/7 shifts, productivity rules

From: Elon Musk

Date: April 17, 2018

To: Everybody (all Tesla employees)

Subject: Progress, Precision and Profit

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Progress

First, congratulations are in order! We have now completed our third full week of producing over 2000 Model 3 vehicles. The first week was 2020, the second was 2070 and we just completed 2250 last week, along with 2000 Model S/X vehicles.

This is more than double Tesla's weekly production rate last year and an amazing feat in the face of many challenges! It is extremely rare for an automotive company to grow the production rate by over 100% from one year to the next. Moreover, there has simultaneously been a significant improvement in quality and build accuracy, which is reflected in positive owner feedback.

Starting today at Giga and tomorrow at Fremont, we will be stopping for three to five days to do a comprehensive set of upgrades. This should set us up for Model 3 production of 3000 to 4000 per week next month.

Another set of upgrades starting in late May should be enough to unlock production capacity of 6000 Model 3 vehicles per week by the end of June. Please note that all areas of Tesla and our suppliers will be required to demonstrate a Model 3 capacity of ~6000/week by building 850 sets of car parts in 24 hours no later than June 30th.

Any Tesla department or supplier that is unable to do this will need to have a very good explanation why not, along with a plan for fixing the problem and present that to me directly. If anyone needs help achieving this, please let me know as soon as possible. We are going to find a way or make a way to get there.

The reason that the burst-build target rate is 6000 and not 5000 per week in June is that we cannot have a number with no margin for error across thousands of internally and externally produced parts and processes, amplified by a complex global logistics chain. Actual production will move as fast as the least lucky and least well-executed part of the entire Tesla production/supply chain system.

By having a Model 3 subsystem burst-build requirement of 6k by the end of June, we will lay the groundwork for achieving a steady 6k/week across the whole Model 3 system a few months later.

As part of the drive towards 6k, all Model 3 production at Fremont will move to 24/7 operations. This means that we will be adding another shift to general assembly, body and paint. Please refer anyone you know who you think meets the Tesla bar for talent, drive and trust. Between Fremont and Giga, Tesla will be adding about 400 people per week for several weeks.

Precision

Most of the design tolerances of the Model 3 are already better than any other car in the world. Soon, they will all be better. This is not enough. We will keep going until the Model 3 build precision is a factor of ten better than any other car in the world. I am not kidding.

Our car needs to be designed and built with such accuracy and precision that, if an owner measures dimensions, panel gaps and flushness, and their measurements don't match the Model 3 specs, it just means that their measuring tape is wrong.

Some parts suppliers will be unwilling or unable to achieve this level of precision. I understand that this will be considered an unreasonable request by some. That's ok, there are lots of other car companies with much lower standards. They just can't work with Tesla.

Profit

A fair criticism leveled at Tesla by outside critics is that you're not a real company unless you generate a profit, meaning simply that revenue exceeds costs. It didn't make sense to do that until reaching economies of scale, but now we are there.

Going forward, we will be far more rigorous about expenditures. I have asked the Tesla finance team to comb through every expense worldwide, no matter how small, and cut everything that doesn't have a strong value justification.

All capital or other expenditures above a million dollars, or where a set of related expenses may accumulate to a million dollars over the next 12 months, should be considered on hold until explicitly approved by me. If you are the manager responsible, please make sure you have a detailed, first principles understanding of the supplier quote, including every line item of parts & labor, before we meet.

I have been disappointed to discover how many contractor companies are interwoven throughout Tesla. Often, it is like a Russian nesting doll of contractor, subcontractor, sub-subcontractor, etc. before you finally find someone doing actual work. This means a

lot of middle-managers adding cost but not doing anything obviously useful. Also, many contracts are essentially open time & materials, not fixed price and duration, which creates an incentive to turn molehills into mountains, as they never want to end the money train.

There is a very wide range of contractor performance, from excellent to worse than a drunken sloth. All contracting companies should consider the coming week to be a final opportunity to demonstrate excellence. Any that fail to meet the Tesla standard of excellence will have their contracts ended on Monday.

Btw, here are a few productivity recommendations:

- Excessive meetings are the blight of big companies and almost always get worse over time. Please get of all large meetings, unless you're certain they are providing value to the whole audience, in which case keep them very short.
- Also get rid of frequent meetings, unless you are dealing with an extremely urgent matter. Meeting frequency should drop rapidly once the urgent matter is resolved.
- Walk out of a meeting or drop off a call as soon as it is obvious you aren't adding value. It is not rude to leave, it is rude to make someone stay and waste their time.
- Don't use acronyms or nonsense words for objects, software or processes at Tesla. In general, anything that requires an explanation inhibits communication. We don't want people to have to memorize a glossary just to function at Tesla.
- Communication should travel via the shortest path necessary to get the job done, not through the "chain of command". Any manager who attempts to enforce chain of command communication will soon find themselves working elsewhere.
- A major source of issues is poor communication between depts. The way to solve this is allow free flow of information between all levels. If, in order to get something done between depts, an individual contributor has to talk to their manager, who talks to a director, who talks to a VP, who talks to another VP, who talks to a director, who talks to a manager, who talks to someone doing the actual work, then super dumb things will happen. It must be ok for people to talk directly and just make the right thing happen.
- In general, always pick common sense as your guide. If following a "company rule" is obviously ridiculous in a particular situation, such that it would make for a great Dilbert cartoon, then the rule should change.

If there is something you think should be done to make Tesla execute better or allow you to look forward to coming to work more (same thing in the long term), please send a note to [redacted]

Thanks for being such a kickass team and accomplishing miracles every day. It matters. We are burning the midnight oil to burn the midnight oil.

Elon

About this email: Musk congratulates staff on three weeks above 2,000 Model 3s, sets a 6,000/week burst-build target for end of June with 24/7 operations at Fremont, puts all spending above \$1M on hold pending his

approval, threatens underperforming contractors, and lists his now-famous productivity recommendations (leave useless meetings, no acronyms, ignore chain of command).

Notes: Electrek obtained and printed the full email; feedback email address redacted by the outlet. 'Please get of all large meetings' typo is in the published text.

Contractor purge: 'Time to scrub off the barnacles'

From: Elon Musk

Date: May 2018 (Reported by Electrek on Sunday May 6, 2018; sent in the preceding days (it sets a deadline of 'Monday'))

To: All Tesla employees

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Please note my comment below about contractor companies and consultants. I extended the performance evaluation deadline to provide more opportunity to demonstrate excellence, but now time is up.

Please send a note to HR before Monday justifying the excellence, necessity and trustworthiness by individual (not just the contractor company as a whole) of every non-Tesla person who has badge access to our buildings or network access to our systems.

By default, anyone who does not have a Tesla employee putting their reputation on the line for them will be denied access to our facilities and networks on Monday morning. This applies worldwide.

Time to scrub off the barnacles.

Thanks, Elon

About this email: Following up on his April 17 warning to contractors, Musk says time is up: every non-Tesla person with badge or network access must be personally vouched for by a Tesla employee or lose access worldwide on Monday morning.

Notes: 'My comment below' refers to the contractor paragraphs of the April 17, 2018 'Progress, Precision and Profit' email, which this message forwarded.

Reorganization: flattening the management structure

From: Elon Musk

Date: May 14, 2018

To: All Tesla employees

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

To ensure that Tesla is well prepared for the future, we have been undertaking a thorough reorganization of our company. As part of the reorg, we are flattening the management structure to improve communication, combining functions where sensible and trimming activities that are not vital to the success of our mission.

To be clear, we will continue to hire rapidly in critical hourly and salaried positions to support the Model 3 production ramp and future product development.

About this email: Short memo telling staff Tesla is undergoing a thorough reorganization, flattening management, combining functions and trimming non-vital activities, while continuing to hire for the Model 3 ramp.

Notes: First reported by the Wall Street Journal. CNBC labels this 'the full memo'; it is two paragraphs with no greeting or sign-off as published.

Layoff of about 9% of Tesla's workforce

From: Elon Musk

Date: June 12, 2018

To: All Tesla employees

FULL TEXT · COMPANY-WIDE MEMO · PUBLISHED BY MUSK · CONFIRMED

As described previously, we are conducting a comprehensive organizational restructuring across our whole company. Tesla has grown and evolved rapidly over the past several years, which has resulted in some duplication of roles and some job functions that, while they made sense in the past, are difficult to justify today.

As part of this effort, and the need to reduce costs and become profitable, we have made the difficult decision to let go of approximately 9% of our colleagues across the company. These cuts were almost entirely made from our salaried population and no production associates were included, so this will not affect our ability to reach Model 3 production targets in the coming months.

Given that Tesla has never made an annual profit in the almost 15 years since we have existed, profit is obviously not what motivates us. What drives us is our mission to accelerate the world's transition to sustainable, clean energy, but we will never achieve that mission unless we eventually demonstrate that we can be sustainably profitable.

That is a valid and fair criticism of Tesla's history to date.

This week, we are informing those whose roles are impacted by this action. We made these decisions by evaluating the criticality of each position, whether certain jobs could be done more efficiently and productively, and by assessing the specific skills and abilities of each individual in the company. As you know, we are also continuing to flatten our management structure to help us communicate better, eliminate bureaucracy and move faster.

In addition to this company-wide restructuring, we've decided not to renew our residential sales agreement with Home Depot in order to focus our efforts on selling solar power in Tesla stores and online. The majority of Tesla employees working at Home Depot will be offered the opportunity to move over to Tesla retail locations.

I would like to thank everyone who is departing Tesla for their hard work over the years. I'm deeply grateful for your many contributions to our mission. It is very difficult to say goodbye. In order to minimize the impact, Tesla is providing significant salary and stock vesting (proportionate to length of service) to those we are letting go.

To be clear, Tesla will still continue to hire outstanding talent in critical roles as we move forward and there is still a significant need for additional production personnel. I also want to emphasize that we are making this hard decision now so that we never have to do this again.

To those who are departing, thank you for everything you've done for Tesla and we wish you well in your future opportunities. To those remaining, I would like to thank you in advance for the difficult job that remains ahead. We are a small company in one of the toughest and most competitive industries on Earth, where just staying alive, let alone growing, is a form of victory (Tesla and Ford remain the only American car companies who haven't gone bankrupt). Yet, despite our tiny size, Tesla has already played a major role in moving the auto industry towards sustainable electric transport and moving the energy industry towards sustainable power generation and storage. We must continue to drive that forward for the good of the world.

Thanks,
Elon

About this email: Musk announces Tesla is cutting roughly 9% of staff, almost entirely salaried, as part of a company-wide restructuring to reduce costs and reach profitability; also ends the Home Depot solar sales agreement.

Notes: Musk posted the email himself on Twitter after it began leaking ('Difficult, but necessary Tesla reorg underway. My email to the company has already leaked to media. Here it is unfiltered').

'Radical improvements' still needed for 5k/week

From: Elon Musk

Date: June 15, 2018 (Sent June 15, 2018 at 8:27 pm)

To: Everybody (all Tesla employees)

Subject: Only 8 days left to reach 700 cars/day or 5k/week

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

It's getting very exciting! All parts of the Model 3 production system are now above 500 and some are almost at 700 cars already. Congratulations to all on making so much progress!

That said, radical improvements are still needed in paint shop output, GA3, bringing up the new GA4, End of Line and Module Zone 4 at Giga. We also need to achieve sustained, 700+ per week on the body line.

Wherever you are in the company, if you feel you can help out in any of those areas, please check in with Jat Dhillon on GA3, Jerome Guillen on GA4 and Omead on EoL and JB Straubel or Christ Lister on Module Zone 4.

I will be at our Fremont factory almost 24/7 for the next several days checking in with those groups to make sure they have as many resources as they can handle.

Thanks,

Elon

About this email: Eight days before the end of Q2 2018, Musk says all parts of the Model 3 system are above 500 cars a day but radical improvements are needed in paint, general assembly and Gigafactory modules, and says he will be at Fremont almost 24/7.

Notes: 'Christ Lister' and '700+ per week on the body line' are as published.

Employee 'sabotage' warning before Model 3 ramp

From: Elon Musk

Date: June 17, 2018 (Sent Sunday June 17, 2018 at 11:57 p.m.)

To: Everybody (all Tesla employees)

Subject: Some concerning news

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

I was dismayed to learn this weekend about a Tesla employee who had conducted quite extensive and damaging sabotage to our operations. This included making direct code changes to the Tesla Manufacturing Operating System under false usernames and exporting large amounts of highly sensitive Tesla data to unknown third parties.

The full extent of his actions are not yet clear, but what he has admitted to so far is pretty bad. His stated motivation is that he wanted a promotion that he did not receive. In light of these actions, not promoting him was definitely the right move.

However, there may be considerably more to this situation than meets the eye, so the investigation will continue in depth this week. We need to figure out if he was acting alone or with others at Tesla and if he was working with any outside organizations.

As you know, there are a long list of organizations that want Tesla to die. These include Wall Street short-sellers, who have already lost billions of dollars and stand to lose a lot more. Then there are the oil & gas companies, the wealthiest industry in the world — they don't love the idea of Tesla advancing the progress of solar power & electric cars. Don't want to blow your mind, but rumor has it that those companies are sometimes not super nice. Then there are the multitude of big gas/diesel car company competitors. If they're willing to cheat so much about emissions, maybe they're willing to cheat in other ways?

Most of the time, when there is theft of goods, leaking of confidential information, dereliction of duty or outright sabotage, the reason really is something simple like wanting to get back at someone within the company or at the company as a whole. Occasionally, it is much more serious.

Please be extremely vigilant, particularly over the next few weeks as we ramp up the production rate to 5k/week. This is when outside forces have the strongest motivation to stop us.

If you know of, see or suspect anything suspicious, please send a note to [email address removed for privacy] with as much info as possible. This can be done in your name, which will be kept confidential, or completely anonymously.

Looking forward to having a great week with you as we charge up the super exciting ramp to 5000 Model 3 cars per week!

Will follow this up with emails every few days describing the progress and challenges of the Model 3 ramp.

Thanks for working so hard to make Tesla successful,

Elon

About this email: Musk tells staff an employee made unauthorized code changes to the Manufacturing Operating System and exported sensitive data, warns that short-sellers, oil companies and rival automakers want Tesla to die, and asks for vigilance during the 5k/week ramp.

Notes: CNBC obtained the email; the employee was later identified as Martin Tripp. Reporting email address removed by the outlets. Text retrieved from Armenpress and Teslarati reprints, which match.

'We did it!!' - 5,000 Model 3s in a week

From: Elon Musk

Date: July 1, 2018 (Sent July 1, 2018 at 12:37 PM)

To: Everybody (all Tesla employees)

Subject: 7000

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

We did it!! What an incredible job by an amazing team. Couldn't be more proud to work with you. It is an honor.

The level of dedication and creativity was mind-blowing. We either found a way or, by will and inventiveness, created entirely new solutions that were thought impossible.

Intense in tents. Transporting entire production lines across the world in massive cargo planes. Whatever. It worked.

Not only did we factory gate over 5000 Model 3's, but we also achieved the S & X production target for a combined 7000 vehicle week!

What's more, with the widespread productivity gains throughout Tesla and the new production lines spooling up, we are on track to reach 6k/week for Model 3 next month.

I think we just became a real car company ...

Thank you for your hard work and dedication,

Elon

About this email: Musk celebrates Tesla building over 5,000 Model 3s and 7,000 total vehicles in the last week of Q2 2018 and says the company is on track for 6k/week.

Musk's \$420 take-private offer to Tesla's board

From: Elon Musk

Date: August 2, 2018 (Exhibit header: sent 8/2/2018 3:26:59 PM)

To: Tesla Board of Directors; Todd Maron; Deepak Ahuja

Subject: Offer to Take Tesla Private at \$420

FULL TEXT · BOARD, INVESTORS & ADVISERS · COURT RECORD · CONFIRMED

It is my firm belief that Tesla can operate more effectively as a private company for the next several years. In the future, once Tesla enters a phase of slower, more predictable growth, it will likely make sense to return to the public markets.

However, being public during this period of rapid and often unpredictable growth:

1. Subjects Tesla to constant defamatory attacks by the short-selling community, resulting in great harm to our valuable brand.
2. Puts great pressure on Tesla to make decisions for a given quarter that are suboptimal for long-term shareholder value creation.
3. Causes wild swings in our share price, which are a constant distraction to Tesla employees, all of whom are shareholders, making it harder to focus on useful work.

The difference in operational efficiency between Tesla and SpaceX, the latter being privately held, is dramatic.

Unless another bidder comes forward with a better offer, I would ask that this matter be put to a shareholder vote at the earliest opportunity. This offer expires in 30 days.

Please note that I fully support any shareholders who wish to remain shareholders of Tesla as a private company retaining their shares. This offer is just for those who do not wish to remain shareholders of Tesla as a private company.

Regards,

Elon Musk
Chairman & CEO
Tesla, Inc.

About this email: Five days before the 'funding secured' tweet, Musk formally tells the board he believes Tesla should be private, cites short-seller attacks, quarterly pressure and stock swings, and asks for a shareholder vote on a \$420 offer that expires in 30 days.

Notes: Sent from erm@tesla.com. Transcribed from the court's PDF exhibit; two exhibits (81 and 802) carry identical text.

Ron Baron asks to stay invested in a private Tesla

From: Ron Baron (Baron Funds)

Date: August 7, 2018

To: Elon Musk

Subject: Tesla +\$11

FULL TEXT · BOARD, INVESTORS & ADVISERS · COURT RECORD · CONFIRMED

If you decide to purchase Tesla in a "going private" transaction, I hope you will allow us to continue to be an investor in your newly formed business. I want to make sure you know that we remain optimistic about the prospects for Tesla and want to continue to invest with you. Thanks in advance for considering us as one of your partners.

About this email: Minutes after the 'funding secured' tweet, fund manager Ron Baron asks Musk to let Baron Funds remain an investor if Tesla goes private.

Notes: Trial Exhibit 1001. Baron's message is quoted beneath Musk's reply with the line 'On Aug 7, 2018, at 10:55 AM, Ron Baron <rbaron@baronfunds.com> wrote:'. The exhibit also contains internal Baron Funds emails; Baron wrote to colleagues that a take-private 'would be a terrible result for us ... unless we were included in the buying group, of course.'

'Taking Tesla Private' email to employees

From: Elon Musk

Date: August 7, 2018

To: All Tesla employees

Subject: Taking Tesla Private

FULL TEXT · COMPANY-WIDE MEMO · PUBLISHED BY MUSK · CONFIRMED

Earlier today, I announced that I'm considering taking Tesla private at a price of \$420/share. I wanted to let you know my rationale for this, and why I think this is the best path forward.

First, a final decision has not yet been made, but the reason for doing this is all about creating the environment for Tesla to operate best. As a public company, we are subject to wild swings in our stock price that can be a major distraction for everyone working at Tesla, all of whom are shareholders. Being public also subjects us to the quarterly earnings cycle that puts enormous pressure on Tesla to make decisions that may be right for a given quarter, but not necessarily right for the long-term. Finally, as the most shorted stock in the history of the stock market, being public means that there are large numbers of people who have the incentive to attack the company.

I fundamentally believe that we are at our best when everyone is focused on executing, when we can remain focused on our long-term mission, and when there are not perverse incentives for people to try to harm what we're all trying to achieve.

This is especially true for a company like Tesla that has a long-term, forward-looking mission. SpaceX is a perfect example: it is far more operationally efficient, and that is largely due to the fact that it is privately held. This is not to say that it will make sense for Tesla to be private over the long-term. In the future, once Tesla enters a phase of slower, more predictable growth, it will likely make sense to return to the public markets.

Here's what I envision being private would mean for all shareholders, including all of our employees.

First, I would like to structure this so that all shareholders have a choice. Either they can stay investors in a private Tesla or they can be bought out at \$420 per share, which is a 20% premium over the stock price following our Q2 earnings call (which had already increased by 16%). My hope is for all shareholders to remain, but if they prefer to be bought out, then this would enable that to happen at a nice premium.

Second, my intention is for all Tesla employees to remain shareholders of the company, just as is the case at SpaceX. If we were to go private, employees would still be able to periodically sell their shares and exercise their options. This would enable you to still share in the growing value of the company that you have all worked so hard to build over time.

Third, the intention is not to merge SpaceX and Tesla. They would continue to have separate ownership and governance structures. However, the structure envisioned for Tesla is similar in many ways to the SpaceX structure: external shareholders and

employee shareholders have an opportunity to sell or buy approximately every six months.

Finally, this has nothing to do with accumulating control for myself. I own about 20% of the company now, and I don't envision that being substantially different after any deal is completed.

Basically, I'm trying to accomplish an outcome where Tesla can operate at its best, free from as much distraction and short-term thinking as possible, and where there is as little change for all of our investors, including all of our employees, as possible.

This proposal to go private would ultimately be finalized through a vote of our shareholders. If the process ends the way I expect it will, a private Tesla would ultimately be an enormous opportunity for all of us. Either way, the future is very bright and we'll keep fighting to achieve our mission.

Thanks,
Elon

About this email: Hours after tweeting 'funding secured', Musk explains to employees why he is considering taking Tesla private at \$420 a share, promising that shareholders and employees could stay invested and that no final decision has been made.

Notes: Tesla published the email on its blog under the note 'The following email was sent to Tesla employees today'. Court exhibit 503 shows the text was drafted by communications chief Sarah O'Brien and approved by Musk. The tesla.com blog page itself could not be opened in this session (403); text taken from TechCrunch's reproduction.

Comms chief warns Musk of FT story on Saudi stake

From: Dave Arnold

Date: August 7, 2018 (Exhibit header: August 7, 2018, 8:16 AM)

To: Elon Musk

Subject: FT article re: Saudi investment in Tesla

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Elon,

FYI - The Financial Times is preparing to run a story today saying that sources have confirmed that Saudi Arabia (via the Saudi Public Investment Fund) has built a 3-5% stake in Tesla after buying shares on the open market earlier this year. This comes after a visit to the US by the crown prince in March. The FT will also report that the Saudis previously approached Tesla about buying new shares but that we declined because we weren't looking to raise capital. The reporter says the Saudis "first approached Tesla after investment in Uber in 2016."

Their deadline is 9am PT, and we're planning to decline to comment to avoid confirming their reporting.

Thanks,

Dave

About this email: Tesla communications head Dave Arnold alerts Musk that the Financial Times is about to report the Saudi PIF has built a 3-5% Tesla stake and that Tesla plans to decline comment. Musk tweeted 'funding secured' later that day.

Notes: Email to Musk, included because he replied in the same exhibit.

CFO tells Musk investors and SEC are asking about 'funding secured'

From: Deepak Ahuja

Date: August 7, 2018 (Exhibit header: sent 8/7/2018 3:11:18 PM)

To: Elon Musk (cc: Todd Maron)

Subject: FW: hey

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Elon,

FYI. We are getting a lot of enquiries from investors, SEC and the media to better understand the comment "funding secured".

Deepak

[Forwarded message] From: Owuraka Koney (Jennison Associates) / Date: Tuesday, August 7, 2018 at 2:15 PM / To: deepak@tesla.com / Subject: hey

Hey Deepak,

I hope all is well. Today (and the last few months!) has been a bit of a whirlwind for us as I imagine for you and the firm as well. We are obviously quite surprised by the intent to take Tesla private but we need more information. Specifically, we want to know if there is some kind of commitment letter not just a verbal agreement to provide the funding to go private? This is a very serious matter and saying it on a tweet is just not sufficient.

As a side note, I just want you to know that Martin is doing an absolutely fantastic job running IR. His level of knowledge and seriousness with which he approaches the job has been very impressive. Multiples over the last few months I've done calls with him and my PM team and we can't praise him enough.

Owuraka

About this email: CFO Deepak Ahuja forwards Musk an email from Jennison Associates' Owuraka Koney asking whether there is a commitment letter for the take-private funding, and tells Musk that investors, the SEC and media are asking what 'funding secured' means.

Notes: Email TO Musk. The court labels the exhibit '8.7.18 from Musk to Maron', but the transcription retrieved in this session showed only Ahuja's note to Musk and the forwarded investor email (reproduced below it); no Musk-authored text was recovered. The forwarded message's legal disclaimer is omitted.

Musk approves the drafted 'Taking Tesla Private' email

From: Elon Musk

Date: August 7, 2018 (Exhibit shows 11:49 AM for 'Great' and a header time of 8/7/2018 7:11:15 PM for 'Will send')

To: Sarah O'Brien (cc: Todd Maron; Deepak Ahuja; Dave Arnold; Sam Teller)

Subject: Re: Draft Email 420

PARTIAL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Great

[...]

Will send

About this email: Communications chief Sarah O'Brien sends Musk a draft of the employee email explaining the \$420 take-private idea; Musk replies 'Great', and after she suggests he send it to employees before it goes on

the blog, he answers 'Will send'.

Notes: Two very short Musk replies in one chain, combined here. Successive machine reads of the PDF disagreed on which header carries which reply, so the pairing of 'Great' (reply to the draft) and 'Will send' (final reply) should be checked against the PDF. O'Brien's messages: 'Below is a draft email for your consideration. Immediately after you send something to employees, we'll get it up on the blog.'; 'Apologies Elon, use this version:'; 'Shall we leave you send this to employees first and then we'll post it on the blog as a message from to our employees? To me, that feels like the best approach.'

Musk to Goldman: Saudi Arabia 'would do the entire thing'

From: Elon Musk

Date: August 11, 2018 (Exhibit header: Saturday, August 11, 2018 3:39:59 PM)

To: Dan Dees (Goldman Sachs)

Subject: Re: Good to see u yesterday

FULL TEXT · BOARD, INVESTORS & ADVISERS · COURT RECORD · CONFIRMED

Sounds good. Will call this evening. Just a short call between us that maybe leads to a larger group call. Key question to solve is: can we put together a diverse enough investor/lender group, such that no single investor can demand special terms? Saudi Arabia would do the entire thing of course, as this is strategically critical to their future, but they would require that we build a Gigafactory there sooner than we would prefer. Hopefully, we can avoid that requirement.

About this email: Musk tells Goldman's Dan Dees the key question is whether a diverse investor group can be assembled so no single investor can demand special terms, saying Saudi Arabia would fund the whole take-private but would want a Gigafactory there.

Notes: In the machine transcription of the PDF, Musk's reply runs directly into the quoted earlier message from Dees ('Anytime. On mobile. Or if u have a set time that works best for u, I can line up a dial in and get the broader team. Either way works'); that trailing text is treated here as Dees's quoted message and excluded. Boundary should be checked against the PDF.

Goldman's conditions for advising Musk on take-private

From: Dan Dees (Goldman Sachs)

Date: August 14, 2018 (Date of Musk's reply; send time of the Goldman email itself not shown in the transcription)

To: Elon Musk

FULL TEXT · BOARD, INVESTORS & ADVISERS · COURT RECORD · CONFIRMED

To ensure there is no misunderstanding, we wanted to follow up on our conversation this morning with this email. We are pleased to accept the mandate to work with you on the basis of the following mutual understanding.

We want to remind you that GS, alongside other banks, is a counterparty to the Company and its subsidiaries on multiple equity derivative transactions, including multiple call spread transactions and a capped call transaction. A change of control of the Company would trigger a termination/unwind of the call spreads that could result in a payment to or from GS and others and could result in varying p+I consequences to GS depending on our hedging strategy. You should also know that your recent announcements may trigger potential adjustments under those transactions. We will review with you and your team potential implications of a take-private on the equity derivatives. As is typical under these transactions, you understand that GS will continue to act as an arms'-length counterparty to you and the Company and as such would not be in a position to advise you on the equity derivative transactions.

In addition, you know that GS has an ABL outstanding with the company which has a change of control provision. We will need to discuss with you plans for the ABL in connection with the new financing to be put in place in connection with the take private.

We would expect to sign an engagement letter with you as soon as practical, which would include agreement on fees, our standard indemnification, reimbursement of legal expenses and a waiver of conflicts relating to the equity derivatives and would expect that you require any buy side consortium members to also sign on the obligations under the engagement letter. In addition, we would look to be indemnified and have our legal

expenses paid to the extent GS becomes involved in connection with investigations into the Company and its CEO or associated shareholder lawsuits.

We understand you have received the necessary permission and will keep your financial advisors and deal counsel fully informed on the status of all litigation and governmental investigations involving the recent tweets and production issues as well as any shareholder or other material litigation.

As we have previously discussed, you understand that we will neither advise nor participate in any capital raises, rollovers or restructuring, debt or equity, unless we believe appropriate disclosure and timely disclosure has been made.

We agree to a working arrangement whereby

- You will keep the special committee fully apprised of your work and to abide by their requests
- All future tweets and public communications will be pre-cleared with your legal and financial advisors.
- Our name will not be used without our consent.

You understand that our ongoing involvement with the you and the consortium is based on this understanding.

About this email: Goldman Sachs sets out the understanding on which it will advise Musk on taking Tesla private: disclosure of its derivative positions, indemnification, and a working arrangement under which all his future tweets and public communications are pre-cleared with advisers.

Notes: Email to Musk, included because he replied 'Agreed'. Wording such as 'p+I consequences' and 'with the you' is as transcribed from the exhibit.

Management changes; 'most amazing quarter in our history'

From: Elon Musk

Date: September 7, 2018

To: All Tesla employees

Subject: Company Update

FULL TEXT • COMPANY-WIDE MEMO • PUBLISHED BY MUSK • CONFIRMED

First, I'd like to thank you for your incredible efforts and contribution as we enter the final few weeks of this quarter. This is a very exciting time for Tesla, to say the least, and you are the reason for the tremendous progress we've made in a relatively short period of time. It is easy to forget that our company was almost unknown 10 years ago and didn't even exist until after the start of the 21st century!

We are about to have the most amazing quarter in our history, building and delivering more than twice as many cars as we did last quarter. For a while, there will be a lot of fuss and noise in the media. Just ignore them. Results are what matter and we are creating the most mind-blowing growth in the history of the automotive industry. Even the Ford Model T, which held the world record for the fastest growing car in history,

didn't grow as fast in sales or production as the Model 3.

Moreover, we also have the most exciting new product lineup of any company in the world. There is the Model Y, the Tesla (pickup) Truck, the Semi and the new Roadster. Then there is the Solar Roof, which is spooling up in production, and continued advancements in Powerwall and Powerpack. And that's just what people know about ...

To help achieve our goals, after discussing this in-depth with the Tesla board of directors and executive staff over the past several weeks, I am excited to announce a number of management changes:

Jerome Guillen has been promoted to President, Automotive, reporting directly to me. In his new role, Jerome will oversee all automotive operations and program management, as well as coordinate our extensive automotive supply chain. Jerome has made major contributions and acquired deep knowledge of Tesla's operations over the past eight years at our company, from being the first Model S Program Manager to managing all vehicle programs, then all vehicle engineering and worldwide sales & service. Recently, Jerome played a critical role in ramping Model 3 production, leading what almost all thought was impossible: creation of an entire high-volume General Assembly line for Model 3 in a matter of weeks. Before coming to Tesla, Jerome was responsible for creating and running the most successful semi truck program in history at Daimler's Freightliner division.

Kevin Kassekert has been promoted to VP of People and Places, with responsibility for Human Resources, Facilities, Construction, and Infrastructure Development. Kevin has been with Tesla for 6 years and was previously VP, Infrastructure Development. Kevin led the construction and development of our Gigafactory in Nevada, turning what was a pile of rocks in the Sierra Nevada mountains into a factory employing 12 thousand people with greater output than the entire rest of the world's battery factories combined, in roughly three years. That is insanely badass. Prior to joining Tesla, Kevin engineered and built multi-billion dollar production plants in the semiconductor industry. As many of you know, Tesla's Chief People Officer Gaby Toledano has been on leave for a few months to spend more time with her family and has decided to continue doing so for personal reasons. She's been amazing and I'm very grateful for everything she's done for Tesla.

Chris Lister joined Tesla last year and was key to solving our production problems at the Gigafactory and ramping Model 3 production. He is being promoted to VP, Gigafactory Operations. In this role, he leads our production and manufacturing engineering at Giga. Before Tesla, Chris ran several ultra high volume factories at PepsiCo.

Felicia Mayo, Sr. HR Director and head of our Diversity and Inclusion program, has been promoted to VP, reporting to both Kevin and me. Felicia has done great work promoting the importance of having one of the most diverse workforces in the world and ensuring fairness across hundreds of roles and Tesla operations in over 50 countries. She previously worked in senior HR roles at PwC and Oracle, and, most recently was Vice President, Global Talent Acquisition and Diversity for Juniper Networks.

Laurie Shelby, Tesla's VP, Environmental, Health and Safety (EHS) will also report directly to me. Your safety and just generally making sure that you love coming to work is extremely important, which is why EHS will report directly to me. We are working hardcore on having the safest (and most fun) work environment in the automotive industry by far. Laurie came to Tesla last year after a 25+ year career at Alcoa, where she made tremendous progress in workplace safety. Since joining, she has already overseen a reduction in our employee injury rate, as well as major improvements in our EHS program.

Cindy Nicola, VP of Global Recruiting, will report to both Kevin and me. Cindy has overseen the company's global recruiting efforts since 2015, bringing on tens of thousands of highly talented people. Prior to Tesla, Cindy led worldwide Corporate Recruiting at Apple, and before that was VP, Global Talent Acquisition at Electronic Arts.

Finally, Dave Arnold has been promoted to Sr. Director, Global Communications, overseeing Tesla's communications team. Dave was previously Director of Corporate Communications at Virgin America.

Thanks again for your incredible work in making Tesla successful. What you are doing is vital to achieving an amazing and sustainable energy future for all of humanity and life on Earth.

Elon

About this email: Hours after his Joe Rogan appearance and the resignation of two executives, Musk tells staff to ignore media 'fuss and noise', predicts a record quarter, and announces promotions including Jerome Guillen to President, Automotive.

Notes: Tesla posted the email on its own blog on Sept 7, 2018. The subject line 'Company Update' is the blog post title; the actual email subject was not published.

'Very close to achieving profitability' - go all out Sunday

From: Elon Musk

Date: September 29, 2018 (Sent Saturday Sept 29 (it refers to 'tomorrow (Sunday)'); Tesla filed it with the SEC as an 8-K exhibit dated September 30, 2018)

To: All employees of Tesla, Inc.

FULL TEXT · COMPANY-WIDE MEMO · PUBLISHED BY MUSK · CONFIRMED

We are very close to achieving profitability and proving the naysayers wrong, but, to be certain, we must execute really well tomorrow (Sunday).

If we go all out tomorrow, we will achieve an epic victory beyond all expectations.

Go Tesla!!!

Thanks for all your hard work,
Elon

About this email: Musk tells employees Tesla is very close to profitability and asks for an all-out final day of Q3 2018; Tesla filed the email with the SEC.

Notes: Tesla itself filed the email as Exhibit 99.1 to a Form 8-K ('email to all employees of Tesla, Inc.'). Exact send date inferred from the text; CNBC describes it as sent over the weekend.

Push for 1,000 Model 3s a day by Nov 28

From: Elon Musk

Date: November 15, 2018 (Bloomberg describes it as sent Thursday (Nov 15, 2018), the day Electrek reported it)

To: All Tesla employees

EXCERPT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

By the 28th, all Model 3 production subsystems need to be at 50+ UPH steady, which is what's needed for a true 1000 vehicles per day rate (taking equipment uptime into account). To be clear, this includes all lines for a particular subsystem, so, for example, general assembly UPH would include both GA3 lines plus GA4.

[...]

If you can't see a way to get there, please let me know as soon as possible, so that I can help solve for this outcome. This is extremely important for our prosperity.

About this email: Musk sets a deadline of November 28, 2018 for every Model 3 production subsystem to run steadily at 50+ units per hour, the rate needed for a true 1,000 cars a day (7,000 a week).

Notes: Only excerpts were published: the first passage via Electrek/BGR, the second via Bloomberg. 'subsystems' typo as quoted.

1,000 Model 3s a day and the 'game of pennies'

From: Elon Musk

Date: November 30, 2018 (Electrek describes it as sent to employees on November 30, 2018)

To: All Tesla employees

PARTIAL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · SINGLE-SOURCE

If you are able to help in any way with getting Model 3 production to a steady 1000 per day at excellent quality, everyone at the company should please consider this their top priority. Body production currently appears to be our limiting factor, so it needs the most support right now. Please focus on simplification and reducing cycle time first and then uptime.

[...]

It's important to bear in mind that the cost of the car is made up of about 10,000 unique parts and processes. depending on how you count it, the current cost of a standard range Model 3 would be around \$38,000, so each part or process step only costs around \$3.80. That means finding cost efficiencies is a game of pennies, even though it might not seem so.

About this email: Musk asks everyone to make a steady 1,000 Model 3s per day at excellent quality their top priority, names body production as the bottleneck, and explains that with about 10,000 parts and processes in a roughly \$38,000 car, cost reduction is 'a game of pennies'.

Notes: Two passages as quoted by Electrek; the rest of the email was not published. The lower-case 'depending' after a full stop is as published.

Sources: [Electrek](#); [Electrek \(earlier Nov 2018 email\)](#)

7% layoff: 'the road ahead is very difficult'

From: Elon Musk

Date: January 18, 2019

To: All Tesla employees

Subject: Company Update

FULL TEXT · COMPANY-WIDE MEMO · PUBLISHED BY MUSK · CONFIRMED

As we all experienced first-hand, last year was the most challenging in Tesla's history. However, thanks to your efforts, 2018 was also the most successful year in Tesla's history: we delivered almost as many cars as we did in all of 2017 in the last quarter alone and nearly as many cars last year as we did in all the prior years of Tesla's existence combined! Model 3 also became the best-selling premium vehicle of 2018 in the US. This is truly remarkable and something that few thought possible just a short time ago.

Looking ahead at our mission of accelerating the advent of sustainable transport and energy, which is important for all life on Earth, we face an extremely difficult challenge: making our cars, batteries and solar products cost-competitive with fossil fuels. While we have made great progress, our products are still too expensive for most people. Tesla has only been producing cars for about a decade and we're up against massive, entrenched competitors. The net effect is that Tesla must work much harder than other manufacturers to survive while building affordable, sustainable products.

In Q3 last year, we were able to make a 4% profit. While small by most standards, I would still consider this our first meaningful profit in the 15 years since we created Tesla. However, that was in part the result of preferentially selling higher priced Model 3 variants in North America. In Q4, preliminary, unaudited results indicate that we again made a GAAP profit, but less than Q3. This quarter, as with Q3, shipment of higher priced Model 3 variants (this time to Europe and Asia) will hopefully allow us, with great difficulty, effort and some luck, to target a tiny profit.

However, starting around May, we will need to deliver at least the mid-range Model 3 variant in all markets, as we need to reach more customers who can afford our vehicles. Moreover, we need to continue making progress towards lower priced variants of Model 3. Right now, our most affordable offering is the mid-range (264 mile) Model 3 with premium sound and interior at \$44k. The need for a lower priced variants of Model 3 becomes even greater on July 1, when the US tax credit again drops in half, making our car \$1,875 more expensive, and again at the end of the year when it goes away entirely.

Sorry for all these numbers, but I want to make sure that you know all the facts and figures and understand that the road ahead is very difficult. This is not new for us - we have always faced significant challenges - but it is the reality we face. There are many companies that can offer a better work-life balance, because they are larger and more mature or in industries that are not so voraciously competitive. Attempting to build affordable clean energy products at scale necessarily requires extreme effort and

relentless creativity, but succeeding in our mission is essential to ensure that the future is good, so we must do everything we can to advance the cause.

As a result of the above, we unfortunately have no choice but to reduce full-time employee headcount by approximately 7% (we grew by 30% last year, which is more than we can support) and retain only the most critical temps and contractors. Tesla will need to make these cuts while increasing the Model 3 production rate and making many manufacturing engineering improvements in the coming months. Higher volume and manufacturing design improvements are crucial for Tesla to achieve the economies of scale required to manufacture the standard range (220 mile), standard interior Model 3 at \$35k and still be a viable company. There isn't any other way.

To those departing, thank you for everything you have done to advance our mission. I am deeply grateful for your contributions to Tesla. We would not be where we are today without you.

For those remaining, although there are many challenges ahead, I believe we have the most exciting product roadmap of any consumer product company in the world. Full self-driving, Model Y, Semi, Truck and Roadster on the vehicle side and Powerwall/pack and Solar Roof on the energy side are only the start.

I am honored to work alongside you.

Thanks for everything,

Elon

About this email: Musk announces a roughly 7% cut in full-time headcount, explaining that Tesla must make cheaper Model 3 variants while tax credits fall, and that Q4 2018 profit was lower than Q3.

Notes: Tesla published the email on its blog ('This morning, the following email was sent to all Tesla employees'). The tesla.com page returned 403 in this session; text taken from Electrek's reproduction. Subject shown is the blog post title.

\$35,000 Model 3 and shift to online-only sales

From: Elon Musk

Date: February 28, 2019

To: All Tesla employees

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Last month, I noted in my email that the fundamental issue Tesla must overcome is that our products remain too expensive for most people. We know there are many people who want to buy Model 3, but simply can't afford to do so.

That is why we're excited to announce today that we are now offering the standard Model 3 at \$35,000. This is a significant milestone for Tesla, the culmination of years of hard work by employees across the company, and something of which you should all be very proud. You can read the details of the announcement on our blog: [LINK HERE](#)

In addition, we are also making the decision to shift all sales worldwide to online only.

Last year, 78% of all Model 3 orders were placed online, rather than in a store, and 82% of customers bought their Model 3 without ever having taken a test drive. Customers can now buy a Tesla in North America via their phone in about 1 minute, and that capability will soon be extended worldwide. We are also making it much easier to try out and return a Tesla without a test drive. You can now return a car within 7 days or 1,000 miles for a full refund. Customers are becoming increasingly comfortable making purchases online, and that is especially true for Tesla — which is a testament to the products we make.

As a result, over the next few months, we will be winding down many of our stores and significantly reducing our spend on sales and marketing, which will help make the price changes we've announced today possible. Shifting all sales online combined with other ongoing cost efficiency will enable us to lower all vehicle prices by about 6% on average, allowing us to achieve the \$35,000 Model 3 price point.

A small number of stores in high-traffic locations will remain as galleries, showcases and Tesla information centers. At the same time, we will be increasing our investment in the Tesla service system and manufacturing, and I expect that headcount to grow next year.

Unfortunately, this means that some jobs will be impacted or transitioned to other areas of the business. This is a hard decision, but it necessary to make our cars more affordable. Our sales team has fought on the front lines of advancing our mission and has been our connection to hundreds of thousands of customers along the way. I want to express my sincere gratitude for all that you've done.

Kn the coming weeks, we will be evaluating all of our sales and marketing organization to understand where there are operation efficiencies, and how best to support the transition to online sales while also continuing to deliver a truly awesome and education Tesla buying experience.

We'll be sharing more information on this transition soon.

Thank you,
Elon

About this email: Musk tells employees Tesla is launching the \$35,000 Model 3, moving all sales online worldwide, winding down many stores and cutting sales and marketing spend, which will affect some jobs.

Notes: Typos ('Kn the coming weeks', 'it necessary', 'education Tesla buying experience') and the 'LINK HERE' placeholder are as published by CNBC.

All hands on deliveries for last ten days of Q1 2019

From: Elon Musk

Date: March 21, 2019

To: Everybody (all Tesla employees)

Subject: Vehicle Delivery Help Needed!

FULL TEXT • COMPANY-WIDE MEMO • LEAKED TO PRESS • WIDELY REPORTED

For the last ten days of this quarter, please consider your primary priority to be helping with vehicle deliveries. This applies to everyone. As challenges go, this is a good one to have, as we've built the cars and people have bought the cars, so we just need to get the cars to their new owners!

What has made this particularly difficult is that Europe and China are simultaneously experiencing the same massive increase in delivery volume that North America experienced last year. In some locations, the delivery rate is over 600% higher than its previous peak! This was further exacerbated by supplier shortages of EU spec components and a sticker printing error on our part in China that were only resolved in the past few weeks.

North America is also stressed, as the final month of this quarter is almost all North America builds. Moreover, for the first two weeks of March, most cars were sent from our factory in California to the East Coast to ensure arrival before the end of quarter.

The net result is a massive wave of deliveries needed throughout Europe, China and North America. This is the biggest wave in Tesla's history, but it is primarily a function of our first delivery of mass manufactured cars on two continents simultaneously, and will not be repeated in subsequent quarters.

To help, please contact Sanjay Shah in North America, Robin Ren in China and Ashley Harris in Europe.

About this email: Musk asks every employee to treat helping with vehicle deliveries as their primary priority for the final ten days of Q1 2019, citing the first simultaneous delivery wave in Europe, China and North America.

Notes: First reported by Business Insider. No sign-off appears in the text as published by CNBC.

Clarifying store closures: 'seeds on barren ground'

From: Elon Musk

Date: March 27, 2019 (Date of Electrek's publication; sent that week)

To: Tesla employees

FULL TEXT • COMPANY-WIDE MEMO • LEAKED TO PRESS • WIDELY REPORTED

There still some uncertainty around Tesla stores and the sales team. Hopefully, this note clears things up. Please let me know if there's anything I've forgotten to address.

– Stores with a high visitation rate and that lead to significant sales will absolutely not be closed down. It would not make any sense to do so, except in rare cases where the

rent is absurdly high. Moreover, Tesla will continue to open stores throughout the world that meet the above criteria.

- Stores that are in a location with low visitation rates (ie empty most of their opening hours) and lead to low sales will gradually be closed down. This is analogous to seeds on barren ground. There is no reasonable way to justify keeping such stores open.
- Stores that are somewhere in the middle will be evaluated over time to see there is some way to allow them to cover their costs. If there is, they will remain open, otherwise not. However, these stores will be given a fair opportunity to prove their case.

The above principles also apply to the sales team. No one who is a major contributor to demand generation will be let go. That would make no sense. However, sometimes, in a company with 45,000 people, things happen that make no sense. I will do my best to remedy issues when brought to my attention directly or through [redacted email address].

What is meant by "all sales will be online" is just that the act of purchasing a Tesla will always be done via the potential new owner's phone or computer. This is true whether they are at home or in a store. Unlike buying from other carmakers, ordering a Tesla doesn't require any physical paperwork.

This is very different from normal expectations for buying from other carmakers and is simply meant to emphasize that ordering a Tesla is super easy and can be done in 2 minutes from your phone or laptop at Tesla.com. Ordering a Tesla is not much harder than ordering an Uber, but hardly anyone knows this!

However, many potential Tesla owners will still want to talk to a Tesla representative in person or want a test drive from a Tesla representative. Stores also have a small number of Tesla vehicles available to drive away immediately for customers that want a car right then and there.

This is why stores and Tesla product specialists and owner advisors will always be of critical importance to our long term success.

Thanks,

Elon

About this email: Musk clarifies the store-closure plan: high-traffic stores stay open, empty ones close gradually, and 'all sales online' only means the purchase itself is made on a phone or computer.

Notes: Internal email address redacted by Electrek. 'There still some uncertainty' is as published.

50,000 net new orders; record quarter within reach

From: Elon Musk

Date: May 22, 2019 (Header as published: Wed 5/22/2019 10:45 PM)

To: Everybody (all Tesla employees)

Subject: Exciting Goal!

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

As of yesterday, we had over 50,000 net new orders for this quarter. Based on current trends, we have a good chance of exceeding the record 90,700 deliveries of Q4 last year and making this the highest deliveries/sales quarter in Tesla history!

In order to achieve this, we need sustained output of 1,000 Model 3's per day. Almost all parts of the Model 3 production system have exceeded 1000 units on multiple days (congratulations!!) and we've averaged about 900/day this week, so we're only about 10% away from 7000/week.

If we rally hard, we can do it!

Thanks for your great work,
Elon

About this email: Musk tells employees Tesla has over 50,000 net new orders in Q2 2019 and could beat its 90,700 delivery record if Model 3 output is sustained at 1,000 a day.

Notes: First obtained by Electrek.

Coronavirus: 'panic far exceeds' harm of the virus

From: Elon Musk

Date: March 16, 2020 (Reported March 17, 2020; sent the previous evening)

To: All Tesla employees

PARTIAL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

First, I'd like to be super clear that if you feel the slightest bit ill or even uncomfortable, please don't feel obligated to come to work. I will personally be at work, but that is just me. Totally OK if you want to stay home for any reason.

A lot of rumors are flying around, but, to the best of our knowledge, no one at Tesla (over 56,000 people) has tested positive for COVID-19. I will inform you immediately if anything changes.

My frank opinion remains that the harm from the coronavirus panic far exceeds that of the virus itself. If there is a massive redirection of medical resources out of proportion to the danger, it will result in less available care to those with critical medical needs, which does not serve the greater good.

What the COVID-19 coverage does show is that the danger of colds and flu in general can be high for the elderly, especially if there is prior lung damage. Much is made of public gatherings, but please be cautious of family gatherings, too. What is relatively harmless to a child can be dangerous to grandparents.

My best guess, for what it is worth, based on the latest Center for Disease Control data, is that confirmed COVID-19 (this specific form of the common cold) cases will not exceed 0.1% of the US population. Moreover, I do not think, when we look back on 2020, that the causes of death or serious injury will have changed much from 2017, for example...

[...]

not feel obligated to come to work if they have any concern

About this email: As Bay Area shelter-in-place orders took effect, Musk tells staff they need not come to work if ill or uncomfortable, says no Tesla employee has tested positive, and argues the harm from coronavirus panic exceeds that of the virus.

Notes: REPLACES: 2020-03-16 Coronavirus: 'panic far exceeds' harm of the virus. Adds the closing fragment Electrek quotes from the end of the email. Electrek printed the bulk of the email in block quotes; the fifth passage is cut off with an ellipsis as published, and Electrek says Musk then reiterated that employees should 'not feel obligated to come to work if they have any concern' (last fragment below). The sign-off was not reproduced.

Model Y ramp is top priority; 'minimize rectification'

From: Elon Musk

Date: June 2020 (Reported by Electrek on June 8, 2020; sent shortly before)

To: Tesla production employees

Subject: Model Y production

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

It is extremely important for us to ramp up Model Y production and minimize rectification needs. I want you to know that it really makes a difference to Tesla right now.

Model Y, especially GA (stands for General Assembly), is the top priority for both production and manufacturing engineering. GA4 (stands for General Assembly Line 4) is also top priority for facility improvements. For those working in GA4, thank you for bearing with tough conditions. Will get better fast. I will be walking the line personally every week.

We are doing reasonably well with S, X, and 3, but there are production and supply chain ramp challenges with Model Y, as is always the case with new products.

Please let me know if there's anything I can do to help.

Thanks,

Elon

About this email: Musk tells production staff that ramping Model Y and minimizing rework is the top priority for production and manufacturing engineering, acknowledges tough conditions on the GA4 line, and says he will walk the line weekly.

Notes: The parentheticals '(stands for General Assembly)' and '(stands for General Assembly Line 4)' appear in Electrek's published text and are probably the outlet's explanatory insertions rather than Musk's words.

Stock could be 'crushed like a soufflé under a sledgehammer'

From: Elon Musk

Date: December 1, 2020

To: All Tesla employees

FULL TEXT • COMPANY-WIDE MEMO • LEAKED TO PRESS • WIDELY REPORTED

At a time like this, when our stock is reaching new highs, it may seem as though spending carefully is not as important. This is definitely not true.

When looking at our actual profitability, it is very low at around 1% for the past year. Investors are giving us a lot of credit for future profits, but if, at any point, they conclude that's not going to happen, our stock will immediately get crushed like a soufflé under a sledgehammer!

Much more important, in order to make our cars affordable, we have to get smarter about how we spend money. This a tough Game of Pennies – requiring thousands of good ideas to improve part cost, a factory process or simply the design, while increasing quality and capabilities. A great idea would be on that saves \$5, but the vast majority are 50 cents here or 20 cents there.

In order to make the electric revolution happen we much make electric cars, stationary batteries and solar affordable to all.

Thanks and great working with you as always,
Elon

About this email: With Tesla's stock at record highs, Musk warns employees that profitability is only about 1% and that investors will crush the stock if they lose faith in future profits, urging a 'Game of Pennies' on costs.

Notes: Also reported by CNBC and Reuters. Typos ('This a tough', 'would be on that saves', 'we much make') are as published by Electrek.

Sources: [Electrek](#)

Tags: cost-cutting, stock-price, profitability, affordability

'High-class problem': demand exceeds production

From: Elon Musk

Date: December 11, 2020 (Date of Electrek's report; sent that week)

To: All Tesla employees

FULL TEXT • COMPANY-WIDE MEMO • LEAKED TO PRESS • SINGLE-SOURCE

We are fortunate to have a high-class problem of demand being quite a bit higher than production this quarter.

To ensure that we have the best possible outcome and earn the trust of the customers and investors who have placed their faith and hard-earned money with us, we need to increase production for the remainder of this quarter as much as possible.

I would only send this note if it really mattered.

Super Appreciated,,
Elon

Btw, please send me a note directly if you see ways to improve output, but feel that your voice is not being heard.

About this email: Musk tells employees demand is well above production in Q4 2020 and asks them to increase output as much as possible for the rest of the quarter.

Notes: Double comma in 'Super Appreciated,,,' is as published.

Q2 2021: 'the next 12 days are super important'

From: Elon Musk

Date: June 18, 2021 (Date of Electrek's report; the email speaks of 'the next 12 days' of the quarter)

To: Tesla employees

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · SINGLE-SOURCE

Overall, we are executing well, but the next 12 days are super important for production and delivery this quarter. Please go all out!

Thanks,
Elon

About this email: A two-line end-of-quarter rallying email asking Tesla staff to go all out on production and delivery for the last 12 days of Q2 2021.

Notes: Text as reproduced by Electrek; subject line and exact send time not published.

Q3 2021: 'biggest wave in Tesla history'

From: Elon Musk

Date: September 8, 2021

To: All Tesla employees

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

The end of the quarter delivery wave is unusually high this time as we suffered (like the rest of the industry) from extremely severe parts shortages earlier this quarter. This meant building a lot of cars with missing parts that needed to be added later. I'd like to thank all Tesla techs and contractors that helped add back the missing parts, often in very difficult conditions. You rock!

And we are for sure dying to reduce the size of the end-of-the-quarter delivery wave! The goal is to do so in Q4 (allowing some Q4 production to spill over to delivery in Q1). However, early Q3 production was so challenging that we need to go super hardcore to make up for it over the next ~22 days to ensure a decent Q3 delivery number. This is the biggest wave in Tesla history, but we got to get it done.

Much appreciated,
Elon

About this email: Musk explains that severe parts shortages early in Q3 2021 left many cars needing parts added later, creating an unusually large end-of-quarter delivery wave, and asks staff to go 'super hardcore' for the remaining 22 days.

Notes: Also reported by CNBC.

Three actions allowed when Musk sends explicit directions

From: Elon Musk

Date: October 4, 2021 (Date from the email header)

To: Everybody (all Tesla employees)

Subject: Please Note

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

If an email is sent from me with explicit directions, there are only three actions allowed by managers.

1. Email me back to explain why what I said was incorrect. Sometimes, I'm just plain wrong!
2. Request further clarification if what I said was ambiguous.
3. Execute the directions.

If none of the above are done, that manager will be asked to resign immediately.

Thank you,
Elon

About this email: Musk tells Tesla managers that an email from him with explicit directions leaves three options: explain why he is wrong, ask for clarification, or execute. Managers who do none of these will be asked to resign.

Notes: Text transcribed from the image of the email in the X post that prompted this archive. The email was first reported by CNBC in November 2021; that article could not be retrieved for this archive, so the wording rests on the posted image.

Minimize delivery cost, not the end-of-quarter rush

From: Elon Musk

Date: November 26, 2021 (Header as published: Nov. 26, 2021 [time stamp redacted])

To: Everybody (all Tesla employees)

Subject: Q4 deliveries vs. cost efficiency

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Per my email several weeks ago, our focus this quarter should be on minimizing cost of deliveries rather than spending heavily on expedite fees, overtime and temporary contractors just so that cars arrive in Q4.

What has happened historically is that we sprint like crazy at end of quarter to maximize deliveries, but then deliveries drop massively in the first few weeks of the next quarter. In effect, looked at over a six month period, we won't have delivered any extra cars but we will have spent a lot of money and burned ourselves out to accelerate deliveries in the last two weeks of each quarter.

We will still have quite a big wave of deliveries in the last few weeks of December, as we don't yet have high volume production either in Europe or Texas, which means a lot of cars on boats from China to Europe and on trucks [and/or] rail from California to the East Coast arriving late in the quarter, but this is nonetheless the right time to start reducing the size of the wave in favor of a steadier and more efficient pace of deliveries.

The right principle is take the most efficient action, as though we were not publicly-traded and the notion of "end of quarter" didn't exist.

Thanks,
Elon

About this email: Musk tells employees to stop spending heavily on expedite fees, overtime and temporary contractors just to land cars in Q4, arguing the end-of-quarter sprint adds no deliveries over six months, and to act as if Tesla were not publicly traded.

Notes: First published by CNBC; body text retrieved from Electrek's reproduction, and the header (From/To/Subject/Date) confirmed on the CNBC page. The word 'cost' in the first sentence is emphasized in the published version. '[and/or]' and the redacted time stamp are as published. The email refers to an earlier 'email several weeks ago' on the same subject, whose text was not found.

'Remote work is no longer acceptable'

From: Elon Musk

Date: May 31, 2022

To: Tesla executive staff (per press reports)

Subject: Remote work is no longer acceptable

FULL TEXT · EXECUTIVE & INTERNAL · LEAKED TO PRESS · CONFIRMED

Anyone who wishes to do remote work must be in the office for a minimum (and I mean *minimum*) of 40 hours per week or depart Tesla. This is less than we ask of factory workers.

If there are particularly exceptional contributors for whom this is impossible, I will review and approve those exceptions directly.

Moreover, the "office" must be a main Tesla office, not a remote branch office unrelated to the job duties, for example being responsible for Fremont factory human relations, but having your office be in another state.

Thanks,
Elon

About this email: Musk tells Tesla staff that anyone wishing to work remotely must first be in a main Tesla office at least 40 hours a week or leave the company, with exceptions approved only by him.

Notes: The subject line's typo ('acceptble') is in the original. The email leaked on Twitter and Musk effectively confirmed it there ('They should pretend to work somewhere else'). Bloomberg and others reported it was addressed to executive staff ('ExecStaff'); the recipient line is not shown in the text retrieved.

Sources: [Electrek](#)

Tags: remote-work, return-to-office, policy

'To be super clear': 40 hours in the office or resign

From: Elon Musk

Date: May 31, 2022

To: All Tesla employees

Subject: To be super clear

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · CONFIRMED

Everyone at Tesla is required to spend a minimum of 40 hours in the office per week. Moreover, the office must be where your actual colleagues are located, not some remote pseudo office. If you don't show up, we will assume you have resigned.

The more senior you are, the more visible must be your presence. That is why I lived in the factory so much – so that those on the line could see me working alongside them. If I had not done that, Tesla would long ago have gone bankrupt.

There are of course companies that don't require this, but when was the last time they shipped a great new product? It's been a while.

Tesla has and will create and actually manufacture the most exciting and meaningful products of any company on Earth. This will not happen by phoning it in.

Thanks,
Elon

About this email: Follow-up to all staff: everyone must spend at least 40 hours a week in the office where their colleagues are, or be assumed to have resigned; Musk says he lived in the factory so workers could see him.

Notes: Second of two emails sent the same day; widely reported (Bloomberg, CNBC, The Verge).

'Very tough quarter' - rally hard to recover

From: Elon Musk

Date: June 11, 2022 (Sent the weekend of June 11-12, 2022 (reported June 12))

To: All Tesla employees

Subject: Production and Delivery

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

This has been a very tough quarter, primarily due to supply chain and production challenges in China, so we need to rally hard to recover!

I'd like to congratulate the Fremont team for achieving a new all-time record production day last week and Berlin for making almost 1000 cars last week! This is great stuff.

Shanghai is returning to full strength and Austin is spooling up. Onward to victory!

Elon

About this email: Musk says Q2 2022 has been very tough because of supply-chain and production problems in China, congratulates Fremont and Berlin on production records, and urges staff to rally.

Sources: [Electrek](#)

Tags: production, shanghai, supply-chain, q2-2022

Don't be bothered by 'stock market craziness'

From: Elon Musk

Date: December 28, 2022

To: All Tesla employees

PARTIAL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Please go all out for the next few days and volunteer to help deliver if at all possible. It will make a real difference!

[...]

Btw, don't be too bothered by stock market craziness. As we demonstrate continued excellent performance, the market will recognize that.

About this email: With Tesla shares down nearly 70% for the year, Musk tells employees not to be bothered by the stock market and asks them to volunteer to help deliver cars in the last days of 2022.

Notes: Also reported by CNBC and Reuters, which quoted additional lines (e.g. his belief that Tesla will long-term be the most valuable company on Earth); only the two passages below were retrieved verbatim in this session, and their order in the email is not certain.

Cybertruck parts to 'sub 10 micron accuracy'

From: Elon Musk

Date: August 23, 2023 (Date of Electrek's report; sent that week)

To: Tesla employees

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Due to the nature of Cybertruck, which is made of bright metal with mostly straight edges, any dimensional variation shows up like a sore thumb. All parts for this vehicle, whether internal or from suppliers, need to be designed and built to sub 10 micron accuracy. That means all part dimensions need to be to the third decimal place in millimeters and tolerances need be specified in single digit microns. If LEGO and soda cans, which are very low cost, can do this, so can we. Precision predicates perfectionism.

About this email: Musk tells employees every Cybertruck part must be designed and built to sub-10-micron accuracy because the truck's flat metal panels expose any variation: 'If LEGO and soda cans ... can do this, so can we.'

Notes: The email first surfaced on the Cybertruck Owners Club forum. Text as published by Electrek, with no greeting or sign-off shown; 'tolerances need be specified' is as published.

Layoff of more than 10% of global workforce

From: Elon Musk

Date: April 14, 2024 (Sent late Sunday April 14, 2024 (reported April 15))

To: All Tesla employees

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Over the years, we have grown rapidly with multiple factories scaling around the globe. With this rapid growth there has been duplication of roles and job functions in certain areas. As we prepare the company for our next phase of growth, it is extremely important to look at every aspect of the company for cost reductions and increasing productivity.

As part of this effort, we have done a thorough review of the organization and made the difficult decision to reduce our headcount by more than 10% globally. There is nothing I hate more, but it must be done. This will enable us to be lean, innovative and hungry for

the next growth phase cycle.

I would like to thank everyone who is departing Tesla for their hard work over the years. I'm deeply grateful for your many contributions to our mission and we wish you well in your future opportunities. It is very difficult to say goodbye.

For those remaining, I would like to thank you in advance for the difficult job that remains ahead. We are developing some of the most revolutionary technologies in auto, energy and artificial intelligence. As we prepare the company for the next phase of growth, your resolve will make a huge difference in getting us there.

Thanks,
Elon

About this email: Musk announces Tesla is cutting more than 10% of its global headcount after a review found duplicated roles, saying 'There is nothing I hate more, but it must be done.'

Notes: Also reported by Reuters, CNBC and Bloomberg.

Sources: [Electrek](#)

Plan Going Forward: 'I will never give up' after Falcon 1 Flight 3

From: Elon Musk

Date: August 2, 2008 (Header as published by NASA Watch: Sent Saturday, August 02, 2008 9:45 PM)

To: Space Exploration Technologies (all-company list)

Subject: Plan Going Forward

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · CONFIRMED

From: Elon Musk

Sent: Saturday, August 02, 2008 9:45 PM

To: Space Exploration Technologies

Subject: Plan Going Forward

It was obviously a big disappointment not to reach orbit on this flight. On the plus side, the flight of our first stage, with the new Merlin 1C engine that will be used in Falcon 9, was picture perfect. Unfortunately, a problem occurred with stage separation, causing the stages to be held together. This is under investigation and I will send out a note as soon as we understand exactly what happened.

The most important message I'd like to send right now is that SpaceX will not skip a beat in execution going forward. We have flight four of Falcon 1 almost ready for flight and flight five right behind that. I have also given the go ahead to begin fabrication of flight six. Falcon 9 development will also continue unabated, taking into account the lessons learned with Falcon 1. We have made great progress this past week with the successful nine engine firing.

As a precautionary measure to guard against the possibility of flight 3 not reaching orbit, SpaceX recently accepted a significant investment. Combined with our existing cash reserves, that ensures we will have more than sufficient funding on hand to continue launching Falcon 1 and develop Falcon 9 and Dragon. There should be absolutely zero question that SpaceX will prevail in reaching orbit and demonstrating reliable space transport. For my part, I will never give up and I mean never.

Thanks for your hard work and now on to flight four.

Elon

About this email: Hours after the third Falcon 1 failed to reach orbit because of a stage-separation problem, Musk emailed the whole company that SpaceX would not skip a beat, that flights four and five were nearly ready and flight six approved, and that a recent investment guaranteed funding. He vowed never to give up.

Notes: REPLACES: 2008-08-02 Falcon 1 Flight 3 failure: 'I will never give up'. NASA Watch reproduces the message with its email header (From/Sent/To/Subject), which settles that it was an all-company email with the

subject 'Plan Going Forward'; the first-pass entry lacked the header and flagged the medium as uncertain. Sign-off is 'Elon' on NASA Watch ('--Elon--' in Universe Today's copy). The same text was also released to media by SpaceX.

Acronyms Seriously Suck

From: Elon Musk

Date: May 2010 (Ashlee Vance dates the email to May 2010; exact day not given)

To: All SpaceX employees

Subject: Acronyms Seriously Suck

FULL TEXT · COMPANY-WIDE MEMO · BOOK/BIOGRAPHY · CONFIRMED

There is a creeping tendency to use made up acronyms at SpaceX. Excessive use of made up acronyms is a significant impediment to communication and keeping communication good as we grow is incredibly important. Individually, a few acronyms here and there may not seem so bad, but if a thousand people are making these up, over time the result will be a huge glossary that we have to issue to new employees. No one can actually remember all these acronyms and people don't want to seem dumb in a meeting, so they just sit there in ignorance. This is particularly tough on new employees. That needs to stop immediately or I will take drastic action—I have given enough warnings over the years. Unless an acronym is approved by me, it should not enter the SpaceX glossary. If there is an existing acronym that cannot reasonably be justified, it should be eliminated, as I have requested in the past. For example, there should be no "HTS" [horizontal test stand] or "VTS" [vertical test stand] designations for test stands. Those are particularly dumb, as they contain unnecessary words. A "stand" at our test site is obviously a *test* stand. VTS-3 is four syllables compared with "Tripod," which is two, so the bloody acronym version actually takes longer to say than the name! The key test for an acronym is to ask whether it helps or hurts communication. An acronym that most engineers outside of SpaceX already know, such as GUI, is fine to use. It is also ok to make up a few acronyms/contractions every now and again, assuming I have approved them, eg MVac and M9 instead of Merlin 1C-Vacuum or Merlin 1C-Sea Level, but those need to be kept to a minimum.

About this email: Musk bans made-up acronyms at SpaceX unless he personally approves them, arguing that they impede communication and leave new employees sitting in ignorance during meetings. He singles out 'HTS' and 'VTS' test-stand names as especially dumb.

Notes: Text as printed in Vance's biography (bracketed glosses are Vance's). The Goodreads transcription runs the email as one block, so original paragraph breaks are not preserved. Musk later confirmed the email on Twitter.

Why SpaceX won't go public until Mars transport is flying

From: Elon Musk

Date: June 7, 2013 (Header as published: June 7, 2013, 12:43:06 AM PDT)

To: All (spacex-employees@spacex.com)

Subject: Going Public

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Per my recent comments, I am increasingly concerned about SpaceX going public before the Mars transport system is in place. Creating the technology needed to establish life on Mars is and always has been the fundamental goal of SpaceX. If being a public company diminishes that likelihood, then we should not do so until Mars is secure. This is something that I am open to reconsidering, but, given my experiences with Tesla and SolarCity, I am hesitant to foist being public on SpaceX, especially given the long term nature of our mission.

Some at SpaceX who have not been through a public company experience may think that being public is desirable. This is not so. Public company stocks, particularly if big step changes in technology are involved, go through extreme volatility, both for reasons of internal execution and for reasons that have nothing to do with anything except the economy. This causes people to be distracted by the manic-depressive nature of the stock instead of creating great products.

It is important to emphasize that Tesla and SolarCity are public because they didn't have any choice. Their private capital structure was becoming unwieldy and they needed to raise a lot of equity capital. SolarCity also needed to raise a huge amount of debt at the lowest possible interest rate to fund solar leases. The banks who provide that debt wanted SolarCity to have the additional painful scrutiny that comes with being public. Those rules, referred to as Sarbanes-Oxley, essentially result in a tax being levied on company execution by requiring detailed reporting right down to how your meal is expensed during travel and you can be penalized even for minor mistakes.

YES, BUT I COULD MAKE MORE MONEY IF WE WERE PUBLIC

For those who are under the impression that they are so clever that they can outsmart public market investors and would sell SpaceX stock at the "right time," let me relieve you of any such notion. If you really are better than most hedge fund managers, then there is no need to worry about the value of your SpaceX stock, as you can just invest in other public stocks and make billions of dollars in the market.

If you think: "Ah, but I know what's really going on at SpaceX and that will give me an edge," you are also wrong. Selling public company stock with insider knowledge is illegal. As a result, selling public stock is restricted to narrow time windows a few times per year. Even then, you can be prosecuted for insider trading. At Tesla, we had both an employee and an investor go through a grand jury investigation for selling stock over a year ago, despite them doing everything right in both the letter and the spirit of the law. Not fun.

Another thing that happens to public companies is that you become a target of the trial lawyers who create a class action lawsuit by getting someone to buy a few hundred shares and then pretending to sue the company on behalf of all investors for any drop in the stock price. Tesla is going through that right now even though the stock price is relatively high, because the drop in question occurred last year.

It is also not correct to think that because Tesla and SolarCity share prices are on the lofty side right now, that SpaceX would be too. Public companies are judged on quarterly performance. Just because some companies are doing well, doesn't mean that all would. Both of those companies (Tesla in particular) had great first quarter results. SpaceX did not. In fact, financially speaking, we had an awful first quarter. If we were public, the short sellers would be hitting us over the head with a large stick.

We would also get beaten up every time there was an anomaly on the rocket or spacecraft, as occurred on flight 4 with the engine failure and flight 5 with the Dragon prelaunches. Delaying launch of V1.1, which is now over a year behind schedule, would result in particularly severe punishment, as that is our primary revenue driver. Even something as minor as pushing a launch back a few weeks from one quarter to the next gets you a spanking. Tesla vehicle production in Q4 last year was literally only three weeks behind and yet the market response was brutal.

BEST OF BOTH WORLDS

My goal at SpaceX is to give you the best aspects of a public and private company. When we do a financing round, the stock price is keyed off of approximately what we would be worth if publicly traded, excluding irrational exuberance or depression, but without the pressure and distraction of being under a hot public spotlight. Rather than have the stock up during one liquidity window and down during another, the goal is a steady upward trend and never to let the share price go below the last round. The end result for you (or an investor in SpaceX) financially will be the same as if we were public and you sold a steady amount of stock every year.

In case you are wondering about a specific number, I can say that I'm confident that our long term stock price will be over \$100 if we execute well on Falcon 9 and Dragon. For this to be the case, we must have a steady and rapid cadence of launch that is far better than what we have achieved in the past. We have more work ahead of us than you probably realize. Let me give you a sense of where things stand financially: SpaceX expenses this year will be roughly \$800 to \$900 million (which blows my mind btw). Since we get revenue of \$60M for every F9 flight or double that for a FH or F9-Dragon flight, we must have about twelve flights per year where four of those flights are either Dragon or Heavy merely in order to achieve 10% profitability!

For the next few years, we have NASA commercial crew funding that helps supplement those numbers, but, after that, we are on our own. That is not much time to finish F9, FH, Dragon V2 and achieve an average launch rate of at least one per month. And bear in mind that is an average, so if we take an extra three weeks to launch a rocket for any reason (could even be due to the satellite), we have only one week to do the follow-on-flight.

MY RECOMMENDATION

Below is my advice about regarding selling SpaceX stock or options. No complicated analysis is required, as the rules of thumb are pretty simple. If you believe that SpaceX will execute better than the average public company, then our stock price will continue to appreciate at a rate greater than that of the stock market, which would be the next highest return place to invest money over the long term. Therefore, you should sell only the amount that you need to improve your standard of living in the short to medium term. I do actually recommend selling some amount of stock, even if you are certain it will appreciate, as life is short and a bit more cash can increase fun and reduce stress at home (so long as you don't ratchet up your ongoing personal expenditures proportionately).

To maximize your post tax return, you are probably best off exercising your options to convert them to stock (if you can afford to do this) and then holding the stock for a year before selling it at our roughly biannual liquidity events. This allows you to pay the capital gains tax rate, instead of the income tax rate.

On a final note, we are planning to do a liquidity event as soon as Falcon 9 qualification is complete in one to two months. I don't know exactly what the share price will be yet, but, based on initial conversations with investors, I would estimate probably between \$30 and \$35. This places the value of SpaceX at \$4 to \$5 billion, which is about what it would be if we were public right now and, frankly, an excellent number considering that the new F9, FH and Dragon V2 have yet to launch.

Elon

About this email: Musk tells all SpaceX employees he does not want the company public until the Mars transport system is in place, describing the distractions, volatility and litigation that Tesla and SolarCity faced as public companies. He explains the twice-yearly liquidity events, shares financial figures, and advises on selling stock and options.

Notes: Leaked within days of sending in June 2013; later reproduced in an appendix of Ashlee Vance's biography.

Blue Origin's 39A protest: 'unicorns dancing in the flame duct'

From: Elon Musk

Date: September 2013 (Sent 'Tuesday night' in response to a SpaceNews query during the September 2013 dispute over the Launch Complex 39A lease; exact day not shown on the retrieved page)

To: SpaceNews (reporter query)

FULL TEXT · PRESS & JOURNALISTS · PUBLISHED BY RECIPIENT · CONFIRMED

From a SpaceX standpoint, we view [Blue Origin] and [United Launch Alliance's] action as a phony blocking tactic and an obvious one at that. BO has not yet succeeded in creating a reliable suborbital spacecraft, despite spending over 10 years in development. It is therefore unlikely that they will succeed in developing an orbital vehicle that will meet NASA's exacting standards in the next 5 years, which is the length of the lease. That said, I can't say for sure whether [Blue Origin's] action stems from malice. No such doubt exists about ULA's motivation.

However, rather than fight this issue, there is an easy way to determine the truth, which is simply to call their bluff. If they do somehow show up in the next 5 years with a vehicle qualified to NASA's human rating standards that can dock with the Space Station, which is what Pad 39A is meant to do, we will gladly accommodate their needs. Frankly, I think we are more likely to discover unicorns dancing in the flame duct.

About this email: Replying to a SpaceNews query about Blue Origin and ULA's objections to SpaceX leasing Launch Complex 39A, Musk calls the move a phony blocking tactic, questions Blue Origin's ability to field an orbital vehicle within five years, and offers to accommodate them if they ever show up with one.

Notes: SpaceNews states 'Musk's email is reproduced below in its entirety.' Bracketed company names are SpaceNews's editorial substitutions as printed.

Musk asks Stanton about the cave's geometry

From: Elon Musk

Date: July 6, 2018 (approximate within July 6-8, 2018; thread mixes Pacific and Thailand timestamps)

To: Richard Stanton

FULL TEXT · OUTSIDE & PERSONAL · COURT RECORD · CONFIRMED

Are you one of the divers who understands the cave geometry? Trying to help out, but need to know the details of the most problematic areas.

About this email: Musk's opening email to British cave diver Richard Stanton during the Tham Luang rescue, asking about the most problematic sections of the cave.

Notes: Musk Decl. Ex. C (email chain with British cave diver Richard Stanton, July 6-8, 2018). The exhibit prints the chain newest-first with timestamps from two mail clients (Pacific time and Thailand time), so the exact send time of individual messages is uncertain; the date is a best reading. Transcribed from a scanned exhibit; minor OCR variance possible. Musk posted screenshots of part of this chain on Twitter on July 10, 2018.

Sources: [Unsworth v. Musk \(C.D. Cal. 2:18-cv-08048\)](#), [Declaration of Elon Musk ISO summary judgment, Dkt. 60 \(via CourtListener/RECAP\)](#); [Business Insider via Yahoo Finance \(Musk tweeted the thread\)](#); [Dezeen](#)

Musk: building both an aluminium tube and rubber cocoon

From: Elon Musk

Date: July 7, 2018 (approximate within July 6-8, 2018; thread mixes Pacific and Thailand timestamps)

To: Richard Stanton

FULL TEXT · OUTSIDE & PERSONAL · COURT RECORD · CONFIRMED

Ok

Building both a pressure resistant aluminium tube and a dry rubber cocoon. Baseline requirement is that whether the person is passed out or having a panic attack, they will still be fine. Also, no stray hoses that can get caught on anything or pulled out. Basically a straightjacket with an air feed. Is this roughly the right direction?

About this email: Musk describes the two designs his engineers are building and the baseline requirement that an unconscious or panicking child would still be safe.

Notes: Musk Decl. Ex. C (email chain with British cave diver Richard Stanton, July 6-8, 2018). The exhibit prints the chain newest-first with timestamps from two mail clients (Pacific time and Thailand time), so the exact send time of individual messages is uncertain; the date is a best reading. Transcribed from a scanned exhibit; minor OCR variance possible. Musk posted screenshots of part of this chain on Twitter on July 10, 2018. One reading of the exhibit shows a further stand-alone 'Ok' from Musk after Stanton's reply about the rubber cocoon.

Sources: [Unsworth v. Musk \(C.D. Cal. 2:18-cv-08048\)](#), [Declaration of Elon Musk ISO summary judgment, Dkt. 60 \(via CourtListener/RECAP\)](#); [Business Insider via Yahoo Finance \(Musk tweeted the thread\)](#); [Dezeen](#)

Stanton: rigid capsule better than rubber cocoon

From: Richard Stanton

Date: July 7, 2018 (approximate within July 6-8, 2018; thread mixes Pacific and Thailand timestamps)

To: Elon Musk

FULL TEXT · OUTSIDE & PERSONAL · COURT RECORD · CONFIRMED

I'm not sure about the rubber cocoon at it would transmit pressure onto the child. Rigid is better, plus O2 as a breathing gas rather than air.

About this email: Stanton advises against the rubber cocoon because it would transmit pressure to the child, and recommends oxygen as the breathing gas.

Notes: Musk Decl. Ex. C (email chain with British cave diver Richard Stanton, July 6-8, 2018). The exhibit prints the chain newest-first with timestamps from two mail clients (Pacific time and Thailand time), so the exact send time of individual messages is uncertain; the date is a best reading. Transcribed from a scanned exhibit; minor OCR variance possible. Musk posted screenshots of part of this chain on Twitter on July 10, 2018.

Musk sends Stanton the mini-sub's specifications

From: Elon Musk

Date: July 7, 2018 (approximate within July 6-8, 2018; thread mixes Pacific and Thailand timestamps)

To: Richard Stanton

FULL TEXT · OUTSIDE & PERSONAL · COURT RECORD · CONFIRMED

Will have more info for you soon. It is 35 cm in diameter and 160cm long. We can make more that are longer or shorter. Dual air ports on front and rear (so possible to attach up to four tanks at once). Front ports are recessed into metal, so not subject to front damage. All ports have secondary caps in case a leak develops. With the front caps on, this is strong enough to be used as a battering ram if need be. Nose is 2.5cm thick solid, high toughness 2219 alloy aluminium. It is made from very high strength rocket-grade aluminium. Cylinder section is what the Falcon rocket uses for high pressure liquid oxygen transfer. Weighs 35kg. Will send pics in a few hours. Anything else that could be helpful? I am talking to the Prime Minister later today. Is there anything you would like me to convey?

About this email: Musk gives the dimensions, materials and air-port layout of the aluminium 'mini-sub' built from Falcon rocket parts, and asks if Stanton wants anything conveyed to the Thai prime minister.

Notes: Musk Decl. Ex. C (email chain with British cave diver Richard Stanton, July 6-8, 2018). The exhibit prints the chain newest-first with timestamps from two mail clients (Pacific time and Thailand time), so the exact send time of individual messages is uncertain; the date is a best reading. Transcribed from a scanned exhibit; minor OCR variance possible. Musk posted screenshots of part of this chain on Twitter on July 10, 2018. Paragraph breaks are not preserved in the retrieved transcription.

Stanton: 'all I see is a tube'

From: Richard Stanton

Date: July 7, 2018 (approximate within July 6-8, 2018; thread mixes Pacific and Thailand timestamps)

To: Elon Musk

FULL TEXT · OUTSIDE & PERSONAL · COURT RECORD · CONFIRMED

With respect all I see is a tube, albeit made of fancy materials. We're ferrying in food in such a thing. The devil is in the detail. Breathing systems, off board gas venting systems, ballast trimming arrangements etc adding additional gas via Quick Release SCUBA compatible fittings. Why not have a long high pressure cylinder between the legs? Or a stepped tube with wider body and thinner leg section.

About this email: Stanton tells Musk the capsule design lacks detail on breathing, gas venting and ballast systems and suggests alternative layouts.

Notes: Musk Decl. Ex. C (email chain with British cave diver Richard Stanton, July 6-8, 2018). The exhibit prints the chain newest-first with timestamps from two mail clients (Pacific time and Thailand time), so the exact send time of individual messages is uncertain; the date is a best reading. Transcribed from a scanned exhibit; minor OCR variance possible. Musk posted screenshots of part of this chain on Twitter on July 10, 2018.

Musk: engineers working 24 hours a day on capsule

From: Elon Musk

Date: July 8, 2018 (approximate within July 6-8, 2018; thread mixes Pacific and Thailand timestamps)

To: Richard Stanton

FULL TEXT · OUTSIDE & PERSONAL · COURT RECORD · CONFIRMED

Understandable. Right now, I have one the world's best engineering teams who normally design spaceships and spacesuits working on this thing 24 hours a day. We are trying to get it right in a very short period of time. If it isn't needed or won't help, that would be great to know. Otherwise, it would be very helpful to have as much design direction as possible.

About this email: Musk says his spacecraft engineers are working around the clock and asks Stanton to say if the device is not needed, or otherwise to give more design direction.

Notes: Musk Decl. Ex. C (email chain with British cave diver Richard Stanton, July 6-8, 2018). The exhibit prints the chain newest-first with timestamps from two mail clients (Pacific time and Thailand time), so the exact send time of individual messages is uncertain; the date is a best reading. Transcribed from a scanned exhibit; minor OCR variance possible. Musk posted screenshots of part of this chain on Twitter on July 10, 2018. 'one the world's best' is as written.

Sources: [Unsworth v. Musk \(C.D. Cal. 2:18-cv-08048\)](#), [Declaration of Elon Musk ISO summary judgment, Dkt. 60 \(via CourtListener/RECAP\)](#); [Business Insider via Yahoo Finance \(Musk tweeted the thread\)](#); [Dezeen](#)

COVID-19 less risky than driving home

From: Elon Musk

Date: March 13, 2020 (BuzzFeed News: sent 'in the early hours of Friday morning' (Friday, March 13, 2020))

To: All SpaceX employees

PARTIAL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

The risk of death from C19 is **vastly** less than the risk of death from driving your car home.

[...]

suggests that this is **not** within the top 100 health risks in the United States.

[...]

There are about 36 thousand automotive deaths per deaths [sic], as compared to 36 so far this year for C19.

[...]

Isn't C19 growing so fast that it will soon become a top 100 health risk for people who are otherwise healthy and young to middle-aged?

[...]

The trends do not support this conclusion.

[...]

The 36 deaths were almost all in high risk groups, particularly older people who already had prior lung damage, diabetes or heart disease.

[...]

As said above, if you're feeling ill, especially with something contagious, it's always better to stay home and take care of yourself.

About this email: At the start of the pandemic Musk told SpaceX employees that the risk of dying from COVID-19 was vastly lower than the risk of dying in a car crash and that the virus was not among the top 100 U.S. health risks, while advising sick employees to stay home.

Notes: Email seen by BuzzFeed News; only quoted passages were published. '[sic]' is BuzzFeed's.

Starship is the top SpaceX priority

From: Elon Musk

Date: June 6, 2020 (CNBC: 'writing Saturday in a company-wide email seen by CNBC' (Saturday June 6, 2020; article published June 7))

To: All SpaceX employees

EXCERPT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

dramatically and immediately

[...]

Please consider the top SpaceX priority (apart from anything that could reduce Dragon return risk) to be Starship

[...]

We need to accelerate Starship progress

[...]

For those considering moving, we will always offer a dedicated SpaceX aircraft to shuttle people

[...]

consider spending significant time

About this email: A week after SpaceX's first crewed Dragon launch, Musk told employees that Starship was now the company's top priority apart from Dragon return risk, urged them to accelerate progress 'dramatically and immediately' and to consider spending significant time at Boca Chica.

Notes: REPLACES: 2020-06-06 Starship is the top SpaceX priority. Adds one more quoted fragment ('dramatically and immediately') and lists fragments in the order CNBC printed them; CNBC says the last fragment asked employees to consider spending significant time in Boca Chica. Still only fragments: the full text was never published.

Raptor production crisis and 'genuine risk of bankruptcy'

From: Elon Musk

Date: November 26, 2021 (Sent the day after Thanksgiving 2021 (Friday Nov 26); first reported by Space Explored on Nov 29 and CNBC on Nov 30)

To: All SpaceX employees

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Unfortunately, the Raptor production crisis is much worse than it had seemed a few weeks ago. As we have dug into the issues following the exiting of prior senior management, they have unfortunately turned out to be far more severe than was reported. There is no way to sugarcoat this.

I was going to take this weekend off, as my first weekend off in a long time, but instead, I will be on the Raptor line all night and through the weekend.

Unless you have critical family matters or cannot physically return to Hawthorne, we will need all hands on deck to recover from what is, quite frankly, a disaster.

The consequences for SpaceX if we can not get enough reliable Raptors made is that we then can't fly Starship, which means we then can't fly Starlink Satellite V2 (Falcon has neither the volume nor the mass to orbit needed for satellite V2). Satellite V1, by itself, is financially weak, while V2 is strong.

In addition, we are spooling up terminal production to several million units per year, which will consume massive capital, assuming that satellite V2 will be on orbit to handle the bandwidth demand. These terminals will be useless otherwise.

What it comes down to, is that we face a genuine risk of bankruptcy if we can't achieve a Starship flight rate of at least once every two weeks next year.

Thanks,

Elon

About this email: Musk tells SpaceX staff that the Raptor engine production problems are far worse than reported after senior management left, cancels his weekend off and calls for all hands on deck. He warns that without a Starship flight rate of once every two weeks in 2022, Starlink V2 cannot fly and the company faces genuine bankruptcy risk.

Notes: Musk publicly followed up on Twitter after the leak, saying bankruptcy was unlikely but not impossible.

SpaceX return-to-office: 40 hours a week in the office

From: Elon Musk

Date: May 31, 2022 (Sent Tuesday night, May 31, 2022, per reports of June 1, 2022 citing The New York Times)

To: SpaceX employees

EXCERPT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

The more senior you are, the more visible must be your presence. That is why I spent so much time in the factory — so that those on the line could see me working alongside them.

About this email: In a memo paralleling the one sent to Tesla staff the same night, Musk told SpaceX employees they must spend at least 40 hours a week in the office and said senior staff in particular need to be visibly present.

Notes: The SpaceX version was obtained by The New York Times (not retrievable in this session); only this passage of the SpaceX email was quoted in accessible coverage. The fuller Tesla emails of the same night ('Remote work is no longer acceptable', 'To be super clear') belong to the Tesla slice.

SpaceX acquires xAI: 'the next book'

From: Elon Musk

Date: February 2, 2026 (Memo to staff posted on SpaceX's website Monday Feb 2, 2026)

To: SpaceX and xAI employees (also posted publicly on spacex.com)

FULL TEXT · COMPANY-WIDE MEMO · PUBLISHED BY MUSK · CONFIRMED

SpaceX has acquired xAI to form the most ambitious, vertically-integrated innovation engine on (and off) Earth, with AI, rockets, space-based internet, direct-to-mobile device communications and the world's foremost real-time information and free speech platform. This marks not just the next chapter, but the next book in SpaceX and xAI's mission: scaling to make a sentient sun to understand the Universe and extend the light of consciousness to the stars!

Current advances in AI are dependent on large terrestrial data centers, which require immense amounts of power and cooling. Global electricity demand for AI simply cannot be met with terrestrial solutions, even in the near term, without imposing hardship on communities and the environment.

In the long term, space-based AI is obviously the only way to scale. To harness even a millionth of our Sun's energy would require over a million times more energy than our civilization currently uses!

The only logical solution therefore is to transport these resource-intensive efforts to a location with vast power and space. I mean, space is called "space" for a reason. By directly harnessing near-constant solar power with little operating or maintenance costs, these satellites will transform our ability to scale compute. It's always sunny in space! Launching a constellation of a million satellites that operate as orbital data centers is a first step towards becoming a Kardashev II-level civilization, one that can harness the Sun's full power, while supporting AI-driven applications for billions of people today and ensuring humanity's multi-planetary future.

In the history of spaceflight, there has never been a vehicle capable of launching the megatons of mass that space-based data centers or permanent bases on the Moon and cities on Mars require. Even in 2025, the most prolific year in history in terms of the number of orbital launches, only about 3000 tons of payload was launched into orbit, primarily consisting of Starlink satellites carried by our Falcon rocket.

The requirement to launch thousands of satellites to orbit became a forcing function for the Falcon program, driving recursive improvements to reach the unprecedented flight rates necessary to make space-based internet a reality. This year, Starship will begin delivering the much more powerful V3 Starlink satellites to orbit, with each launch adding more than 20 times the capacity to the constellation as the current Falcon launches of the V2 Starlink satellites. Starship will also launch the next generation of direct-to-mobile satellites, which will deliver full cellular coverage everywhere on Earth.

While the need to launch these satellites will act as a similar forcing function to drive Starship improvements and launch rates, the sheer number of satellites that will be needed for space-based data centers will push Starship to even greater heights. With

launches every hour carrying 200 tons per flight, Starship will deliver millions of tons to orbit and beyond per year, enabling an exciting future where humanity is out exploring amongst the stars.

The basic math is that launching a million tons per year of satellites generating 100 kW of compute power per ton would add 100 gigawatts of AI compute capacity annually, with no ongoing operational or maintenance needs. Ultimately, there is a path to launching 1 TW/year from Earth.

My estimate is that within 2 to 3 years, the lowest cost way to generate AI compute will be in space. This cost-efficiency alone will enable innovative companies to forge ahead in training their AI models and processing data at unprecedented speeds and scales, accelerating breakthroughs in our understanding of physics and invention of technologies to benefit humanity.

This new constellation will build upon the well-established space sustainability design and operational strategies, including end-of-life disposal, that have proven successful for SpaceX's existing broadband satellite systems.

While launching AI satellites from Earth is the immediate focus, Starship's capabilities will also enable operations on other worlds. Thanks to advancements like in-space propellant transfer, Starship will be capable of landing massive amounts of cargo on the Moon. Once there, it will be possible to establish a permanent presence for scientific and manufacturing pursuits. Factories on the Moon can take advantage of lunar resources to manufacture satellites and deploy them further into space. By using an electromagnetic mass driver and lunar manufacturing, it is possible to put 500 to 1000 TW/year of AI satellites into deep space, meaningfully ascend the Kardashev scale and harness a non-trivial percentage of the Sun's power.

The capabilities we unlock by making space-based data centers a reality will fund and enable self-growing bases on the Moon, an entire civilization on Mars and ultimately expansion to the Universe.

Thank you for everything you have done and will do for the light cone of consciousness.

Ad Astra!

Elon

About this email: Musk announces that SpaceX has acquired xAI and lays out the rationale: terrestrial power cannot meet AI demand, so SpaceX will launch up to a million satellites as orbital data centers using Starship. He predicts space will be the cheapest place for AI compute within two to three years and sketches lunar manufacturing and Mars expansion.

Notes: Text retrieved in two passes from the AOL/Business Insider reprint (first four paragraphs, then the remainder); the SpaceX page itself is JavaScript-rendered and could not be read directly. Section sub-headings, if any in the original posting, were not returned. Described by press as a memo to employees that SpaceX posted publicly.

Altman proposes a 'Manhattan Project for AI'

From: Sam Altman

Date: May 25, 2015 (Sent 9:10 PM)

To: Elon Musk

Subject: question

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Been thinking a lot about whether it's possible to stop humanity from developing AI.

I think the answer is almost definitely not.

If it's going to happen anyway, it seems like it would be good for someone other than Google to do it first.

Any thoughts on whether it would be good for YC to start a Manhattan Project for AI? My sense is we could get many of the top ~50 to work on it, and we could structure it so that the tech belongs to the world via some sort of nonprofit but the people working on it get startup-like compensation if it works. Obviously we'd comply with/aggressively support all regulation.

Sam

About this email: Altman tells Musk that stopping AI development is almost certainly impossible and floats YC starting a 'Manhattan Project for AI' whose technology would belong to the world via a nonprofit.

Notes: First exhibited with Musk's 2024 complaint against OpenAI.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722\) court exhibits](#), as transcribed in LessWrong's 'OpenAI Email Archives'; [Dkt. 32-2 \(Exhibit 1 to First Amended Complaint\)](#); [CourtListener docket](#), Musk v. Altman

Altman's detailed plan: mission, team, governance

From: Sam Altman

Date: June 24, 2015 (Sent 10:24 AM)

To: Elon Musk

Subject: AI lab

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

- 1) The mission would be to create the first general AI and use it for individual empowerment—ie, the distributed version of the future that seems the safest. More generally, safety should be a first-class requirement.
- 2) I think we'd ideally start with a group of 7-10 people, and plan to expand from there. We have a nice extra building in Mountain View they can have.
- 3) I think for a governance structure, we should start with 5 people and I'd propose you, Bill Gates, Pierre Omidyar, Dustin Moskovitz, and me. The technology would be owned by the foundation and used "for the good of the world", and in cases where it's not obvious how that should be applied the 5 of us would decide. The researchers would have significant financial upside but it would be uncorrelated to what they build, which should eliminate some of the conflict (we'll pay them a competitive salary and give them YC equity for the upside). We'd have an ongoing conversation about what work should be open-sourced and what shouldn't. At some point we'd get someone to run the team, but he/she probably shouldn't be on the governance board.
- 4) Will you be involved somehow in addition to just governance? I think that would be really helpful for getting work pointed in the right direction getting the best people to be part of it. Ideally you'd come by and talk to them about progress once a month or whatever. We generically call people involved in some limited way in YC "part-time partners" (we do that with Peter Thiel for example, though at this point he's very involved) but we could call it whatever you want. Even if you can't really spend time on it but can be publicly supportive, that would still probably be really helpful for recruiting.
- 5) I think the right plan with the regulation letter is to wait for this to get going and then I can just release it with a message like "now that we are doing this, I've been thinking a lot about what sort of constraints the world needs for safety." I'm happy to leave you off as a signatory. I also suspect that after it's out more people will be willing to get behind it.

Sam

About this email: Altman lays out the proposed lab: a mission to build the first general AI for individual empowerment, a starting team of 7-10, a five-person governance board including Musk, and a plan for a regulation letter.

Notes: The court exhibit (Dkt. 32-3) shows the five paragraphs numbered 1) to 5) and the subject line 'AI lab'; body text is from the LessWrong transcription with the numbering restored per the exhibit. Spelling 'safety' is as published. Also shown at the 2026 trial (reported as trial Exhibit 5).

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722\) court exhibits, as transcribed in LessWrong's 'OpenAI Email Archives'](#); [Dkt. 32-3 \(Exhibit 2 to First Amended Complaint\)](#); [CourtListener docket, Musk v. Altman](#)

Altman to Musk: \$100MM commitment and specific asks

From: Sam Altman

Date: October 18, 2015 (Header as published: Oct 18, 2015, 11:36 AM)

To: Elon Musk

Subject: followup

PARTIAL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Good seeing you a couple of weeks ago. As discussed I think starting with a \$100MM commitment (and leaving the time unspecified) is the way to go. Everyone we discussed but Gates is committed to donating. Hope to have him locked down next week. I am going to sit down with Zuck, but I still think it's probably too problematic given Facebook AI Research. Two big new recruits that we expect to sign offer letters this week: John Schulman and Wojciech Zaremba. Specific asks for you: 1) Can you donate \$30MM over the next 5 years? 2) Can we call you an "advisor" but leave unspecified what you'll do in detail and figure it out as we go? 3) Will you be on the Safety Board with me? I'd like it to eventually be 5 of us, adding the next 3 over the year or so. This will be the "second key" for releasing anything that could be dangerous.

About this email: Sam Altman proposes launching the AI lab with a \$100 million commitment, reports on donors and recruits, and asks Musk to donate \$30 million over five years, be named an advisor and join a safety board.

Notes: Email TO Musk in a thread he replied to. Altman asks Musk to call Sutskever over Google counteroffer

From: Sam Altman

Date: November 18, 2015 (Sent Wednesday 1:06 PM)

To: Elon Musk (and Ilya Sutskever)

PARTIAL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Elon, as we discussed, Ilya is trying to decide between leaving YCAI and a massive counteroffer from Google. I think talking to you would help him make the right choice.

[...]

It sounds like he's free after 5:00 PM. Sam.

About this email: Altman tells Musk that Sutskever is weighing the new lab against a massive Google counteroffer and asks Musk to call him.

Notes: Text is as read aloud by counsel at Sutskever's deposition (deposition Exhibit 3, Bates 2024MUSK-0005305), not the document itself; a phone number between the two passages was omitted, and the transcript's wording ('leaving YCAI') may reflect a reading or transcription slip. Subject line not stated.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\)](#), Dkt. 391-46 (Ilya Sutskever deposition, Oct. 1, 2025; emails read into the record)

Tags: recruiting, ilya-sutskever, google, counteroffers, musk-v-openai

Sutskever asks Musk for a phone call

From: Ilya Sutskever

Date: November 18, 2015 (Sent 8:41 PM; the chain's top message is dated Nov. 19, so the date of this reply (Nov. 18 or 19) is not certain)

To: Elon Musk

PARTIAL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Hi, Elon. I would like to talk to you about this matter over the phone. Any chance you could call today before 4:00 PM., after 8:00 PM? Let me know what time works best for you. Ilya.

About this email: Sutskever asks Musk to call him to discuss his decision between the new lab and Google.

Notes: As read aloud by counsel at Sutskever's deposition (deposition Exhibit 3); punctuation is the court reporter's.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\)](#), Dkt. 391-46 (Ilya Sutskever deposition, Oct. 1, 2025; emails read into the record)

Tags: recruiting, ilya-sutskever, google, musk-v-openai

Musk to Sutskever: 'No problem. Will call today.'

From: Elon Musk

Date: November 19, 2015 (Sent 9:14 (PM), about half an hour after Sutskever's 8:41 PM message; exhibit header dated Nov. 19, 2015)

To: Ilya Sutskever

PARTIAL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

No problem. Will call today.

About this email: Musk agrees to call Sutskever, who was deciding between the new lab and a Google counteroffer.

Notes: As read aloud by counsel at Sutskever's deposition (deposition Exhibit 3, Bates 2024MUSK-0005305). Likely the complete message, but the document itself was not retrieved.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\)](#), Dkt. 391-46 (Ilya Sutskever deposition, Oct. 1, 2025; emails read into the record)

Altman: board plan for 'YC AI' Delaware nonprofit

From: Sam Altman

Date: November 20, 2015 (Sent 10:48 AM)

To: Elon Musk (cc: YC general counsel, name redacted)

Subject: Re: AI docs

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

Elon-

Plan is to have you, me, and Ilya on the Board of Directors for YC AI, which will be a Delaware non-profit. We will also state that we plan to elect two other outsiders by majority vote of the Board.

We will write into the bylaws that any technology that potentially compromises the safety of humanity has to get consent of the Board to be released, and we will reference this in the researchers' employment contracts.

At a high level, does that work for you?

I'm cc'ing our GC <redacted> here—is there someone in your office he can work with on the details?

Sam

About this email: Altman proposes that he, Musk and Sutskever sit on the board of 'YC AI', a Delaware nonprofit, with bylaws requiring board consent to release technology that could compromise humanity's safety.

Notes: Published by OpenAI (Altman's side) in its December 2024 blog post; LessWrong marks it as sourced from the OpenAI blog.

Sources: [OpenAI blog](#), 'Elon Musk wanted an OpenAI for-profit' (Dec 13, 2024); transcribed in LessWrong's 'OpenAI Email Archives'; [LessWrong](#), [OpenAI Email Archives](#)

Musk: use a standard C corp with parallel nonprofit

From: Elon Musk

Date: November 20, 2015 (Sent 12:29 PM)

To: Sam Altman

Subject: Re: AI docs

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

I think this should be independent from (but supported by) YC, not what sounds like a subsidiary.

Also, the structure doesn't seem optimal. In particular, the YC stock along with a salary from the nonprofit muddies the alignment of incentives. Probably better to have a standard C corp with a parallel nonprofit.

About this email: Musk says the lab should be independent from YC rather than a subsidiary, and that YC stock plus a nonprofit salary muddies incentives; he suggests a standard C corp with a parallel nonprofit.

Notes: Published by OpenAI in its December 2024 blog post.

Sources: [OpenAI blog](#), 'Elon Musk wanted an OpenAI for-profit' (Dec 13, 2024); transcribed in LessWrong's 'OpenAI Email Archives'; [LessWrong](#), [OpenAI Email Archives](#)

Brockman sends draft launch blog and offer template

From: Greg Brockman

Date: November 22, 2015 (Sent 6:11 PM)

To: Elon Musk (cc: Sam Altman)

Subject: follow up from call

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Hey Elon,

Nice chatting earlier.

As I mentioned on the phone, here's the latest early draft of the blog post:

<<https://quip.com/6YnqA26RJgKr>>. (Sam, Ilya, and I are thinking about new names; would love any input from you.)

Obviously, there's a lot of other detail to change too, but I'm curious what you think of that kind of messaging. I don't want to pull any punches, and would feel comfortable broadcasting a stronger message if it feels right. I think it's mostly important that our messaging appeals to the research community (or at least the subset we want to hire). I hope for us to enter the field as a neutral group, looking to collaborate widely and shift the dialog towards being about humanity winning rather than any particular group or company. (I think that's the best way to bootstrap ourselves into being a leading research institution.)

I've attached the offer letter template we've been using, with a salary of \$175k. Here's the email template I've been sending people:

Attached is your official YCR offer letter! Please sign and date the your convenience. There will be two more documents coming:

- A separate letter offering you 0.25% of each YC batch you are present for (as compensation for being an Advisor to YC).
- The At-Will Employment, Confidential Information, Invention Assignment and Arbitration Agreement

(As this is the first batch of official offers we've done, please forgive any bumpiness along the way, and please let me know if anything looks weird!)

We plan to offer the following benefits:

- Health, dental, and vision insurance
- Unlimited vacation days with a recommendation of four weeks per year
- Paid parental leave

- Paid conference attendance when you are presenting YC AI work or asked to attend by YC AI

We're also happy to provide visa support. When you're ready to talk about visa-related questions, I'm happy to put you in touch with Kirsty from YC.

Please let me know if you have any questions — I'm available to chat any time! Looking forward to working together :).

- gdb

About this email: Brockman shares the early draft of the launch blog post, asks for input on naming and messaging, and attaches the \$175k offer letter template and benefits email being sent to recruits.

Notes: The passage from 'Attached is your official YCR offer letter!' to 'Looking forward to working together :).' is a quoted template inside the email.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722\) court exhibits, as transcribed in LessWrong's 'OpenAI Email Archives'](#); [Dkt. 32-4 \(Exhibit 3 to First Amended Complaint\)](#); [CourtListener docket, Musk v. Altman](#)

Musk: announce a \$1B commitment, not \$100M

From: Elon Musk

Date: November 22, 2015 (Sent 7:48 PM)

To: Greg Brockman (cc: Sam Altman)

Subject: follow up from call

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Blog sounds good, assuming adjustments for neutrality vs being YC-centric.

I'd favor positioning the blog to appeal a bit more to the general public -- there is a lot of value to having the public root for us to succeed -- and then having a longer, more detailed and inside-baseball version for recruiting, with a link to it at the end of the general public version.

We need to go with a much bigger number than \$100M to avoid sounding hopeless relative to what Google or Facebook are spending. I think we should say that we are starting with a \$1B funding commitment. This is real. I will cover whatever anyone else doesn't provide.

Template seems fine, apart from shifting to a vesting cash bonus as default, which can optionally be turned into YC or potentially SpaceX (need to understand how much this will be) stock.

About this email: Musk approves the blog direction with less YC-centric framing, urges a general-public version, insists on announcing a \$1B funding commitment that he will backstop, and suggests a vesting cash bonus convertible to YC or SpaceX stock.

Notes: The \$1B passage was first published in excerpt by OpenAI in March 2024; the full email appeared later in court exhibits.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722\) court exhibits, as transcribed in LessWrong's 'OpenAI Email Archives'](#); [CourtListener docket, Musk v. Altman](#); [OpenAI, 'OpenAI and Elon Musk' \(Mar 5, 2024\)](#)

Musk: pure-play 501c3, 'Freemind' name, time commitment

From: Elon Musk

Date: November 22, 2015 (Sent Sunday 6:54 PM)

To: Sam Altman

Subject: Re: Thought Summary

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Had a great call with Greg. I'm super impressed with everyone so far. This is a great team.

Doing this as an independent, pure play 501c3, but with a crystal clear focus on the positive advent of strong AI distributed widely to humanity does seem to make the most sense to me. Please correct me if we aren't on the same page. The company would still aim to bring in revenue in excess of costs at some point, but positive net revenue would just flow to cash reserves.

On the comp front, I think having the default approach be a cash salary and a cash bonus that vests over four years and stacks with refresher vesting bonuses every year is the way to go. People could, at their option, if you are amenable, convert that cash amount to YC stock. I'm also fine if they want to convert some or all to SpaceX stock. I can pretty much do what I want on the SpaceX side, as it is private (thank goodness).

Also, we will have insane amounts of real world sensor data -- several orders of magnitude greater than any other company -- at Tesla that the team could use when helpful.

Was thinking a bit about names. It is always super hard to come up with one that doesn't suck and isn't already taken by someone that won't give it up. Least bad name I have thought of so far is Freemind. Conveys the sense that we are trying to create digital intelligence that will be freely available to all -- the opposite of Deepmind's one-ring-to-rule-them-all approach. Having "mind" in there isn't great, but the synonyms suck and their name has been subsumed in the public sphere by Google/Alphabet. You come up with anything?

On the time allocation front, I've decided to dedicate whatever amount of my time that is materially useful, even though it will come at some cost to SpaceX and Tesla. If I really believe that this is potentially the biggest near-term existential threat, then action should follow belief. That said, this probably amounts to half a day per week (higher in the beginning), with more time allocated when we hit a key decision point or crisis.

About this email: Musk backs an independent, pure-play 501c3 focused on widely distributed strong AI, outlines cash-plus-vesting-bonus pay convertible to YC or SpaceX stock, offers Tesla sensor data, proposes the name 'Freemind', and commits roughly half a day a week.

Notes: Also shown at the 2026 jury trial (reported as trial Exhibit 12). The earlier 'Thought Summary' message this replies to is not in the exhibit as retrieved.

Altman agrees on 501c3; floats 'Axon'; asks Musk's title

From: Sam Altman

Date: November 22, 2015 (Sent Sunday 7:08 PM)

To: Elon Musk

Subject: Re: Thought Summary

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Yes--I think an independent 501c3 is correct. Are you ok if, initially, it shares a building with YC and YC helps with legal stuff etc? I think that will save us a few months while we hire dedicated people.

I like the idea of defaulting to a cash bonus that stacks each year--I'd independently come to that same conclusion after talking to Greg yesterday. Offering them the option to convert it to SpaceX or YC stock sounds great to me.

Making Tesla data available would be incredible. I think most YC companies will offer to do the same.

Freemind seems pretty good to me but I'd to keep thinking--it may be a little too close to Deepmind. I really like the word free here thought--freethink? freemerge?

Best idea I've had so far is Axon, which I think we could get .com for from TPG-Axon. Intelligence.com looks getable, but perhaps too generic.

I'll keep thinking.

Half a day per week sounds awesome. I assume that if gets to the point where AGI looks like it's about to happen, you and I will both find a way to spend a lot of time on it. And if it seems further off, then I expect you'll be very busy getting to Mars.

Have you given any thought to how you want to describe your involvement? I'm fine with anything from "advisor" to "co-CEO" but think it's probably good to have a clear answer.

About this email: Altman agrees an independent 501c3 is right, asks if it can initially share a building with YC, suggests names including Axon, and asks how Musk wants to describe his involvement, from 'advisor' to 'co-CEO'.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\), Dkt. 379-61 \(Exhibit 6\)](#); [Mother Jones, 'The Musk v. Musk: 'Can't be lukewarm'; proposes co-chairs

From: Elon Musk

Date: November 22, 2015 (Sent Sunday 7:32 PM)

To: Sam Altman

Subject: Re: Thought Summary

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Great, sounds like we are independently following the same thought tracks.

No problem with YC support in the beginning. That's normal for a lot of companies, so I don't think it materially affects the neutrality position.

The "mind" part of Freemind is partly an intentional philosophical counter to Deepmind and also, as mentioned, I couldn't find a synonym for "mind" that wasn't terrible.

I like Axon as an option, although it does slightly sound like Google Brain or, more generally, that we think digital intelligence consists of brain emulation. Pretty much all names suck in the beginning though. Given several choices, I tend to favor names that convey the mission of the company and hopefully have a positive impact on recruitment.

Yeah, my role should be clear and I have to bite the bullet on admitting real involvement. This will come as a shocker to many, but so be it. Can't be lukewarm about this.

In terms of title, what about me as chair and you as CEO or us both as co-chairs? My main concern about being called a co-CEO, even if that is de facto true, is that it might cause problems at SpaceX and Tesla, where they know I'm already overbooked.

About this email: Musk accepts early YC support, explains the 'mind' in Freemind as a counter to DeepMind, comments on Axon, says he must admit real involvement, and proposes being chair with Altman as CEO or both as co-chairs.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\), Dkt. 379-61 \(Exhibit 6\)](#); [Mother Jones, 'The Musk v. Musk drafts OpenAI's opening paragraphs

From: Elon Musk

Date: December 8, 2015 (Sent 9:29 AM)

To: Sam Altman

Subject: Draft opening paragraphs

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

It is super important to get the opening summary section right. This will be what everyone reads and what the press mostly quotes. The whole point of this release is to attract top talent. Not sure Greg totally gets that.

---- OpenAI is a non-profit artificial intelligence research company with the goal of advancing digital intelligence in the way that is most likely to benefit humanity as a whole, unencumbered by an obligation to generate financial returns.

The underlying philosophy of our company is to disseminate AI technology as broadly as possible as an extension of all individual human wills, ensuring, in the spirit of liberty, that the power of digital intelligence is not overly concentrated and evolves toward the future desired by the sum of humanity.

The outcome of this venture is uncertain and the pay is low compared to what others will offer, but we believe the goal and the structure are right. We hope this is what matters most to the best in the field.

About this email: Musk stresses that the launch post's opening summary is what the press will quote and that its purpose is to attract top talent, then supplies his own three-paragraph draft describing OpenAI as a nonprofit.

Notes: Text matches the court exhibit (Dkt. 32-5). Also shown at the 2026 trial (reported as trial Exhibit 14).

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722\)](#) court exhibits, as transcribed in LessWrong's 'OpenAI Email Archives'; Dkt. 32-5 (Exhibit 4 to First Amended Complaint); CourtListener docket, Musk v. Altman

Altman's revision of the opening paragraphs

From: Sam Altman

Date: December 8, 2015 (Sent 10:34 AM)

To: Elon Musk

Subject: Draft opening paragraphs

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

how is this?

—

OpenAI is a non-profit artificial intelligence research company with the goal of advancing digital intelligence in the way that is most likely to benefit humanity as a

whole, unencumbered by an obligation to generate financial returns.

Because we don't have any financial obligations, we can focus on the maximal positive human impact and disseminating AI technology as broadly as possible. We believe AI should be an extension of individual human wills and, in the spirit of liberty, not be concentrated in the hands of the few.

The outcome of this venture is uncertain and the pay is low compared to what others will offer, but we believe the goal and the structure are right. We hope this is what matters most to the best in the field.

About this email: Altman returns an edited version of Musk's draft opening, tightening the second paragraph about broad dissemination and AI as an extension of individual human wills.

Notes: Text matches the court exhibit (Dkt. 32-5). Also shown at the 2026 trial (reported as trial Exhibit 14).

Subject: The OpenAI Company

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Congratulations on a great beginning!

We are outmanned and outgunned by a ridiculous margin by organizations you know well, but we have right on our side and that counts for a lot. I like the odds.

Our most important consideration is recruitment of the best people. The output of any company is the vector sum of the people within it. If we are able to attract the most talented people over time and our direction is correctly aligned, then OpenAI will prevail.

To this end, please give a lot of thought to who should join. If I can be helpful with recruitment or anything else, I am at your disposal. I would recommend paying close attention to people who haven't completed their grad or even undergrad, but are obviously brilliant. Better to have them join before they achieve a breakthrough.

Looking forward to working together,

Elon

About this email: On the day OpenAI was announced, Musk congratulates the founding team, says they are outmanned and outgunned but have right on their side, and makes recruiting the best people the top priority.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722\) court exhibits, as transcribed in LessWrong's 'OpenAI Email Archives'; Dkt. 32-7 \(Exhibit 6 to First Amended Complaint\); CourtListener docket, Musk v. Altman](#)

Redacted correspondent challenges open-sourcing AI

From: [redacted]

Date: January 2, 2016 (Sent 10:12 AM CST)

To: Elon Musk

Subject: congrats on the falcon 9

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

Hi Elon Happy new year to you, [REDACTED]!

Congratulations on landing the Falcon 9, what an amazing achievement. Time to build out the fleet now!

I've seen you (and Sam and other OpenAI people) doing a lot of interviews recently extolling the virtues of open sourcing AI, but I presume you realise that this is not some sort of panacea that will somehow magically solve the safety problem? There are many good arguments as to why the approach you are taking is actually very dangerous and in fact may increase the risk to the world. Some of the more obvious points are well articulated in this blog post, that I'm sure you've seen, but there are also other important considerations: <http://slatestarcodex.com/2015/12/17/should-ai-be-open/>

I'd be interested to hear your counter-arguments to these points.

Best,

[REDACTED]

About this email: A correspondent whose name is redacted congratulates Musk on the Falcon 9 landing and argues that OpenAI's open-sourcing approach is not a safety panacea and may increase risk, citing a Slate Star Codex post.

Notes: Sender name redacted in the published version. Musk forwarded this email, without recorded comment, to Sam Altman, Ilya Sutskever and Greg Brockman on Jan 2, 2016 at 8:18 AM (Pacific); that bare forward is not listed as a separate entry.

Sutskever: 'Open' means sharing benefits, not science

From: Ilya Sutskever

Date: January 2, 2016 (Sent 9:06 AM)

To: Elon Musk, Sam Altman, Greg Brockman

Subject: Fwd: congrats on the falcon 9

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

The article is concerned with a hard takeoff scenario: if a hard takeoff occurs, and a safe AI is harder to build than an unsafe one, then by opensourcing everything, we make it easy for someone unscrupulous with access to overwhelming amount of hardware to build an unsafe AI, which will experience a hard takeoff. As we get closer to building AI, it will make sense to start being less open. The Open in openAI means that everyone should benefit from the fruits of AI after its built, but it's totally OK to not share the science (even though sharing everything is definitely the right strategy in the short and possibly medium term for recruitment purposes).

About this email: Replying to Musk's forward, Sutskever says it will make sense to be less open as AI gets closer, and that the 'Open' in OpenAI means everyone benefits from AI's fruits, not that the science must be shared.

Notes: Typo 'opensourcing' is in the published text. Paragraphing follows the LessWrong transcription as retrieved (single block).

Musk: DeepMind is 'playing the Super Bowl'

From: Elon Musk

Date: February 18, 2016 (Sent the same day, 'a few hours later' per counsel)

To: Ilya Sutskever (and others on the chain)

PARTIAL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

I think I should probably do this every week.

[...]

My dinner with Dennis was extremely alarming. I feel like they are playing the Super Bowl and we are playing the Puppy Bowl. Unless want to have our ass handed to us, we need to step up our game dramatically.

[...]

Let's have a conference call later today with the key people of OpenAI. Later today, if possible; otherwise, tomorrow.

About this email: Musk says he should meet OpenAI's leaders weekly, calls a dinner with DeepMind's chief extremely alarming, says OpenAI must dramatically step up its game, and asks for a conference call with key people.

Notes: As read aloud by counsel at Sutskever's deposition (deposition Exhibit 9) in three passages; 'Dennis' is the court reporter's rendering (apparently Demis Hassabis of DeepMind) and 'Unless want' is as transcribed. This exchange immediately precedes the 'Re: Followup thoughts' emails of Feb. 19, 2016. Subject line not stated.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\), Dkt. 391-46 \(Ilya Sutskever deposition, Oct. 1, 2025; emails read into the record\)](#); [Big Technology, 'Satya, Sam To Take The Stand This Week + Highlights From Musk v. Altman' \(May 2026\)](#)

Musk: DeepMind odds rising; OpenAI needs urgency

From: Elon Musk

Date: February 19, 2016 (Sent 12:05 AM)

To: Ilya Sutskever, Greg Brockman, Sam Altman

Subject: Re: Followup thoughts

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Frankly, what surprises me is that the AI community is taking this long to figure out concepts. It doesn't sound super hard. High-level linking of a large number of deep nets sounds like the right approach or at least a key part of the right approach. [REDACTED]

The probability of DeepMind creating a deep mind increases every year. Maybe it doesn't get past 50% in 2 to 3 years, but it likely moves past 10%. That doesn't sound

crazy to me, given their resources.

In any event, I have found that it is far better to overestimate than underestimate competitors.

This doesn't mean we should rush out and hire weak talent. I agree that nothing good would be achieved by that. What we need to do is redouble our efforts to seek out the best people in the world, do whatever it takes to bring them on board and imbue the company with a high sense of urgency.

It will be important for OpenAI to achieve something significant in the next 6 to 9 months to show that we are for real. Doesn't need to be a whopper breakthrough, but it should be enough for key talent around the world to sit up and take notice.

[REDACTED]

About this email: Musk says he is surprised the AI community is slow to figure out concepts, estimates DeepMind's odds of success are growing each year, and urges redoubled recruiting and a significant result within 6 to 9 months.

Notes: Two passages are redacted in the exhibit. The earlier message(s) in the 'Followup thoughts' thread that Musk is replying to were not published.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722\) court exhibits, as transcribed in LessWrong's 'OpenAI Email Archives'](#); [CourtListener docket, Musk v. Altman](#); [OpenAI, 'Elon Musk wanted an OpenAI for-profit' \(Dec 13, 2024\)](#)

Sutskever: more than one problem stands before AGI

From: Ilya Sutskever

Date: February 19, 2016 (Sent 10:28 AM)

To: Elon Musk (cc: Greg Brockman, Sam Altman)

Subject: Re: Followup thoughts

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Several points:

- It is not the case that once we solve "concepts," we get AI. Other problems that will have to be solved include unsupervised learning, transfer learning, and lifetime learning. We're also doing pretty badly with language right now. It does not mean that these problems will not see significant progress in the coming years, but it is not the case that there is only one problem that stands between us and full human level AI.
- We can't build AI today because we lack key ideas (computers may be too slow, too, but we can't tell). Powerful ideas are produced by top people. Massive clusters help, and are very worth getting, but they play a less important role.
- We will be able to achieve a conventionally significant result in the next 6 to 9 months, simply because the people we already have are very good. Achieving a field-altering result will be harder, riskier, and take longer. But we have a not unreasonable plan for that as well.

About this email: Sutskever pushes back that solving 'concepts' does not yield AI, says key ideas from top people matter more than clusters, and predicts a conventionally significant result within 6 to 9 months.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722\)](#) court exhibits, as transcribed in LessWrong's 'OpenAI Email Archives'; CourtListener docket, Musk v. Altman; OpenAI, 'Elon Musk wanted an OpenAI for-profit' (Dec 13, 2024)

Brockman asks for guidance on pay and offers

From: Greg Brockman

Date: February 21, 2016 (Sent 11:34 AM)

To: Elon Musk (cc: Sam Altman)

Subject: compensation framework

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Hi all,

We're currently doing our first round of full-time offers post-founding. It's obviously super important to get these right, as the implications are very long-term. I don't yet feel comfortable making decisions here on my own, and would love any guidance.

Here's what we're currently doing:

Founding team: \$275k salary + 25bps of YC stock

- Also have option of switching permanently to \$125k annual bonus or equivalent in YC or SpaceX stock. I don't know if anyone's taken us up on this.

New offers: \$175k annual salary + \$125k annual bonus || equivalent in YC or SpaceX stock. Bonus is subject to performance review, where you may get 0% or significantly greater than 100%.

Special cases: gdb + Ilya + Trevor

The plan is to keep a mostly flat salary, and use the bonus multiple as a way to reward strong performers.

Some notes:

- We use a 20% annualized discount for the 8 years until the stock becomes liquid, the \$125k bonus equates to 12bps in YC. So the terminal value is more like \$750k. This number sounds a lot more impressive, though obviously it's hard to value exactly.
- The founding team was initially offered \$175k each. The day after the lab launched, we proactively increased everyone's salary by \$100k, telling them that we are financially committed to them as the lab becomes successful, and asking for a personal promise to ignore all counteroffers and trust we'll take care of them.
- We're currently interviewing Ian Goodfellow from Brain, who is one of the top 2 scientists in the field we don't have (the other being Alex Graves, who is a DeepMind loyalist). He's the best person on Brain, so Google will fight for him. We're grandfathering him into the founding team offer.

Some salary datapoints:

- John was offered \$250k all-in annualized at DeepMind, thought he could negotiate to \$300k easily.
- Wojciech was verbally offered ~\$1.25M/year at FAIR (no concrete letter though)
- Andrew Tulloch is getting \$800k/year at FB. (A lot is stock which is vesting.)
- Ian Goodfellow is currently getting \$165k cash + \$600k stock/year at Google.
- Apple is a bit desperate and offering people \$550k cash (plus stock, presumably). I don't think anyone good is saying yes.

Two concrete candidates that are on my mind:

- Andrew is very close to saying yes. However, he's concerned about taking such a large paycut.
- Ian has stated he's not primarily concerned with money, but the Bay Area is expensive / wants to make sure he can buy a house. I don't know what will happen if/when Google starts throwing around the numbers they threw at Ilya.

My immediate questions:

1. I expect Andrew will try to negotiate up. Should we stick to his offer, and tell him to only join if he's excited enough to take that kind of paycut (and that others have left more behind)?
2. Ian will be interviewing + (I'm sure) getting an offer on Wednesday. Should we consider his offer final, or be willing to slide depending on what Google offers?
3. Depending on the answers to 1 + 2, I'm wondering if this flat strategy makes sense. If we keep it, I feel we'll have to really sell people on the bonus multiplier. Maybe one option would be using a signing bonus as a lever to get people to sign?
4. Very secondary, but our intern comp is also below market: \$9k/mo. (FB offers \$9k + free housing, Google offers like \$11k/mo all-in.) Comp is much less important to interns than to FT people, since the experience is primary. But I think we may have lost a candidate who was on the edge to this. Given the dollar/hour is so much lower than for FT, should we consider increasing the amount?

I'm happy to chat about this at any time.

- gdb

About this email: Brockman lays out OpenAI's compensation structure for the founding team and new hires, lists competing offers from DeepMind, Facebook, Google and Apple, and asks how to handle candidates such as Andrew Tulloch and Ian Goodfellow.

Musk: pay whatever it takes or lose to DeepMind

From: Elon Musk

Date: February 22, 2016 (Sent 12:09 AM)

To: Greg Brockman (cc: Sam Altman)

Subject: compensation framework

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

We need to do what it takes to get the top talent. Let's go higher. If, at some point, we need to revisit what existing people are getting paid, that's fine.

Either we get the best people in the world or we will get whipped by Deepmind.

Whatever it takes to bring on ace talent is fine by me.

Deepmind is causing me extreme mental stress. If they win, it will be really bad news with their one mind to rule the world philosophy. They are obviously making major progress and well they should, given the talent level over there.

About this email: Musk tells Brockman to raise offers and do whatever it takes to hire top talent, saying DeepMind is causing him extreme mental stress and that its winning would be very bad.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722\) court exhibits, as transcribed in LessWrong's 'OpenAI Email Archives'](#); [Dkt. 32-8 \(Exhibit 7 to First Amended Complaint\)](#); [CourtListener docket, Musk v. Altman](#)

Altman asks Musk for \$20M a year for three years

From: Sam Altman

Date: February 25, 2016 (Sent 6:13 PM)

To: Elon Musk

Subject: cash

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

I think we're going to need more than I was originally budgeting given a) the salaries in the field and b) the speed at which you want to grow.

Can you do \$20MM a year for the each of the next 3 years? I can do \$10MM/year, and we'll have brought \$5MM a year from other donors.

Sam

About this email: Altman says OpenAI will need more than originally budgeted given salaries and Musk's desired growth rate, and asks Musk for \$20M a year for three years alongside \$10M a year from Altman and \$5M from other donors.

Notes: Subject line inferred from the replies ('Re: cash'). Email addresses are redacted in the public version.

Brockman checks Wired fact-check answers with Musk

From: Greg Brockman

Date: March 21, 2016 (Sent 12:53 AM)

To: Elon Musk (cc: Sam Teller)

Subject: wired article

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Hi Elon,

I was interviewed for a Wired article on OpenAI, and the fact checker sent me some questions. Wanted to sync with you on two in particular to make sure they sound reasonable / aligned with what you'd say:

> Would it be accurate to say that OpenAI is giving away ALL of its research?

At any given time, we will take the action that is likely to most strongly benefit the world. In the short term, we believe the best approach is giving away our research. But longer-term, this might not be the best approach: for example, it might be better not to immediately share a potentially dangerous technology. In all cases, we will be giving away all the benefits of all of our research, and want those to accrue to the world rather than any one institution.

> Does OpenAI believe that getting the most sophisticated AI possible in as many hands as possible is humanity's best chance at preventing a too-smart AI in private hands that could find a way to unleash itself on the world for malicious ends?

We believe that using AI to extend individual human wills is the most promising path to ensuring AI remains beneficial. This is appealing because if there are many agents with about the same capabilities they could keep any one bad actor in check. But I wouldn't claim we have all the answers: instead, we're building an organization that can both seek those answers, and take the best possible action regardless of what the answer turns out to be.

Thanks!

- gdb

About this email: Brockman runs past Musk his proposed answers to a Wired fact-checker on whether OpenAI gives away all its research and whether widely distributed AI is the best safeguard.

Notes: Lines beginning '>' are the fact-checker's questions quoted in the email.

Musk asks Nvidia's Huang for an early DGX-1

From: Elon Musk

Date: April 13, 2016 (Sent Wednesday 12:01 AM)

To: Jensen Huang (Nvidia CEO)

Subject: DGX-1

FULL TEXT · OUTSIDE & PERSONAL · COURT RECORD · CONFIRMED

can OpenAI buy one of the early units? The team was asking me about this earlier today.

OpenAI is unaffiliated with Tesla. It is a non-profit funded by me and a few others with the goal of developing safe AGI (and hopefully not paving the road to hell with good intentions).

About this email: Musk asks Nvidia CEO Jensen Huang whether OpenAI can buy one of the first DGX-1 supercomputers, describing OpenAI as a nonprofit unaffiliated with Tesla and funded by him and a few others.

Notes: Sent from Musk's Tesla address. Also shown at the 2026 jury trial (reported as trial Exhibit 70).

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\)](#), Dkt. 379-74 (Exhibit 34, filed Jan. 6, 2026); [The Verge](#), 'All the evidence unveiled so far in Musk v. Altman' (Apr 2026); [Olhar Digital summary of trial exhibits \(Apr 30, 2026\)](#)

NYT asks for Musk's reaction to Zuckerberg

From: Sam Teller (forwarding Alex Thompson, The New York Times)

Date: April 27, 2016 (Alex Thompson emailed Sam Teller at 7:25 AM; Teller forwarded it to Musk at 11:03 AM)

To: Elon Musk

Subject: Re: Maureen Dowd

FULL TEXT · PRESS & JOURNALISTS · COURT RECORD · CONFIRMED

Hi Sam,

I hope you are having a great day and I apologize for interrupting it with another question. Maureen wanted to see if Mr. Musk had any reaction to some of Mr. Zuckerberg's public comments since their interview. In particular, his labelling of Mr. Musk as "hysterical" for his A.I. fears and lectured those who "fearmonger" about the dangers of A.I.. I have included more details below of Mr. Zuckerberg's comments.

Asked in Germany recently about Musk's forebodings, Zuckerberg called them "hysterical" and praised A.I. breakthroughs, including one system he claims can make cancer diagnoses for skin lesions on a mobile phone with the accuracy of "the best dermatologist."

"Unless we really mess something up," he said, the machines will always be subservient, not "superhuman."

"I think we can build A.I. so it works for us and helps us...Some people fearmonger about how A.I. is a huge danger, but that seems farfetched to me and much less likely than disasters due to widespread disease, violence, etc." Or as he put his philosophy at an April Facebook developers conference: "Choose hope over fear."

--

Alex Thompson

The New York Times

About this email: Musk's chief of staff forwards a query from a New York Times researcher working with Maureen Dowd asking for Musk's response to Mark Zuckerberg calling his AI fears 'hysterical'.

Notes: Text is the journalist's message as forwarded by Sam Teller; the exhibit (Dkt. 32-10) shows no covering note from Teller.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722\)](#) court exhibits, as transcribed in LessWrong's 'OpenAI Email Archives'; [Dkt. 32-10 \(Exhibit 9 to First Amended Complaint\)](#); [CourtListener](#) docket, [Musk v. Altman](#)

Musk's statement on Zuckerberg and why OpenAI exists

From: Elon Musk

Date: April 27, 2016 (Sent 12:24 PM)

To: Sam Teller

Subject: Re: Maureen Dowd

FULL TEXT · PRESS & JOURNALISTS · COURT RECORD · CONFIRMED

History unequivocally illustrates that a powerful technology is a double-edged sword. It would be foolish to assume that AI, arguably the most powerful of all technologies, only has a single edge.

The recent example of Microsoft's AI chatbot shows how quickly it can turn incredibly negative. The wise course of action is to approach the advent of AI with caution and ensure that its power is widely distributed and not controlled by any one company or person.

That is why we created OpenAI.

About this email: Musk drafts a response for the New York Times: powerful technology is a double-edged sword, Microsoft's chatbot shows how fast AI can turn negative, and AI's power should be widely distributed, which is why OpenAI was created.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722\)](#) court exhibits, as transcribed in LessWrong's 'OpenAI Email Archives'; [Dkt. 32-10 \(Exhibit 9 to First Amended Complaint\)](#); [CourtListener](#) docket, [Musk v. Altman](#)

Birchall flags self-dealing risk on OpenAI building lease

From: Jared Birchall

Date: June 13, 2016 (Sent 2:19 PM)

To: Elon Musk

Subject: Pioneer building lease

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

The myCFO team suggests that having the Musk foundation lease a building for OpenAI is a problem because you are a director/chair of OpenAI. Because the foundation now has assets in excess of \$2 million, there will be an obligatory audit of the foundation. The lease would need to be disclosed. This could become a 'self dealing' issue in the eyes of the IRS because of your fiduciary position with both organizations. The way around it is to have the lease cosigned with OpenAI and another one of your entities - like Musk industries. We can still make the payments through the donor advised fund or the Musk foundation, but the lease wouldn't have to be disclosed as a Musk foundation transaction. Are you OK proceeding as outlined?

Jared J Birchall
Managing Director
Musk Family Office

About this email: Musk's family-office head warns that having the Musk Foundation lease a building for OpenAI could be seen as self-dealing because Musk chairs OpenAI, and proposes co-signing the lease with OpenAI and another Musk entity.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\), Dkt. 391-8 \(Exhibit 38, public redacted version, filed Jan. 16, 2026\)](#)

Birchall weekly update: OpenAI's \$5M quarterly request

From: Jared Birchall

Date: July 9, 2016 (Sent 12:03 AM)

To: Elon Musk

Subject: Weekly Update

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Elon - I hope the trip has gone well! Attached is your weekly balance sheet update. You can 'ignore links' when it asks.

Confidential

- I spoke with Chris Clark yesterday and he requested that we send the quarterly \$5MM commitment at the beginning of the quarter - which is now. The only problem is we don't have sufficient cash to make that happen. We have \$150k in the Foundation and \$1.8 mil in the DAF. The foundation would need to sell some shares in order to generate the necessary cash. I share your desire to hold off for better valuations, but if we want to accommodate this request we'd need to gift 23k shares to the DAF where they would provide the payment. Thoughts?
- We will also have the ~\$150k payable each month for rent. That's another \$600k this year, in addition to the \$600k we'll need to support the USC project (among a few other commitments). Plus another \$10MM committed in January.
- Chris asked me about using the extra space in the building for some of the Y Combinator companies. I told him to hold off on any of those plans until I talk it through with you.
- As suggested, I have requested a copy of all the OpenAI formation documents and am awaiting these from Chris.

Jared J Birchall
Managing Director
Musk Family Office

About this email: Musk's family-office head reports that OpenAI's Chris Clark wants the quarterly \$5M commitment sent now but cash is short, lists rent and other commitments, and says Clark asked about using spare building space for YC companies.

Notes: Public redacted version; parts of the weekly update may be redacted.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\)](#), Dkt. 391-42 (Exhibit 18, [public redacted version](#), filed Jan. 16, 2026)

Subject: Re: Weekly Update

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Did we pay the last OpenAI installment at beginning of quarter? If so, we should continue on that track. I committed to \$5M per quarter. It's fine to take the actions necessary for that support. Just need to know in advance if anything is going to generate press.

Please ask for (ideally electronic) copies of everything at OpenAI, including all offer letters plus anything else and lmk if there is anything concerning. Who is responsible for administrative work there? I have had very little bandwidth to think about the company and am a little worried that it is being managed as an extension of YCombinator. The YC stock as comp for many who joined obviously incents them in that direction. Does everyone have YC stock? That would be weird.

When exactly does the building become available and the rent start? I would like to use part of the building for Neuralink at some point, so no YC stuff.

About this email: Musk reaffirms his \$5M-per-quarter commitment, asks for copies of all OpenAI documents including offer letters, worries the company is being managed as an extension of Y Combinator, and says he wants part of the building for Neuralink.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\)](#), Dkt. 391-42 (Exhibit 18, [public redacted version](#), filed Jan. 16, 2026)

Birchall: no OpenAI entity existed to receive April payment

From: Jared Birchall

Date: July 9, 2016 (Sent 9:03 PM)

To: Elon Musk

Subject: Re: Weekly Update

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

We were supposed to begin the quarterly contributions to OpenAI in April, but because they didn't have an entity in place to even make a contribution we didn't pay. They scrambled and in June started using another 501(c)3 as a conduit until OpenAI is officially granted 501(c)3 status. We verified the conduit and just made the first payment in June. The application process is long and tedious. I'm not sure why they have taken so long to apply, but my inquiry lit a fire under them. Earlier today I received all the electronic formation documents for OpenAI, as well as for the conduit organization and have started going through them. I will request the other docs as well.

The plan is to always give through the DAF so no press is generated on that front. I'll keep tabs on other items that could potentially generate press.

The building rent starts August 15th. Atit already has our first month's rent. He'll make the building available as needed for planning and prep.

About this email: Birchall explains that quarterly contributions were due to start in April but OpenAI had no entity able to receive them, so the first payment went in June through another 501(c)(3) acting as a conduit; rent on the building starts August 15.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\)](#), Dkt. 391-42 (Exhibit 18, public redacted version, filed Jan. 16, 2026)

Birchall: OpenAI has received \$5.5M via the DAF

From: Jared Birchall

Date: July 10, 2016 (Sent 5:42:53 AM PDT)

To: Elon Musk

Subject: Re: Weekly Update

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

OpenAI has received \$5.5MM from you. But it was sent from the DAF and was channeled through the temporary 501(c)3 that they are using. Anyone who has given any money to OpenAI has gone the same route at this point.

About this email: Birchall reassures Musk that OpenAI has received \$5.5M from him, sent from his donor-advised fund through the temporary 501(c)(3) all donors are using.

Sources: [Musk v. Altman \(N.D. Cal., No. 4:24-cv-04722-YGR\)](#), Dkt. 391-42 (Exhibit 18, public redacted version, filed Jan. 16, 2026)

Altman sends Microsoft's Azure term sheet

From: Sam Altman

Date: September 16, 2016 (Sent 2:37 PM)

To: Elon Musk (cc: Sam Teller)

Subject: MSFT hosting deal

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Here are the MSFT terms. \$60MM of compute for \$10MM, and input from us on what they deploy in the cloud. LMK if you have any feedback.

Sam

Microsoft/OpenAI Terms

Microsoft and OpenAI: Accelerate the development of deep learning on Azure and CNTK

This non-binding term sheet ("Term Sheet") between Microsoft Corporation ("Microsoft") and OpenAI ("OpenAI") sets forth the terms for a potential business relationship between the parties. This Term Sheet is intended to form a basis of

discussion and does not state all matters upon which agreement must be reached before executing a legally binding commercial agreement ("Commercial Agreement"). The existence and terms of this Term Sheet, and all discussions related thereto or to a Commercial Agreement, are Confidential Information as defined and governed by the Non-Disclosure Agreement between the parties dated 17 March, 2016 ("NDA"). Except for the binding nature of the foregoing confidentiality obligations, this Term Sheet is non-binding.

Deal Purpose

OpenAI is focused on deep learning in such a way as to benefit humanity. Microsoft and OpenAI desire to partner to enable the acceleration of deep learning on Microsoft Azure. Towards this goal, Microsoft will provide OpenAI with Azure compute capabilities at a favorable price that would enable OpenAI to continue their mission effectively.

Deal Business Goal

Microsoft

- Accelerate deep learning environment on Azure
- Attract a net new audience of next generation developers
- Joint PR and evangelism of deep learning on Azure

OpenAI

- Deeply discounted GPU compute offering over the deal term (3 years) for use in their nonprofit research: \$60m of Compute for \$10m
- Joint PR and evangelism of OpenAI on Azure

Parties (Legal entities) Microsoft OpenAI

Proposed Deal Execution Date September 19, 2016

Proposed Deal Commencement Date Same as deal execution date

Legal Authoring Microsoft holds the pen.

Deal Term 3 years

Engineering Terms

- Compute: Microsoft will provide OpenAI GPU core hours of compute at the agreed upon price for OpenAI's workloads to run in Azure.
- Geographic Location: Geographic location decisions will be at Microsoft discretion depending on capacity and availability. Microsoft will also be responsible for sharing the deployment strategy and timelines with OpenAI.
- SLA: For all Virtual Machines that have two or more instances deployed in the same availability set, Microsoft guarantee OpenAI will have virtual machine connectivity to at least one instance at least 99.95% of the time. Microsoft will be held accountable to the SLA's provided on https://azure.microsoft.com/enus/support/legal/sla/virtual-machines/v1_2/
- Evaluation, Evangelization, and Usage of CNTK v2, Azure Batch and HD-Insight: OpenAI will evaluate CNTK v2, Azure Batch, and HDInsight for their research, provide feedback on how Microsoft can improve these products. OpenAI will work with

Microsoft to evangelize these products to their research and developer ecosystems, and evangelize Microsoft Azure as their preferred public cloud provider. At their sole discretion, and as it makes sense for their research, OpenAI will adopt these products

- Ramp: Microsoft and OpenAI will work together for creating a ramp plan that balances capacity per clusters. The initial timeline for ramp is a minimum of 30 days that will be augmented by Microsoft's capacity expansion plans in the coming months.
- Capacity: OpenAI will be given an allocation of capacity in the preview cluster (located in US South Central) for short term requirements and Microsoft will provide quota access to the subsequent K80 GPU clusters that go live in the 4th quarter of 2016 with the intention of more capacity in Q1 2017 (calendar year).

Financial Terms

- Financial Terms: Microsoft will offer \$60m worth of List Compute (including GPU) at a deep discount which results in a price of \$10m to be paid by OpenAI over the course of the deal. In the event OpenAI consumes less than \$10m worth of Azure compute, OpenAI will be responsible for paying the balance between the used amount and \$10m at the end of the deal term to Microsoft.

Marketing & PR Terms

Microsoft and OpenAI commit to jointly evangelizing deep learning capabilities on Azure as agreed upon by both parties.

- Ignite: Announce the partnership at Microsoft's Ignite event with executives (Sam Altman from OpenAI and Satya Nadella from Microsoft) from both parties inaugurating the collaboration
- PR: Microsoft and OpenAI will work together to issue a joint press release about the partnership including any materials such as blog posts and videos.

About this email: Altman forwards Microsoft's proposed terms, \$60M of Azure compute for \$10M plus OpenAI feedback and joint evangelism, and asks Musk for feedback.

Notes: The Microsoft/OpenAI non-binding term sheet is reproduced in the email as published; its original table layout is flattened in the transcription.

Sutskever's first bi-weekly update: compute, Dota, robotics

From: Ilya Sutskever

Date: June 12, 2017

To: Greg Brockman, [redacted], Elon Musk

Subject: Bi-weekly updates

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

This is the first of our bi-weekly updates. The goal is to keep you up to date, and to help us make greater use from your visits.

Compute:

- Compute is used in two ways: it is used to run a big experiment quickly, and it is used to run many experiments in parallel.
- 95% of progress comes from the ability to run big experiments quickly. The utility of running many experiments is much less useful.
- In the old days, a large cluster could help you run more experiments, but it could not

help with running a single large experiment quickly.

- For this reason, an academic lab could compete with Google, because Google's only advantage was the ability to run many experiments. This is not a great advantage.
- Recently, it has become possible to combine 100s of GPUs and 100s of CPUs to run an experiment that's 100x bigger than what is possible on a single machine while requiring comparable time. This has become possible due to the work of many different groups. As a result, the minimum necessary cluster for being competitive is now 10-100x larger than it was before.
- Currently, every Dota experiment uses 1000+ cores, and it is only for the small 1v1 variant, and on extremely small neural network policies. We will need more compute to just win the 1v1 variant. To win the full 5v5 game, we will need to run fewer experiments, where each experiment is at least 1 order of magnitude larger (possibly more!).
- TLDR: What matters is the size and speed of our experiments. In the old days, a big cluster could not let anyone run a larger experiment quickly. Today, a big cluster lets us run a large experiment 100x faster.
- In order to be capable of accomplishing our projects even in theory, we need to increase the number of our GPUs by a factor of 10x in the next 1-2 months (we have enough CPUs). We will discuss the specifics in our in-person meeting.

Dota 2:

- We will solve the 1v1 version of the game in 1 month. Fans of the game care about 1v1 a fair bit.
- We are now at a point where a single experiment consumes 1000s of cores, and where adding more distributed compute increases performance.
- Here is a cool video of our bot doing something rather clever:
<https://www.youtube.com/watch?v=Y-vxbREX5ck&feature=youtu.be&t=99>.

Rapid learning of new games:

- Infra work is underway
- We implemented several baselines
- Fundamentally, we're not where we want to be, and are taking action to correct this.

Robotics:

- Current status: The HER algorithm (https://www.youtube.com/watch?v=Dz_HuzgMzxo) can learn to solve many low-dimensional robotics tasks that were previously unsolvable very rapidly. It is non-obvious, simple, and effective.
- In 6 months, we will accomplish at least one of: single-handed Rubik's cube, pen spinning (<https://www.youtube.com/watch?v=dDavyRnEPrI>), Chinese balls spinning (<https://www.youtube.com/watch?v=M9N1duIl4Fc>) using the HER algorithm and using a sim2real method [such as <https://blog.openai.com/spam-detection-in-the-physical-world/>].
- The above will be deployed on the robotic hand: [Link to Google Drive] [this video is human controlled, not algorithmic controlled. Need to be logged in to the OpenAI account to see the video].

Self play as a key path to AGI:

- Self play in multiagent environments is magical: if you place agents into an environment, then no matter how smart (or not smart) they are, the environment will provide them with the exact level of challenge, which can be faced only by outsmarting the competition. So for example, if you have a group of children, they will find each other's company to be challenging; likewise for a collection of super intelligences of comparable intelligence. So the "solution" to self-play is to become more and more intelligent, without bound.
- Self-play lets us get "something out of nothing." The rules of a competitive game can be simple, but the best strategy for playing this game can be immensely complex. [motivating example: <https://www.youtube.com/watch?v=u2T77mQmJYI>].
- Training agents in simulation to develop very good dexterity via competitive fighting, such as wrestling. Here is a video of ant-shaped robots that we trained to struggle: <redacted>
- Current work on self-play: getting agents to learn to develop a language [gifs in <https://blog.openai.com/learning-to-cooperate-compete-and-communicate/>]. Agents are doing "stuff," but it's still work in progress.

We have a few more cool smaller projects. Updates to be presented as they produce significant results.

About this email: Sutskever sends Musk the first of a planned series of bi-weekly progress updates, arguing that large fast experiments drive progress and that OpenAI needs 10x more GPUs within one to two months, and reporting on Dota 2, robotics and self-play.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Published by OpenAI in its Dec 2024 blog post (marked as blog-sourced in the LessWrong archive). One Google Drive link was rendered by the retrieval tool as '[Link to Google Drive]' rather than the full URL; one link is redacted in the source.

Musk: make sure compute is not a constraint

From: Elon Musk

Date: June 13, 2017

To: Ilya Sutskever; cc Greg Brockman, [redacted]

Subject: Re: Bi-weekly updates

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

Ok. Let's figure out the least expensive way to ensure compute power is not a constraint...

About this email: Replying the next morning to Sutskever's request for 10x more GPUs, Musk says to find the cheapest way to ensure compute does not limit OpenAI.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Jun 13, 2017 10:24 AM. Published in OpenAI's Dec 2024 blog post.

Musk pitches Nadella on 10,000 GPU servers for OpenAI

From: Elon Musk

Date: June 28, 2017

To: Ilya Sutskever, Greg Brockman; cc Sam Altman

Subject: The 10,000

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Just spoke to Satya and talked about OpenAI needing one the order of 10,000 servers with the latest Nvidia GPUs to beat the best human players at competitive eSports games.

This would obviously be a major opportunity for Microsoft to promote Azure relative to other cloud systems.

He said he'd talk internally and get back to me soon. Please send me the ideal spec for the individual servers and how they are connected. What ideally do we want Microsoft to do? Sounds like there is a good chance they will do it.

About this email: Musk reports that he has just spoken to Satya Nadella about OpenAI needing on the order of 10,000 servers with the latest Nvidia GPUs to beat top human esports players, pitched as an Azure marketing opportunity, and asks for the ideal server spec.

Notes: Text taken from the PDF text layer of the court exhibit as filed on the Musk v. Altman docket (N.D. Cal. 4:24-cv-04722), via CourtListener/RECAP. Sent Wed, 28 Jun 2017 14:10:58 -0700. 'one the order' is as written in the exhibit. Paragraph breaks inferred from the line layout. The same email is Ex. 11 to the Eynon Declaration (Dkt. 353).

Sutskever: 'The business of building AGI'

From: Ilya Sutskever

Date: July 12, 2017

To: Elon Musk, Greg Brockman

Subject: The business of building AGI

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

We usually decide that problems are hard because smart people have worked on them unsuccessfully for a long time. It's easy to think that this is true about AI. However, the past five years of progress have shown that the earliest and simplest ideas about AI — neural networks — were right all along, and we needed modern hardware to get them working.

Historically, AI breakthroughs have consistently happened with models that take between 7-10 days to train. This means that hardware defines the surface of potential AI breakthroughs. This is a statement about human psychology more than about AI. If experiments take longer than this, it's hard to keep all the state in your head and iterate and improve. If experiments are shorter, you'll just use a bigger model.

It's not so much that AI progress is a hardware game, any more than physics is a particle accelerator game. But if our computers are too slow, no amount of cleverness will result in AGI, just like if a particle accelerator is too small, we have no shot at figuring out how the universe works. Fast enough computers are a necessary ingredient, and all past failures may have been caused by computers being too slow for AGI.

Until very recently, there was no way to use many GPUs together to run faster experiments, so academia had the same "effective compute" as industry. But earlier this year, Google used two orders of magnitude more compute than is typical to optimize the architecture of a classifier, something that usually requires lots of researcher time. And a few months ago, Facebook released a paper showing how to train a large ImageNet model with near-linear speedup to 256 GPUs (given a specially-configured cluster with high-bandwidth interconnects).

Over the past year, Google Brain produced impressive results because they have an order of magnitude or two more GPUs than anyone. We estimate that Brain has around 100k GPUs, FAIR has around 15-20k, and DeepMind allocates 50 per researcher on question asking, and rented 5k GPUs from Brain for AlphaGo. Apparently, when people run neural networks at Google Brain, it eats up everyone's quotas at DeepMind.

We're still missing several key ideas necessary for building AGI. How can we use a system's understanding of "thing A" to learn "thing B" (e.g. can I teach a system to count, then to multiply, then to solve word problems)? How do we build curious systems? How do we train a system to discover the deep underlying causes of all types of phenomena — to act as a scientist? How can we build a system that adapts to new situations on which it hasn't been trained on precisely (e.g. being asked to apply familiar concepts in an unfamiliar situation)? But given enough hardware to run the relevant experiments in 7-10 days, history indicates that the right algorithms will be found, just like physicists would quickly figure out how the universe works if only they had a big

enough particle accelerator.

There is good reason to believe that deep learning hardware will speed up 10x each year for the next four to five years. The world is used to the comparatively leisurely pace of Moore's Law, and is not prepared for the drastic changes in capability this hardware acceleration will bring. This speedup will happen not because of smaller transistors or faster clock cycles; it will happen because like the brain, neural networks are intrinsically parallelizable, and new highly parallel hardware is being built to exploit this.

Within the next three years, robotics should be completely solved, AI should solve a long-standing unproven theorem, programming competitions should be won consistently by AIs, and there should be convincing chatbots (though no one should pass the Turing test). In as little as four years, each overnight experiment will feasibly use so much compute capacity that there's an actual chance of waking up to AGI, given the right algorithm — and figuring out the algorithm will actually happen within 2-4 further years of experimenting with this compute in a competitive multiagent simulation.

To be in the business of building safe AGI, OpenAI needs to:

- Have the best AI results each year. In particular, as hardware gets exponentially better, we'll have dramatically better results. Our DOTA and Rubik's cube projects will have impressive results for the current level of compute. Next year's projects will be even more extreme, and what's realistic depends primarily on what compute we can access.
- Increase our GPU cluster from 600 GPUs to 5000 GPUs ASAP. As an upper bound, this will require a capex of \$12M and an opex of \$5-6M over the next year. Each year, we'll need to exponentially increase our hardware spend, but we have reason to believe AGI can ultimately be built with less than \$10B in hardware.
- Increase our headcount: from 55 (July 2017) to 80 (January 2018) to 120 (January 2019) to 200 (January 2020). We've learned how to organize our current team, and we're now bottlenecked by number of smart people trying out ideas.
- Lock down an overwhelming hardware advantage. The 4-chip card that Jim Keller says he can build in 2 years is effectively TPU 3.0 and (given enough quantity) would allow us to be on an almost equal footing with Google on compute. The Cerebras design is far ahead of both of these, and if they're real then having exclusive access to them would put us far ahead of the competition. We have a structural idea for how to do this given more due diligence, best to discuss on a call.

2/3/4 will ultimately require large amounts of capital. If we can secure the funding, we have a real chance at setting the initial conditions under which AGI is born. Increased funding needs will come lockstep with increased magnitude of results. We should discuss options to obtain the relevant funding, as that's the biggest piece that's outside of our direct control.

Progress this week:

- We've beat our top 1v1 test player (he's top 30 in North America at 1v1, and beats the top 1v1 player about 30% of the time), but the bot can also be exploited by playing

weirdly. We're working on understanding these exploits and cracking down on them.

* Repeated from Saturday, here's the first match where we beat our top test player:

<https://www.youtube.com/watch?v=FBoUHay7XBI&feature=youtu.be&t=345>

* Every additional day of training makes the bot stronger and harder to exploit.

- Robot getting closer to solving Rubik's cube.

* The improved cube simulation teleoperated by a human: <redacted>.

- Our defense against adversarial examples is starting to work on ImageNet.

* We will completely solve the problem of adversarial examples by the end of August.

We also have four strong researchers leaving OpenAI:

- Peter Xi Chen, Rocky Yan Duan, and Jonathan Ho are leaving to start a robotics startup to solve all robotics manufacturing in China. They're highly motivated to start a company (Peter and Rocky had an unsuccessful startup before OpenAI).

- Alec Radford is leaving due to a mismatch in research interests (he doesn't believe AGI is near, and wants to work on what he views as shorter-term problems).

About this email: Sutskever lays out the thesis that hardware is the binding constraint on AGI, predicts 10x yearly hardware speedups, and lists what OpenAI needs: best results each year, 5,000 GPUs, headcount growth to 200 by 2020, and an overwhelming hardware advantage, all requiring large amounts of capital.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Published by OpenAI in its Dec 2024 blog post. The email ends with three blacked-out passages in the source. No reply from Musk is reproduced. Redacted passages restored from the unsealed court exhibit (Dkt. 379-77).

Zilis preps Musk: 'build AGI before anyone else', bet on hardware

From: Shivon Zilis

Date: July 18, 2017

To: Elon Musk, Sam Teller

Subject: OpenAI notes in advance of tonight's meeting

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

A quick heads up what the conversation with Greg and Ilya will look like:

OpenAI's Mission: Want to confirm what it should be. Given the AGI timelines keeps compressing, they think it should be "build AGI before anyone else" (thinking of Google and China, specifically). This isn't a departure, per se, but want to confirm that you still think the best possible future would be brought about this way? This would of course involve being much less "open" and require decisions that would prioritize speed over other considerations (safety, government involvement, etc).

Hardware: if it's true that OpenAI should dead set on building AGI before anyone else, the critical factor is hardware. They think if all resources exhausted, best you can get in terms of human capital/ ingenuity over DeepMind 2-3x, whereas if you buy that HW is

really going to depart from Moore's law and hit 10x per year it's not even a contest as to which battlefield more critical right now. They are at the point where they want to bet the farm on the right hardware strategy.

Cerebras v A Billion Cores: In an ideal world both would be pursued. Cerebras is a high beta experiment, they understand that, but think that if it succeeds it's so game changing that if Google gets it, it's game over re: race for AGI. Reason is that even if we started on a billion core system today, it's still 18 months behind and that's enough to lose the battle. Want to keep working on billion core idea since higher probability of eventual success but think it's prudent to figure out the right strategy to still merge or exclusively partner with Cerebras as well. They believe the combined entity, assuming OpenAI converts from being a non-profit, would be more valuable?? (Note: Andrew Feldman reached out to them to discuss next steps. That meeting is planned for next week)

Dota supremacy ... but at what cost: The compute for Dota 5v5 is hard to estimate but would get into the \$50M range on the high side. They don't have perfect data but estimate that AlphaGo was somewhere in this ballpark. That begs the question of is this worth the price tag? They think yes, since it's likely to have an equal or better outcome to AlphaGo but want to both confirm that you agree and also make sure there is a path to funding should it come to that.

About this email: Before a meeting with Brockman and Sutskever, Zilis briefs Musk that they want to confirm OpenAI's mission should be to build AGI before anyone else (meaning being much less open), bet the farm on hardware, pursue a merger or exclusive partnership with Cerebras assuming OpenAI converts from a non-profit, and spend up to about \$50M on compute for Dota 5v5.

Notes: Text taken from the PDF text layer of the court exhibit as filed on the Musk v. Altman docket (N.D. Cal. 4:24-cv-04722), via CourtListener/RECAP. Sent Tuesday, July 18, 2017 1:24:27 PM. Three obvious OCR artifacts in the PDF text layer were normalised ('l Ox' to '10x', 'AGL' to 'AGI.', 'ifwe' to 'if we'); 'should dead set' is as in the exhibit. Originally filed under seal with OpenAI's summary judgment motion.

Sutskever biweekly update: for-profit structure 'coming up'

From: Ilya Sutskever

Date: July 20, 2017

To: Elon Musk, Greg Brockman

Subject: biweekly update

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

- The robot hand can now solve a Rubik's cube in simulation:

<https://drive.google.com/a/openai.com/file/d/0B60rCy4P2FOIenlLdzN2LXdiOTQ/view?usp=sharing> (needs OpenAI login)

Physical robot will do same in September

- 1v1 bot is no longer exploitable

It can no longer be beaten using "unconventional" strategies

On track to beat all humans in 1 month

- Athletic competitive robots:

<https://drive.google.com/a/openai.com/file/d/0B60rCy4P2FOIZE4wNVdlbkx6U2M/view?usp=sharing> (needs OpenAI login)

- Released an adversarial example that fools a camera from all angles simultaneously:

<https://blog.openai.com/robust-adversarial-inputs/>

- DeepMind's directly used one of our algorithms to produce their parkour results:

DeepMind's results:

<https://deepmind.com/blog/producing-flexible-behaviourssimulated-environments/>

DeepMind's technical papers explicitly state they directly used our algorithms

Our blogpost about our algorithm: <https://blog.openai.com/openai-baselines-ppo/> (DeepMind used an older version).

- Coming up:

Designing the for-profit structure

Negotiate merger terms with Cerebras

More due diligence with Cerebras

About this email: A short progress update to Musk on the robot hand, the Dota 1v1 bot and adversarial examples, ending with a 'coming up' list that includes designing the for-profit structure and negotiating a merger with Cerebras.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Indentation reconstructed from the nested bullets in the transcription.

Musk on China's AI plan: 'another reason to change course'

From: Elon Musk

Date: July 21, 2017

To: Greg Brockman, Ilya Sutskever

Subject: Beijing Wants A.I. to Be Made in China by 2030

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

They will do whatever it takes to obtain what we develop. Maybe another reason to change course.

<https://mobile.nytimes.com/2017/07/20/business/china-artificialintelligence.html?smprod=nytcore-iphone&smid=nytcore-iphone-share&referrer=>

About this email: Forwarding a news article about China's 2030 AI ambitions, Musk says China will do whatever it takes to obtain what OpenAI develops and suggests it is another reason to change course.

Notes: Sent Fri, Jul 21, 2017 at 3:34 AM. Body from the LessWrong transcription of OpenAI's Dec 2024 blog post; the article link is taken from the unredacted chain filed as Ex. 51 to the Wiener Declaration (Dkt. 328-55), whose OCR text layer garbles the URL slightly (it is shown here as the retrieval tool normalised it).

Sources: [OpenAI blog: Elon Musk wanted an OpenAI for-profit \(Dec 13, 2024\)](#); [LessWrong: OpenAI Email Archives \(from Musk v. Altman and OpenAI blog\)](#); [Musk v. Altman, Dkt. 328-55 \(Ex. 51 to Wiener Declaration; full unredacted chain\)](#)

Tags: china, for-profit, strategy, national-security

Brockman: non-profit, then for-profit, then government project

From: Greg Brockman

Date: July 21, 2017

To: Elon Musk; cc Ilya Sutskever

Subject: Re: Beijing Wants A.I. to Be Made in China by 2030

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

100% agreed. We think the path must be:

1. AI research non-profit (through end of 2017)
2. AI research + hardware for-profit (starting 2018)
3. Government project (when: ??)

Government project is helpful for financial resources, but crucial for security - don't know how to defend against Putin or North Korea otherwise. When ready, we must proactively form the project around us, rather than being slurped in against our will.

-gdb

About this email: Brockman agrees with Musk and sketches a three-stage path: research non-profit through 2017, a research-plus-hardware for-profit from 2018, and eventually a government project, which he calls crucial for security against Putin or North Korea.

Notes: The paragraph about a government project was blacked out in OpenAI's Dec 2024 blog post and in the LessWrong archive; it appears unredacted in the chain filed as Ex. 51 to the Wiener Declaration (Dkt. 328-55, Oct 17, 2025), from which this text is taken. The exhibit quotes the message as sent 'Jul 22, 2017, at 4:32 AM' (time zone of the quoting client); the blog post gives Jul 21, 2017 1:18 PM.

Sources: [OpenAI blog: Elon Musk wanted an OpenAI for-profit \(Dec 13, 2024\)](#); [LessWrong: OpenAI Email Archives \(from Musk v. Altman and OpenAI blog\)](#); [Musk v. Altman, Dkt. 328-55 \(Ex. 51 to Wiener Declaration; full unredacted chain\)](#)

Musk offers OpenAI leaders Founder Series Model 3s

From: Elon Musk

Date: July 21, 2017

To: Ilya Sutskever, Greg Brockman (reply on the 'Beijing' thread)

Subject: Re: Beijing Wants A.I. to Be Made in China by 2030 - NYTimes.com

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

By the way, in appreciation for what you've done to get OpenAI to where it is today, I would like to give you each a Founder Series Model 3. These are the earliest cars produced and are not available to the public.

If there are a few others at OpenAI who you think also really deserve one (maybe Wojciech?), I am happy to do the same for them.

Hope you like it!

Elon

About this email: Minutes after agreeing to discuss a change of course for OpenAI, Musk tells Sutskever and Brockman he wants to give each of them a Founder Series Tesla Model 3 in appreciation, and offers the same for a few other deserving staff.

Notes: Text taken from the PDF text layer of the court exhibit as filed on the Musk v. Altman docket (N.D. Cal. 4:24-cv-04722), via CourtListener/RECAP. Quoted in the chain as sent 'Fri, Jul 21, 2017 at 1:25 PM'. This part of the thread was not included in OpenAI's Dec 2024 blog post. OpenAI's summary judgment filing says Musk donated the four vehicles to OpenAI to be given to four employees as bonuses.

Sources: [Musk v. Altman, Dkt. 328-55 \(Ex. 51 to Wiener Declaration, Bates OPENAI_MUSK00020777\)](#)

Zilis relays Brockman and Sutskever's seven open questions

From: Shivon Zilis

Date: August 28, 2017

To: Elon Musk; cc Sam Teller

Subject: OpenAI notes

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Elon,

As I'd mentioned, Greg had asked to talk through a few things this weekend. Ilya ended up joining, and they pretty much just shared all of what they are still trying to think through. This is the distillation of that random walk of a conversation... came down to 7

unanswered questions with their commentary below. Please note that I'm not advocating for any of this, just structuring and sharing the information I heard.

1. Short-term control structure?

-Is the requirement for absolute control? They wonder if there is a scenario where there could be some sort of creative overrule provision if literally everyone else disagreed on direction (not just the three of them, but perhaps a broader board)?

2. Duration of control and transition?

-The non-negotiable seems to be an ironclad agreement to not have any one person have absolute control of AGI if it's created. Satisfying this means a situation where, regardless of what happens to the three of them, it's guaranteed that power over the company is distributed after the 2-3 year initial period.

3. Time spent?

-How much time does Elon want to spend on this, and how much time can he actually afford to spend on this? In what timeframe? Is this an hour a week, ten hours a week, something in between?

4. What to do with time spent?

-They don't really know how he prefers to spend time at his other companies and how he'd want to spend his time on this. Greg and Ilya are confident they could build out SW / ML side of things pretty well. They are not confident on the hardware front. They seemed hopeful Elon could spend some time on that since that's where they are weak, but did want his help in all domains he was interested in.

5. Ratio of time spent to amount of control?

-They are cool with less time / less control, more time / more control, but not less time / more control. Their fear is that there won't be enough time to discuss relevant contextual information to make correct decisions if too little time is spent.

6. Equity split?

-Greg still instinctually anchored on equal split. I personally disagree with him on that instinct and he asked for and was receptive to hearing other things he could use to recalibrate his mental model.

-Greg noted that Ilya in some ways has contributed millions by leaving his earning potential on the table at Google.

-One concern they had was the proposed employee pool was too small.

7. Capitalization strategy?

-Their instinct is to raise much more than \$100M out of the gate. They are of the opinion that the datacenter they need alone would cost that so they feel more comfortable raising more.

Takeaways:

Unsure if any of this is amenable but just from listening to all of the data points they threw out, the following would satisfy their current sticky points:

- Spending 5-10 hours a week with near full control, or spend less time and have less control.
- Having a creative short-term override just for extreme scenarios that was not just Greg / Sam / Ilya.
- An ironclad 2-3yr minority control agreement, regardless of the fates of Greg / Sam / Ilya.
- \$200M-\$1B initial raise.
- Greg and Ilya's stakes end up higher than 1/10 of Elon's but not significantly (this remains the most ambiguous).
- Increasing employee pool.

About this email: Zilis reports to Musk on a weekend conversation with Brockman and Sutskever, distilling seven unresolved questions about the proposed for-profit: control, its duration, Musk's time commitment, equity split and capitalization, noting their non-negotiable that no one person have absolute control of AGI.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Aug 28, 2017 12:01 AM. Bold/italic emphasis in the transcription (section headings; 'The' in item 2) is not preserved.

Birchall: holding the quarterly \$5M to OpenAI — 'Continue to hold?'

From: Jared Birchall

Date: August 29, 2017

To: Elon Musk

Subject: Re: Q3 2017 Grant

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

For now I have held off on the quarterly \$5M. Continue to hold?

[Forwarded message from Chris Clark (OpenAI) to Jared Birchall, Mon, Aug 28, 2017 at 12:32 PM, subject "Q3 2017 Grant":]

Hi Jared,

I just wanted to check in re: Q3 2017 grant. The compute payment covering what we used for the Dota project (the one that got all the press a couple weeks ago) will likely be due in Sept, so I wanted to double check on timing.

Thanks,
Chris

About this email: Forwarding an OpenAI request about the Q3 2017 grant, Musk's family-office head Jared Birchall says he has held off on the quarterly \$5 million and asks whether to keep holding it.

Notes: Text taken from the PDF text layer of the court exhibit as filed on the Musk v. Altman docket (N.D. Cal. 4:24-cv-04722), via CourtListener/RECAP. Sent Aug 29, 2017 at 12:07 AM, the day after Musk told Zilis 'I've had enough'. The bracketed line is an editorial label for the forwarded message quoted beneath Birchall's note.

Musk's board and control proposal for the for-profit

From: Elon Musk

Date: September 13, 2017

To: Ilya Sutskever; cc Greg Brockman

Subject: Re: Current State

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Sounds good. The three common stock seats (you, Greg and Sam) should be elected by common shareholders. They will de facto be yours, but not in the unlikely event that you lose the faith of a huge percentage of common stockholders over time or step away from the company by choice.

I think that the Preferred A investment round (supermajority me) should have the right to appoint four (not three) seats. I would not expect to appoint them immediately, but, like I said I would unequivocally have initial control of the company, but this will change quickly.

The rough target would be to get to a 12 person board (probably more like 16 if this board really ends up deciding the fate of the world) where each board member has a deep understanding of technology, at least a basic understanding of AI and strong & sensible morals.

Apart from the Series A four and the Common three, there would likely be a board member with each new lead investor/ally. However, the specific individual new board members can only be added if all but one existing board member agrees. Same for removing board members.

There will also be independent board members we want to add who aren't associated with an investor. Same rules apply: requires all but one of existing directors to add or remove.

I'm super tired and don't want to overcomplicate things, but this seems approx right. At the sixteen person board level, we would have 7/16 votes and I'd have a 25% influence, which is my min comfort level. That sounds about right to me. If everyone else we asked to join our board is truly against us, we should probably lose.

As mentioned, my experience with boards (assuming they consist of good, smart people) is that they are rational and reasonable. There is basically never a real hardcore battle where an individual board vote is pivotal, so this is almost certainly (sure hope so) going to be a moot point.

As a closing note, I've been really impressed with the quality of discussion with you guys on the equity and board stuff. I have a really good feeling about this.

Lmk if above seems reasonable.

Elon

About this email: Musk sets out his terms for the planned for-profit: three common-stock seats for Sutskever, Brockman and Altman, four seats for his Preferred A round, and 'unequivocal' initial control that he says would dilute as the board grew to 12-16 members, leaving him about 25% influence.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Sep 13, 2017 12:40 AM. The message it replies to ('Current State') is not reproduced in the archive. Also shown in OpenAI's Dec 2024 blog post.

'Honest Thoughts': Sutskever and Brockman on control of AGI

From: Ilya Sutskever

Date: September 20, 2017

To: Elon Musk, Sam Altman; cc Greg Brockman, Sam Teller, Shivon Zilis

Subject: Honest Thoughts

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Elon, Sam,

This process has been the highest stakes conversation that Greg and I have ever participated in, and if the project succeeds, it'll turn out to have been the highest stakes conversation the world has seen. It's also been a deeply personal conversation for all of us.

Yesterday while we were considering making our final commitment given the non-solicit agreement, we realized we'd made a mistake. We have several important concerns that we haven't raised with either of you. We didn't raise them because we were afraid to: we were afraid of harming the relationship, having you think less of us, or losing you as partners.

There is some chance that our concerns will prove to be unresolvable. We really hope it's not the case, but we know we will fail for sure if we don't all discuss them now. And we have hope that we can work through them and all continue working together.

Elon:

We really want to work with you. We believe that if we join forces, our chance of success in the mission is the greatest. Our upside is the highest. There is no doubt about that. Our desire to work with you is so great that we are happy to give up on the equity, personal control, make ourselves easily firable — whatever it takes to work with you.

But we realized that we were careless in our thinking about the implications of control for the world. Because it seemed so hubristic, we have not been seriously considering the implications of success.

The current structure provides you with a path where you end up with unilateral absolute control over the AGI. You stated that you don't want to control the final AGI, but during this negotiation, you've shown to us that absolute control is extremely important to you.

As an example, you said that you needed to be CEO of the new company so that everyone will know that you are the one who is in charge, even though you also stated that you hate being CEO and would much rather not be CEO.

Thus, we are concerned that as the company makes genuine progress towards AGI, you will choose to retain your absolute control of the company despite current intent to the contrary. We disagree with your statement that our ability to leave is our greatest power, because once the company is actually on track to AGI, the company will be much more important than any individual.

The goal of OpenAI is to make the future good and to avoid an AGI dictatorship. You are concerned that Demis could create an AGI dictatorship. So do we. So it is a bad idea to create a structure where you could become a dictator if you chose to, especially given that we can create some other structure that avoids this possibility.

We have a few smaller concerns, but we think it's useful to mention it here:

In the event we decide to buy Cerebras, my strong sense is that it'll be done through Tesla. But why do it this way if we could also do it from within OpenAI? Specifically, the concern is that Tesla has a duty to shareholders to maximize shareholder return, which is not aligned with OpenAI's mission. So the overall result may not end up being optimal for OpenAI.

We believe that OpenAI the non-profit was successful because both you and Sam were in it. Sam acted as a genuine counterbalance to you, which has been extremely fruitful. Greg and I, at least so far, are much worse at being a counterbalance to you. We feel this is evidenced even by this negotiation, where we were ready to sweep the long-term AGI control questions under the rug while Sam stood his ground.

Sam:

When Greg and I are stuck, you've always had an answer that turned out to be deep and correct. You've been thinking about the ways forward on this problem extremely deeply and thoroughly. Greg and I understand technical execution, but we don't know how structure decisions will play out over the next month, year, or five years.

But we haven't been able to fully trust your judgements throughout this process, because we don't understand your cost function.

We don't understand why the CEO title is so important to you. Your stated reasons have changed, and it's hard to really understand what's driving it.

Is AGI truly your primary motivation? How does it connect to your political goals? How has your thought process changed over time?

Greg and Ilya:

We had a fair share of our own failings during this negotiation, and we'll list some of them here (Elon and Sam, I'm sure you'll have plenty to add...):

During this negotiation, we realized that we have allowed the idea of financial return 2-3 years down the line to drive our decisions. This is why we didn't push on the control — we thought that our equity is good enough, so why worry? But this attitude is wrong, just like the attitude of AI experts who don't think that AI safety is an issue because they don't really believe that they'll build AGI.

We did not speak our full truth during the negotiation. We have our excuses, but it was damaging to the process, and we may lose both Sam and Elon as a result.

There's enough baggage here that we think it's very important for us to meet and talk it out. Our collaboration will not succeed if we don't. Can all four of us meet today? If all of us say the truth, and resolve the issues, the company that we'll create will be much more likely to withstand the very strong forces it'll experience.

- Greg & Ilya

About this email: Sutskever and Brockman tell Musk and Altman they have unraised concerns: that the proposed structure would give Musk unilateral absolute control over AGI, that they do not understand Altman's motives for wanting to be CEO, and that they themselves let financial upside drive their negotiating. They ask for all four to meet that day.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Sep 20, 2017 2:08 PM from Sutskever's account, signed by both. Retrieved in two halves and joined at the 'Sam:' heading.

Musk: 'Guys, I've had enough. This is the final straw'

From: Elon Musk

Date: September 20, 2017

To: Ilya Sutskever, Sam Altman; cc Greg Brockman, Sam Teller, Shivon Zilis

Subject: Re: Honest Thoughts

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Guys, I've had enough. This is the final straw.

Either go do something on your own or continue with OpenAI as a nonprofit. I will no longer fund OpenAI until you have made a firm commitment to stay or I'm just being a fool who is essentially providing free funding for you to create a startup.

Discussions are over

About this email: Nine minutes after the 'Honest Thoughts' email, Musk ends the for-profit negotiations and says he will stop funding OpenAI until the founders firmly commit to stay as a nonprofit or go off on their own.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Sep 20, 2017 2:17 PM. Paragraph breaks follow the commonly published layout; the retrieval tool returned the text as a single run.

Zilis relays Altman's position after the blow-up

From: Shivon Zilis

Date: September 22, 2017

To: Elon Musk; cc Sam Teller

Subject: Re: Non-profit

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

From Altman:

Structure: Great with keeping non-profit and continuing to support it.

Trust: Admitted that he lost a lot of trust with Greg and Ilya through this process. Felt their messaging was inconsistent and felt childish at times.

Hiatus: Sam told Greg and Ilya he needs to step away for 10 days to think. Needs to figure out how much he can trust them and how much he wants to work with them. Said he will come back after that and figure out how much time he wants to spend.

Fundraising: Greg and Ilya have the belief that 100's of millions can be achieved with donations if there is a definitive effort. Sam thinks there is a definite path to 10's of millions but TBD on more. He did mention that Holden was irked by the move to for-profit and potentially offered more substantial amount of money if OpenAI stayed a non-profit, but hasn't firmly committed. Sam threw out a \$100M figure for this if it were to happen.

Communications: Sam was bothered by how much Greg and Ilya keep the whole team in the loop with happenings as the process unfolded. Felt like it distracted the team. On the

other hand, apparently in the last day almost everyone has been told that the for-profit structure is not happening and he is happy about this at least since he just wants the team to be heads down again.

About this email: Zilis passes along Altman's view: he is fine keeping the non-profit, has lost trust in Brockman and Sutskever, is taking a ten-day hiatus, and sees a path to tens of millions in donations, with Holden Karnofsky possibly offering more if OpenAI stays non-profit.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Sep 22, 2017 5:54 PM.

Brockman's New Year note: 'It's an honor to work alongside you'

From: Greg Brockman

Date: January 1, 2018

To: Elon Musk; bcc Ilya Sutskever

Subject: thank you

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Hi Elon,

We've been working together for 2 years now, and in every meeting with you I continue to learn, grow, and see the world in a new way. I particularly admire your clarity of purpose, the simple and consistent heuristics you use to evaluate decisions, and that you stick to what's right rather than what's easy.

I am grateful and humbled that you see potential in Ilya and me and are willing to give us a chance. 2017 was a hard year, and we've made mistakes, but I believe the lessons we've learned will ultimately make us successful in our mission.

It's an honor to work alongside you. Let's make sure that the post-AGI world is one that is good for humans.

- gdb

About this email: On New Year's Day 2018, Brockman thanks Musk for two years of working together, praises his clarity of purpose, and says he is grateful Musk is willing to give him and Sutskever a chance after a hard 2017.

Notes: Text taken from the PDF text layer of the court exhibit as filed on the Musk v. Altman docket (N.D. Cal. 4:24-cv-04722), via CourtListener/RECAP. Header timestamp 1/1/2018 7:56:57 AM. Offered by Musk's side as evidence of the relationship weeks before he left the board. No reply from Musk is in the exhibit.

Sutskever's New Year note: 'most overwhelmingly competent person in the world'

From: Ilya Sutskever

Date: January 1, 2018

To: Elon Musk; bcc Greg Brockman

Subject: Note

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Hi Elon,

We've been working together for almost exactly two years, so it felt appropriate to send this note.

I enjoy working together. You quickly pushed me out of my academic comfort zone. With time, I grew to appreciate the vast depth of your strategic insight -- I can think of many examples, the biggest one is the decision to build the custom hardware. I've made my share of non-negligible mistakes in 2017, but their lessons will help us overcome the harder challenges of the future.

We're trying to accomplish a difficult task, but with effort, we may be able to do it. It helps that we have the most overwhelmingly competent person in the world helping us.

Happy 2018. Let's make 2017 pale in comparison.

About this email: Sutskever marks two years of working with Musk, credits his strategic insight (above all the decision to build custom hardware), admits mistakes in 2017 and calls Musk the most overwhelmingly competent person in the world.

Notes: Text taken from the PDF text layer of the court exhibit as filed on the Musk v. Altman docket (N.D. Cal. 4:24-cv-04722), via CourtListener/RECAP. Header timestamp 1/1/2018 8:45:15 AM. No reply from Musk is in the exhibit.

Sources: [Musk v. Altman, Dkt. 379-70 \(Ex. 28 to Hawes Declaration, Bates OPENAI_MUSK00007198; unsealed Jan 6, 2026\)](#); [Neura News summary of trial exhibits \(Ex. 98\)](#)

Karpathy: Google dominates ICLR submissions

From: Andrej Karpathy

Date: January 31, 2018

To: Elon Musk; cc Shivon Zilis

Subject: Top AI institutions today

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

The ICLR conference (which is the top deep learning - specific conference (NIPS is larger, but more diffuse)) released their decisions for accepted/rejected papers, and someone made some nice plots that show where the current deep learning / AI research happens at. It's an imperfect measure because not every company might prioritize paper publications, but it's indicative.

Here's a plot that shows the total number of papers (broken down by oral/poster/workshop/rejected) from any institution:

Long story short, Google is dominating with 83 paper submissions. The academic institutions (Berkeley / Stanford / CMU / MIT) are next, in 20-30 ranges each.

Just thought it was an interesting snapshot of where all the action is today. The full data is here: <http://webia.lip6.fr/~pajot/dataviz.html>

-Andrej

About this email: Karpathy sends Musk a breakdown of ICLR paper submissions by institution, showing Google far ahead with 83 submissions and the top universities at 20-30 each.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Jan 31, 2018 1:20 PM. The original included an embedded plot.

Sources: [Musk v. Altman \(N.D. Cal.\) court exhibits](#), [CourtListener docket](#); [LessWrong: OpenAI Email Archives \(from Musk v. Altman and OpenAI blog\)](#); [Musk v. Altman, Dkt. 328-63 \(Ex. 59 to Wiener Declaration, Bates OPENAI_MUSK00000837\)](#)

Musk: 'OpenAI is on a path of certain failure relative to Google'

From: Elon Musk

Date: January 31, 2018

To: Greg Brockman, Ilya Sutskever, Sam Altman; cc Sam Teller, Shivon Zilis; fwd Andrej Karpathy's email

Subject: Fwd: Top AI institutions today

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

OpenAI is on a path of certain failure relative to Google. There obviously needs to be immediate and dramatic action or everyone except for Google will be consigned to irrelevance.

I have considered the ICO approach and will not support it. In my opinion, that would simply result in a massive loss of credibility for OpenAI and everyone associated with the ICO. If something seems too good to be true, it is. This was, in my opinion, an unwise diversion.

The only paths I can think of are a major expansion of OpenAI and a major expansion of Tesla AI. Perhaps both simultaneously. The former would require a major increase in funds donated and highly credible people joining our board. The current board situation is very weak.

I will set up a time for us to talk tomorrow. To be clear, I have a lot of respect for your abilities and accomplishments, but I am not happy with how things have been managed. That is why I have had trouble engaging with OpenAI in recent months. Either we fix things and my engagement increases a lot or we don't and I will drop to near zero and publicly reduce my association. I will not be in a situation where the perception of my influence and time doesn't match the reality.

About this email: Forwarding Karpathy's chart, Musk tells OpenAI's leaders the organization is on a path of certain failure relative to Google, rejects the ICO, says the only paths are a major expansion of OpenAI and/or Tesla AI, and threatens to cut his involvement to near zero and publicly reduce his association.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Jan 31, 2018 2:02 PM. Musk left the OpenAI board three weeks later.

Sources: [Musk v. Altman \(N.D. Cal.\) court exhibits](#), [CourtListener docket](#); [LessWrong: OpenAI Email Archives \(from Musk v. Altman and OpenAI blog\)](#); [OpenAI blog: Elon Musk wanted an OpenAI for-profit](#); [Musk v. Altman, Dkt. 328-63 \(Ex. 59 to Wiener Declaration, Bates OPENAI_MUSK00000837\)](#)

Musk asks Karpathy: 'What do you think makes sense?'

From: Elon Musk

Date: January 31, 2018

To: Andrej Karpathy

Subject: Fwd: Top AI institutions today

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

fyi

What do you think makes sense? Happy to talk by phone if that's better.

About this email: Musk forwards his 'certain failure' email to Karpathy, then at Tesla, and asks for his view.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Jan 31, 2018 2:07 PM.

Brockman's reply: expand OpenAI, keep the moral high ground

From: Greg Brockman

Date: January 31, 2018

To: Elon Musk; cc Ilya Sutskever, Sam Altman, [redacted], Shivon Zilis

Subject: Re: Top AI institutions today

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Hi Elon,

Thank you for the thoughtful note. I have always been impressed by your focus on the big picture, and agree completely we must change trajectory to achieve our goals. Let's speak tomorrow, any time 4p or later will work.

My view is that the best future will come from a major expansion of OpenAI. Our goal and mission are fundamentally correct, and that will increasingly be a superpower as AGI grows near.

Fundraising

Our fundraising conversations show that:

- Ilya and I are able to convince reputable people that AGI can really happen in the next ≤ 10 years
- There's appetite for donations from those people
- There's very large appetite for investments from those people

I respect your decision on the ICO idea, which matches the evolution of our own thinking. Sam Altman has been working on a fundraising structure that does not rely on a public offering, and we will be curious to hear your feedback.

Of the people we've been talking to, the following people are currently my top suggestions for board members. Would also love suggestions for your top picks not on this list, and we can figure out how to approach them.

- <redacted>
- <redacted>
- <redacted>
- <redacted>
- <redacted>
- <redacted> (she heads Partnership on AI, originally created by Demis to steal OpenAI's thunder - would bring a lot of outside credibility)

The next 3 years

Over the next 3 years, we must build 3 things:

- Custom AI hardware (such as <redacted> computer)
- Massive AI data center (likely multiple revs thereof)
- Best software team, mixing between algorithm development, public demonstrations, and safety

We've talked the most about the custom AI hardware and AI data center. On the software front, we have a credible path (self-play in a competitive multiagent environment) which has been validated by Dota and AlphaGo. We also have identified a small but finite number of limitations in today's deep learning which are barriers to learning from human levels of experience. And we believe we uniquely are on trajectory to solving safety (at least in broad strokes) in the next three years.

We would like to scale headcount in this way:

- Beginning of 2017: ~40
- End of 2018: 100
- End of 2019: 300
- End of 2020: 900

[redacted passage]

Moral high ground

Our biggest tool is the moral high ground. To retain this, we must:

- Try our best to remain a non-profit. AI is going to shake up the fabric of society, and our fiduciary duty should be to humanity.
- Put increasing effort into the safety/control problem, rather than the fig leaf you've noted in other institutions. It doesn't matter who wins if everyone dies. Related to this, we need to communicate a "better red than dead" outlook — we're trying to build safe AGI, and we're not willing to destroy the world in a down-to-the-wire race to do so.
- Engage with government to provide trusted, unbiased policy advice — we often hear that they mistrust recommendations from companies such as <redacted>.
- Be perceived as a place that provides public good to the research community, and keeps the other actors honest and open via leading by example.

The past 2 years

I would be curious to hear how you rate our execution over the past two years, relative to resources. In my view:

- Over the past five years, there have been two major demonstrations of working systems: AlphaZero [DeepMind] and Dota 1v1 [OpenAI]. (There are a larger number of breakthroughs of "capabilities" popular among practitioners, the top of which I'd say are: ProgressiveGAN [NVIDIA], unsupervised translation [Facebook], WaveNet [DeepMind], Atari/DQN [DeepMind], machine translation [Ilya at Google — now at OpenAI], generative adversarial network [Ian Goodfellow at grad school — now at Google], variational autoencoder [Durk at grad school — now at OpenAI], AlexNet [Ilya at grad school — now at OpenAI].) We benchmark well on this axis.
- We grew very rapidly in 2016, and in 2017 iterated to a working management structure. We're now ready to scale massively, given the resources. We lose people on comp currently, but pretty much only on comp. I've been resuming the style of recruiting I did in the early days, and believe I can exceed those results.
- We have the most talent dense team in the field, and we have the reputation for it as well.
- We don't encourage paper writing, and so paper acceptance isn't a measure we optimize. For the ICLR chart Andrej sent, I'd expect our (accepted papers)/(people submitting papers) to be the highest in the field.

- gdb

About this email: Brockman agrees OpenAI must change trajectory, accepts Musk's rejection of the ICO, proposes board candidates, a three-year plan for custom hardware, a massive data center and headcount growth to 900, and argues OpenAI should try its best to remain a non-profit to keep the moral high ground.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Jan 31, 2018 10:56 PM. Names of proposed board members and one passage are redacted in the exhibit.

Karpathy: OpenAI should 'attach to Tesla as its cash cow'

From: Andrej Karpathy

Date: January 31, 2018

To: Elon Musk

Subject: Re: Top AI institutions today

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Working at the cutting edge of AI is unfortunately expensive. For example, DeepMind's operating expenses in 2016 were at around \$250M USD (does not include compute). With their growing team today it might be ~0.5B/yr. But then Alphabet in 2016 reported ~20B net income so it's still fairly cheap even if DeepMind had no revenue of its own. In addition to DeepMind, Google also has Google Brain, Research, and Cloud. And TensorFlow, TPUs, and they own about a third of all research (in fact, they hold their own AI conferences).

I also strongly suspect that compute horsepower will be necessary (and possibly even sufficient) to reach AGI. If historical trends are any indication, progress in AI is primarily driven by systems - compute, data, infrastructure. The core algorithms we use today have remained largely unchanged from the ~90s. Not only that, but any algorithmic advances published in a paper somewhere can be almost immediately re-implemented and incorporated. Conversely, algorithmic advances alone are inert without the scale to also make them scary.

It seems to me that OpenAI today is burning cash and that the funding model cannot reach the scale to seriously compete with Google (an 800B company). If you can't seriously compete but continue to do research in open, you might in fact be making things worse and helping them out "for free", because any advances are fairly easy for them to copy and immediately incorporate, at scale.

A for-profit pivot might create a more sustainable revenue stream over time and would, with the current team, likely bring in a lot of investment. However, building out a product from scratch would steal focus from AI research, it would take a long time and it's unclear if a company could "catch up" to Google scale, and the investors might exert too much pressure in the wrong directions.

The most promising option I can think of, as I mentioned earlier, would be for OpenAI to attach to Tesla as its cash cow. I believe attachments to other large suspects (e.g. Apple? Amazon?) would fail due to an incompatible company DNA. Using a rocket analogy, Tesla already built the "first stage" of the rocket with the whole supply chain of Model 3 and its onboard computer and a persistent internet connection. The "second stage" would be a full self driving solution based on large-scale neural network training, which OpenAI expertise could significantly help accelerate. With a functioning full self-driving solution in ~2-3 years we could sell a lot of cars/trucks. If we do this really well, the transportation industry is large enough that we could increase Tesla's market cap to high O(~100K), and use that revenue to fund the AI work at the appropriate scale.

I cannot see anything else that has the potential to reach sustainable Google-scale capital within a decade.

-Andrej

About this email: Karpathy argues that cutting-edge AI is too expensive for OpenAI's funding model, that open research may just help Google, that a for-profit pivot has drawbacks, and that the most promising option is for OpenAI to attach to Tesla as its cash cow, funding AI through full self-driving revenue.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Jan 31, 2018 11:54 PM. First published (with the author's name redacted) in OpenAI's March 2024 blog post; Karpathy was identified as the author in the Nov 2024 court exhibits.

Musk: Tesla is 'the only path that could even hope to hold a candle to Google'

From: Elon Musk

Date: February 1, 2018

To: Ilya Sutskever, Greg Brockman

Subject: Fwd: Top AI institutions today

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Andrej is exactly right. We may wish it otherwise, but, in my and Andrej's opinion, Tesla is the only path that could even hope to hold a candle to Google. Even then, the probability of being a counterweight to Google is small. It just isn't zero.

About this email: Musk forwards Karpathy's analysis to Sutskever and Brockman and endorses it, saying Tesla is the only path that could hope to rival Google, and even then the odds are small.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Feb 1, 2018 3:52 AM, above the forwarded Karpathy email. First published in OpenAI's March 2024 blog post with Karpathy's name redacted.

Sources: [Musk v. Altman \(N.D. Cal.\) court exhibits](#), [CourtListener docket](#); [LessWrong: OpenAI Email Archives \(from Musk v. Zilis: no ICO, capped-return idea, Musk's formal board resignation

From: Shivon Zilis

Date: March 25, 2018

To: Elon Musk; cc Sam Teller

Subject: AI updates

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

OpenAI

Fundraising:

-No longer doing the ICO / "instrument to purchase compute in advance" type structure. Altman is thinking through an instrument where the 4-5 large corporates who are interested can invest with a return capped at 50x if OpenAI does get to some semblance

of money-making AGI. They apparently seem willing just for access reasons. He wants to discuss with you in more detail.

Formal Board Resignation:

-You're still technically on the board so need to send a quick one liner to Sam Altman saying something like "With this email I hereby resign as a director of OpenAI, effective Feb 20th 2018".

Future Board:

-Altman said he is cool with me joining then having to step off if I become conflicted, but is concerned that others would consider it a burned bridge if I had to step off. I think best bet is not to join for now and be an ambiguous advisor but let me know if you feel differently. They have Adam D'Angelo as the potential fifth to take your place, which seems great?

TeslaAI

Andrej has three candidates in pipeline, may have 1-2 come in to meet you on Tuesday. He will send you a briefing note about them. Also, he's working on starter language for a potential release that will be ready to discuss Tuesday. It will follow the "full-stack AI lab" angle we talked about but, if that doesn't feel right, please course correct... is tricky messaging.

Cerebras

Chip should be available in August for them to test, and they plan to let others have remote access in September. The Cerebras guy also mentioned that a lot of their recent customer interest has been from companies upset about the Nvidia change in terms of service (the one that forces companies away from consumer grade GPUs to enterprise Pascals / Voltas). Scott Gray and Ilya continue to spend a bunch of time with them

About this email: Zilis briefs Musk that OpenAI has dropped the ICO and Altman is designing an instrument with returns capped at 50x, reminds him he must formally resign as a director effective Feb 20, 2018, discusses whether she should join the board, and updates him on Tesla AI hiring and Cerebras.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Mar 25, 2018 11:03 AM. Section headings were bold in the transcription.

Altman sends Musk the draft OpenAI Charter

From: Sam Altman

Date: April 2, 2018

To: Elon Musk; cc Shvon Zilis

Subject: The OpenAI Charter

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

We are planning to release this next week--any thoughts?

The OpenAI Charter

OpenAI's mission is to ensure that artificial general intelligence (AGI) — by which we mean highly autonomous systems that outperform humans at most economically-valuable creative work — benefits all of humanity. We will attempt to directly build safe and beneficial AGI, but will also consider our mission fulfilled if our work aids others to achieve this outcome. To that end, we commit to the following principles:

Broadly Distributed Benefits

We commit to use any influence we obtain over AGI's deployment to ensure it is used for the benefit of all, and to avoid enabling uses of AI or AGI that harm humanity or unduly concentrate power.

Our primary fiduciary duty is to humanity. We anticipate needing to marshal substantial resources to fulfill our mission, but will always assiduously act to minimize conflicts of interest among our employees and stakeholders that could compromise broad benefit.

Long-Term Safety

We are committed to doing the research required to make AGI safe, and to driving the broad adoption of such research across the AI community.

We are concerned about late-stage AGI development becoming a competitive race without time for adequate safety precautions. Therefore, if a value-aligned, safety-conscious project comes close to building AGI before we do, we commit to stop competing with and start assisting this project. We will work out specifics in case by case agreements, but a typical triggering condition might be "a better-than-even chance of success in the next 2 years".

Technical Leadership

To be effective at addressing AGI's impact on society, OpenAI must be on the cutting edge of AI capabilities — policy and safety advocacy alone would be insufficient.

We believe that AI will have broad societal impact before AGI, and we'll strive to lead in those areas that are directly aligned with our mission and expertise.

Cooperative Orientation

We will actively cooperate with other research and policy institutions; we seek to create a global community working together to address AGI's global challenges.

We are committed to providing public goods that help society navigate the path to AGI. Today this includes publishing most of our AI research, but we expect that safety and security concerns will reduce our traditional publishing in the future, while increasing the importance of sharing safety, policy, and standards research.

About this email: Altman sends Musk the text of the OpenAI Charter a week before its release and asks for any thoughts.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Apr 2, 2018 1:54 PM.

Zilis: OpenAI raising equity with a fixed maximum return

From: Shivon Zilis

Date: April 23, 2018

To: Elon Musk; cc Sam Teller

Subject: Re: AI updates

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Updated info per a conversation with Altman. You're tentatively set to speak with him on Tuesday.

Financing:

- He confirmed again that they are definitely not doing an ICO but rather equity that has a fixed maximum return.

- Would be a rather unique subsidiary structure for the raise which he wants to walk you through.

- Wants to move within 4-6 week on first round (probably largely Reid money, potentially some corporates).

Tech:

Says Dota 5v5 looking better than anticipated.

- The sharp rise in Dota bot performance is apparently causing people internally to worry that the timeline to AGI is sooner than they'd thought before.

- Thinks they are on track to beat Montezuma's Revenge shortly.

Time allocation:

- I've reallocated most of the hours I used to spend with OpenAI to Neuralink and Tesla. This naturally happened with you stepping off the board and related factors — but if you'd prefer I pull more hours back to OpenAI oversight please let me know.

-Sam and Greg asked if I'd be on their informal advisory board (just Gabe Newell so far), which seems fine and better than the formal board given potential conflicts? If that doesn't feel right let me know what you'd prefer.

About this email: Zilis updates Musk after talking to Altman: OpenAI is definitely not doing an ICO but equity with a fixed maximum return through a unique subsidiary structure, with a first round probably largely from Reid Hoffman; Dota progress is making staff think AGI is nearer; and she has shifted her hours to Neuralink and Tesla.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Apr 23, 2018 1:49 AM as a continuation of the Mar 25 'AI updates' thread. No reply from Musk is reproduced.

Sources: [Musk v. Altman \(N.D. Cal.\) court exhibits](#), [CourtListener docket](#); [LessWrong: OpenAI Email Archives \(from Musk v. Altman and OpenAI blog\)](#)

Musk on OpenAI's capped-return raise and Zilis's advisory role: 'Ok by me'

From: Elon Musk

Date: April 23, 2018

To: Shivon Zilis; cc Sam Teller

Subject: Re: AI updates

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Ok by me

About this email: Seventeen minutes after Zilis reports that OpenAI is raising equity with a fixed maximum return through a subsidiary and asks about her time allocation and joining an informal advisory board, Musk replies that it is OK by him.

Notes: Text taken from the PDF text layer of the court exhibit as filed on the Musk v. Altman docket (N.D. Cal. 4:24-cv-04722), via CourtListener/RECAP. Header timestamp Mon, 23 Apr 2018 02:06:23 -0700. The PDF text layer runs the words together as 'Okbyme'. The exhibit quotes Zilis's Apr 23 and Mar 25 'AI updates' emails beneath the reply. Also Ex. 60 to the Wiener Declaration; OpenAI cites it to show Musk knew of the planned for-profit subsidiary by April 2018.

Zilis asks Musk to formally resign from the OpenAI board

From: Shivon Zilis

Date: April 27, 2018

To: Elon Musk

Subject: Re: OpenAI Board

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Would you prefer to formally resign from the OpenAI board or have Sam and Chris do their workaround option outlined below?

If the former, you can just copy/paste this line to Altman:

I hereby resign as a director of OpenAI, Inc., effective February 21, 2018.

FYI, noticed that Adam has already shared his joining the board:

<https://twitter.com/adamdangelo/status/988859015315701760>

[Forwarded message from Chris Clark to Shivon Zilis, cc Sam Altman, April 27, 2018 at 2:51:17 PM PDT, subject "Board Resignation":]

Hi Shivon,

We need to add Adam to the the board, but to do that we need a signed resignation letter or even a simple one line email to Sam with:

"I hereby resign as a director of OpenAI, Inc., effective February 21, 2018."

If you don't think that's doable then I'll add language to the board resolution acknowledging that Elon made a public statement that he's leaving the OpenAI board as of Feb 21, 2018 and electing his replacement based on that statement.

Let me know if I can help with anything.

Thanks,
Chris

About this email: Zilis forwards OpenAI's request for a signed resignation so Adam D'Angelo can be added to the board, and asks Musk whether he prefers to resign formally or let OpenAI use a board-resolution workaround; she supplies the one-line text to send Altman.

Notes: Text taken from the PDF text layer of the court exhibit as filed on the Musk v. Altman docket (N.D. Cal. 4:24-cv-04722), via CourtListener/RECAP. Sent April 27, 2018 at 8:25 PM. The bracketed line is an editorial label for the forwarded message included beneath Zilis's note; 'the the' is as in the exhibit.

Altman sends Musk the OpenAI LP term sheet: 'I won't take any equity'

From: Sam Altman

Date: August 31, 2018

To: Elon Musk; cc Sam Teller, Shivon Zilis

Subject: OpenAI term sheet

FULL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

Elon--

Please see attached, look forward to feedback.

Also, my current thought is that I won't take any equity. I'm not doing this for the money anyway, and I like the idea of being completely unconflicted and just focused on the best outcome for the world. If it appeared at some point we weren't going to build AGI but were going to build something valuable, then maybe I'd want equity then.

Sam

[Attachment: "OpenAI LP - Summary of Principal Terms" (PDF), reproduced from the exhibit:]

OpenAI

Summary Term Sheet

Mission

OpenAI's mission is to ensure that artificial general intelligence - by which we mean highly autonomous systems that outperform humans at most economically valuable work - (AGI), when developed, is safe and benefits all of humanity. We will attempt to directly build safe and beneficial AGI, but will also consider our mission fulfilled if our work aids others to achieve this outcome.

Corporate Structure

OpenAI LP will be a for-profit Delaware Limited Partnership managed by its General Partner, a single-member Delaware LLC controlled by OpenAI, Inc. (the Nonprofit)'s Board of Directors. At all times, no more than a minority of the Nonprofit's Board of Directors will be holders of any economic interest in OpenAI LP or in the employee holdings entity (described below).

Funding/ Revenue

Initial Capitalization

OpenAI LP will initially be capitalized by a contribution of assets from the Nonprofit. The Nonprofit will get an interest equivalent to that of a Limited Partner in the initial raise that is consistent with the value of its capital contribution.

Limited Partner Interests

We will sell preferred capped Limited Partner Interests redeemable (on a first in, first out basis) for a multiple of the purchase price (adjusted for inflation as described below). Redemption will commence either (a) if and when we successfully create AGI capable of generating the requisite returns and the General Partner, in its sole and absolute discretion, determines that redemptions will begin, or (b) at a mutually agreeable pre-AGI alternative. Specifically, the fundraising rounds will be as follows:

1. Initial raise: \$500M, 100x target redemption
2. Employee pool: \$100B capped target redemption
 - Actual redemption amount will be based on the number of employee LP Interests issued, which will be determined (subject only to the aggregate cap) by the General Partner in its sole and absolute discretion.
 - The General Partner may increase the target redemption of the employee pool in its sole and absolute discretion.
3. Second raise: \$10+B, 15x expected target redemption.
4. There may be additional fundraising rounds and/or an additional employee pool, though the interests of employee and/or investor Limited Partners cannot be diluted absent approval of a majority-in-interest of the affected class of Limited Partner (employee/investor).

Distributions will be made as follows:

- First, distributions will be made to initial raise investors in proportion to their respective capital contributions until each investor has received an amount equal to its aggregate capital contributions, with such distributions counting against the investors' target redemption amount;
- Next, 25% of all distributions will be made to initial raise investors and employees in proportion to their respective target redemption amounts, and 75% will go to second raise investors in proportion to their respective capital contributions until each investor has received an amount equal to its aggregate capital contributions. Subsequently, all future payments will be in proportion to each investor/employee's respective target redemption amount. Distributions will continue until all investors and employees have received their respective target redemption amounts; and
- Any amounts in excess of the target redemption amounts shall be distributed to or for the benefit of the Nonprofit in its capacity as a Limited Partner.

For the first 10 years after the initial raise, the inflation rate will be determined by reference to the U.S. Consumer Price Index or such alternative U.S. governmental index as determined by the General Partner with the consent of a majority-in-interest of the Limited Partners (determined by reference to target redemption amounts). Subsequently, starting in year 11, the target redemption amounts will increase annually at the greater of the inflation rate or a simple interest rate equal to the London Interbank Offered Rate plus 2%.

Any earlier redemption date must be approved by a majority-in-interest of the investor Limited Partners, as determined by reference to their target redemption amounts.

Prior to redemption, all items of profits and loss will be allocated among the Partners in proportion to their target redemption amounts.

Revenue

At some future date, OpenAI LP may generate revenue, primarily in the form of interest, dividends, capital gains, and royalties. To the extent it seeks to commercialize technology in a way that will generate significant revenue subject to the Unrelated Business Income Tax, OpenAI LP will create taxable "corporate blocker" subsidiaries to commercialize such technology.

Should we generate revenue (through OpenAI LP or its subsidiaries) that is not reserved for Research & Development activities and/or other related expenses, at the sole discretion of the General Partner, such surplus revenue will be distributed to our Limited Partners. These periodic distributions will be allocated based on the Limited Partner's targeted redemption amounts and will not count against the targeted redemption amounts.

Tax Distributions

OpenAI LP will make customary tax distributions to all Partners in respect of the net taxable income of OpenAI LP, if any. The amount and timing of any tax distribution will be determined in the discretion of the General Partner.

OpenAI LP exists to advance our mission using the principles expounded in OpenAI's Charter. We will employ the Partnership's assets to help us achieve these goals, such as through funding research and development activities, investing in companies and assets that may further the mission, and other related activities. The General Partner shall have the sole right to determine the amount of the Partnership's assets that shall be spent on and reserved for the expenditures in advancement of the mission.

Fiduciary Duties

Our duty to these principles and the advancement of our mission takes precedence over any obligation to generate a profit. We may never make a profit, and we are under no obligation to do so. We are free to re-invest any or all of our cash flow into research and development activities and/or related expenses without any obligation to the Limited Partners. The General Partner will have discretion to establish and maintain reserves for such expenditures, consistent with the mission, so long as such discretion is exercised reasonably.

The fiduciary duties of the Nonprofit Board of Directors flow exclusively to the Nonprofit, not to the Limited Partners.

Employee Comp.

In addition to their salary, employees will be granted profit interests in an employee holding vehicle (detailed below) in exchange for their services. Certain employees of the Nonprofit will also be granted profits interests in the target redemption amount, if any, held by Nonprofit. It is intended that the profits interests will not give rise to tax liability at the time of grant. Grants will vest over 6 years, with 0% in the first year, followed by

20% vesting each year for the next five years.

Employee interests will not be transferrable until the employee has been at OpenAI for one year. Employees are limited to selling a maximum of 25% of their vested interests per year.

Each employee recipient will make a timely Section 83(b) election with respect to their profits interests.

Employee Holding Company

We will create a separate holding company (OpenAI Holdings, L.P.) to issue profit interests to employees of OpenAI LP. OpenAI LP will issue mirror profits interests to OpenAI Holdings, and, as a result, OpenAI Holdings will be a partner in OpenAI LP (along with the investors). The profits interests held by employees in OpenAI Holdings thus will represent an indirect economic interest in OpenAI LP.

By receiving profits interests in OpenAI Holdings rather than OpenAI LP, it is intended that employees will be spared certain negative tax consequences of holding a partnership interest directly in a partnership in which they are also employees (such as quarterly estimated tax filings, self-employment taxes and no longer being eligible to participate in certain employee benefit plans). Employees will receive W-2s from OpenAI LP and otherwise will be treated as employees at that level for tax purposes. Employees will receive K-1s from OpenAI Holdings in connection with their profits interests and otherwise will be treated as partners at that level for tax purposes.

Limitations Re: Transfer of Interests

Notwithstanding any of the preceding, the transferability of LP Interests will be subject to limitations including:

1. transfers will be limited to a period occurring once per year;
2. transfers can only be between and among Limited Partners absent prior approval by the General Partner;
3. transfers will be limited so as to avoid material burdens upon the partnership or the General Partner under securities and other applicable laws; and
4. transfers will be limited to avoid partnership tax liability under US federal "publicly traded partnership" and other similar laws.

Information Rights

Each Limited Partner will be furnished with annual financial statements within 90 days following the end of each financial year.

All scheduled payments to Limited Partners will be considered confidential, and Limited Partners are not entitled to information regarding the interests of other Partners, provided that the Limited Partners will be entitled to such information as they need to self-organize for purposes of exercising their voting and other rights under the governing Limited Partnership Agreement. Confidentiality will be subject to customary exclusions for required governmental reporting; for example, the Nonprofit will be required to disclose certain information regarding OpenAI LP on its IRS Form 990,

which will be available to the public.

Strategic Investment Agreements

OpenAI LP is empowered to enter into strategic investment agreements with companies that become Limited Partners subject only to the caveat that those agreements must not clearly subvert the redemption waterfall described above nor clearly detract from the advancement of our mission.

About this email: Six months after Musk left the board, Altman sends him the summary term sheet for the planned capped-profit OpenAI LP (\$500M initial raise at a 100x redemption cap, nonprofit-controlled general partner) and says his current thought is to take no equity himself so as to be completely unconflicted.

Notes: Text taken from the PDF text layer of the court exhibit via CourtListener/RECAP. Header: Fri, 31 Aug 2018 11:30:15 +0200. The OCR renders the subject as 'OpenAI term sheet'; it is normalised here to 'OpenAI term sheet'. Paragraph breaks in the email body and line unwrapping in the attachment are reconstructed from the line layout; the term sheet's left-column section labels (Mission, Corporate Structure, Funding/Revenue, Fiduciary Duties, Employee Comp., etc.) are kept as separate lines, and its nested bullets are flattened. The bracketed line is an editorial label. No reply from Musk appears in the exhibit; the same email is Ex. 61 to the Wiener Declaration and Ex. 63 to the Hawes Declaration, which were not retrievable.

Sources: [Musk v. Altman, Dkt. 379-46 \(Ex. 19 to Cohen Declaration; Musk deposition Ex. 8; Bates SPX-001642 to SPX-001647; unsealed Jan 6, 2026\)](#); [Musk v. Altman, Dkt. 379-2 \(OpenAI statement of undisputed facts, citing the term sheet as Wiener Ex. 61\)](#)

Altman's Dec 2018 update: Dota, robot hands, move to Microsoft

From: Sam Altman

Date: December 17, 2018

To: Elon Musk

Subject: Re: OpenAI update

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

Hey Elon-

In Q1 of next year, we plan to do a final Dota tournament with any pro team that wants to play for a large cash prize, on an unrestricted game. After that, we'll call model-free RL complete, and a subset of the team will work on re-solving 1v1 Dota with model-based RL.

We also plan to release a number of robot hand demos in Q1-Rubiks cube, pen tricks, and Chinese ball rotation. The learning speed for new tasks should be very fast. Later in the year, we will try mounting two hands on two arms and see what happens...

We are also making fast progress on language. My hope is that next year we can generate short stories and a good dialogue bot.

[redacted] The hope is that we can use this unsupervised learning to build models that can do hard things, eg never make an image classification mistake a human wouldn't, which to me would imply some level of conceptual understanding.

We are also making good progress in the multi-agent environment, with multiple agents now collaborating to build simple structure, play laser tag, etc.

Finally, I am working on a deal to move our computing from Google to Microsoft (in addition to our own data centers).

Also happy to talk about fundraising (we should have enough for the next ~2 years even with aggressive growth) and evolving hardware thoughts if helpful, would prefer not to put either of those in email but maybe next time you're at Pioneer?

Sam

About this email: Altman briefs Musk on plans for a final Dota tournament, robot-hand demos, language progress and multi-agent work, says he is working on a deal to move compute from Google to Microsoft, and offers to discuss fundraising in person.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Dec 17, 2018 3:42 PM. One sentence is blacked out. Published in OpenAI's Dec 2024 blog post.

Musk: OpenAI's chance of being relevant 'is 0%. Not 1%'

From: Elon Musk

Date: December 26, 2018

To: Ilya Sutskever, Greg Brockman; cc Sam Altman, Shivon Zilis

Subject: I feel I should reiterate

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

My probability assessment of OpenAI being relevant to DeepMind/Google without a dramatic change in execution and resources is 0%. Not 1%. I wish it were otherwise.

Even raising several hundred million won't be enough. This needs billions per year immediately or forget it.

Unfortunately, humanity's future is in the hands of Demis.

<https://nyti.ms/2Rjetd3?smid=nytcare-ios-share>

And they are doing a lot more than this.

OpenAI reminds me of Bezos and Blue Origin. They are hopelessly behind SpaceX and getting worse, but the ego of Bezos has him insanely thinking that they are not!

I really hope I'm wrong.

Elon

About this email: Ten months after leaving the board, Musk tells OpenAI's leaders that without a dramatic change in execution and resources its probability of being relevant to DeepMind/Google is zero, that it needs billions per year immediately, that humanity's future is in the hands of Demis Hassabis, and compares OpenAI to Bezos's Blue Origin.

Notes: Sent Dec 26, 2018 12:07 PM (quoted in the 2026 trial exhibit chain as 'Wed, 26 Dec 2018 at 20:07'). OpenAI's 2024 blog posts and the LessWrong archive redact the name and the sentence after the link; the unredacted text here is from the Musk v. Altman trial exhibit as transcribed by Internal Tech Emails (May 2026). That exhibit also contains a reply from Sam Altman dated Dec 30, 2018 2:04 PM, whose text is behind the newsletter's paywall and could not be retrieved.

Altman sends Musk the draft capped-profit announcement

From: Sam Altman

Date: March 6, 2019

To: Elon Musk; cc Sam Teller, Shimon Zilis

Subject: OpenAI

FULL TEXT · EXECUTIVE & INTERNAL · PUBLISHED BY RECIPIENT · CONFIRMED

Elon—

Here is a draft post we are planning for Monday. Anything to add/edit?

TL;DR:

- We've created the capped-profit company and raised the first round, led by Reid and Vinod.
- We did this is a way where all investors are clear that they should never expect a profit.
- We made Greg chairman and me CEO of the new entity.
- We have tested this structure with potential next-round investors and they seem to like it.

Speaking of the last point, we are now discussing a multi-billion dollar investment which I would like to get your advice on when you have time. Happy to come see you some time you are in the bay area.

Sam

Draft post

We've created OpenAI LP, a new "capped-profit" company that allows us to rapidly increase our investments in compute and talent while including checks and balances to actualize our mission.

Our mission is to ensure that artificial general intelligence (AGI) benefits all of humanity, primarily by attempting to build safe AGI and share the benefits with the world.

Due to the exponential growth of compute investments in the field, we've needed to scale much faster than we'd planned when starting OpenAI. We expect to need to raise many billions of dollars in upcoming years for large-scale cloud compute, attracting and retaining talented people, and building AI supercomputers.

We haven't been able to raise that much money as a nonprofit, and though we considered becoming a for-profit, we were afraid that doing so would mean giving up our mission.

Instead, we created a new company, OpenAI LP, as a hybrid for-profit and nonprofit — which we are calling a "capped-profit" company.

The fundamental idea of OpenAI LP is that investors and employees can get a fixed return if we succeed at our mission, which allows us to raise investment capital and attract employees with startup-like equity. But any returns beyond that amount — and if we are successful, we expect to generate orders of magnitude more value than we'd owe to people who invest in or work at OpenAI LP — are owned by the original OpenAI Nonprofit entity.

Going forward (in this post and elsewhere), "OpenAI" refers to OpenAI LP (which now employs most of our staff), and the original entity is referred to as "OpenAI Nonprofit".

The mission comes first

We've designed OpenAI LP to put our overall mission — ensuring the creation and adoption of safe and beneficial AGI — over generating returns for investors.

To minimize conflicts of interest with the mission, OpenAI LP's primary fiduciary obligation is to advance the aims of the OpenAI Charter, and the company is controlled by OpenAI Nonprofit's board. All investors and employees sign agreements that OpenAI LP's obligation to the Charter always comes first, even at the expense of some or all of their financial stake.

Our employee and investor paperwork starts like this. The general partner refers to OpenAI Nonprofit (whose official name is "OpenAI Inc"); limited partners refers to investors and employees.

Only a minority of board members can hold financial stakes in the partnership. Furthermore, only board members without such stakes are allowed to vote on decisions where the interests of limited partners and the nonprofit's mission may conflict — including any decisions about making payouts to investors and employees.

Corporate structure

Another provision from our paperwork specifies that the nonprofit retains control. (The paperwork uses OpenAI LP's official name "OpenAI, L.P.".)

As mentioned above, economic returns for investors and employees are capped (with the cap negotiated in advance on a per-limited partner basis). Any excess returns are owned by the nonprofit. Our goal is to ensure that most of the value we create if successful is returned to the world, so we think this is an important first step. Returns for our first round of investors are capped to 100x their investment, and we expect this multiple to be lower for future rounds.

What OpenAI does

Our day-to-day work remains the same. Today, we believe we can build the most value by focusing exclusively on developing new AI technologies, not commercial products. Our structure gives us flexibility for how to make money in the long term, but we hope to figure that out only once we've created safe AGI (though we're open to non-distracting revenue sources such as licensing in the interim).

OpenAI LP currently employs around 100 people organized into three main areas: capabilities (advancing what AI systems can do), safety (ensuring those systems are aligned with human values), and policy (ensuring appropriate governance for such systems). OpenAI Nonprofit governs OpenAI LP, runs educational programs such as Scholars and Fellows, and hosts policy initiatives. OpenAI LP is continuing (at increased pace and scale) the development roadmap started at OpenAI Nonprofit, which has yielded breakthroughs in reinforcement learning, robotics, and language.

Safety

We are concerned about AGI's potential to cause rapid change, whether through machines pursuing goals misspecified by their operator, malicious humans subverting deployed systems, or an out-of-control economy that grows without resulting in improvements to human lives. As described in our Charter, we are willing to merge with a value-aligned organization (even if it means reduced or zero payouts to investors) to avoid a competitive race which would make it hard to prioritize safety.

Who's involved

OpenAI Nonprofit's board consists of OpenAI LP employees Greg Brockman (Chairman & CTO), Ilya Sutskever (Chief Scientist), and Sam Altman (CEO), and non-employees Adam D'Angelo, Holden Karnofsky, Reid Hoffman, Sue Yoon, and Tasha McCauley.

Elon Musk left the board of OpenAI Nonprofit in February 2018 and is not involved with OpenAI LP.

Our investors include Reid Hoffman and Khosla Ventures.

We are traveling a hard and uncertain path, but we have designed our structure to help us positively affect the world should we succeed in creating AGI. If you'd like to help us make this mission a reality, we're hiring :)!

About this email: Altman sends Musk the draft blog post announcing OpenAI LP, summarizing that a capped-profit company has been created with a first round led by Reid Hoffman and Vinod Khosla, and says a multi-billion dollar investment is under discussion on which he would like Musk's advice.

Notes: Text taken from the LessWrong transcription (habryka, Nov 16 2024), which the compiler states was checked against the originals. Sent Mar 6, 2019 3:13 PM. The LessWrong archive marks this email as sourced from OpenAI's blog; the draft post had embedded images of legal paperwork that are not reproduced. 'We did this is a way' is as transcribed. The court exhibit copy (Dkt. 379-88; header Wed, 6 Mar 2019 15:12:20 -0800) shows the second TL;DR bullet ending '(see purple box below)', which the blog/LessWrong transcription omits; no reply from Musk appears in that exhibit.

Twitter/X

The offer letter, emails to staff after the takeover, and emails to reporters.

30 emails, April 13, 2022 to January 2025

Best-and-final offer letter to buy Twitter at \$54.20

From: Elon Musk

Date: April 13, 2022

To: Bret Taylor, Chairman of the Board, Twitter

FULL TEXT · BOARD, INVESTORS & ADVISERS · PUBLISHED BY MUSK · CONFIRMED

Bret Taylor

Chairman of the Board,

I invested in Twitter as I believe in its potential to be the platform for free speech around the globe, and I believe free speech is a societal imperative for a functioning democracy.

However, since making my investment I now realize the company will neither thrive nor serve this societal imperative in its current form. Twitter needs to be transformed as a private company.

As a result, I am offering to buy 100% of Twitter for \$54.20 per share in cash, a 54% premium over the day before I began investing in Twitter and a 38% premium over the day before my investment was publicly announced. My offer is my best and final offer and if it is not accepted, I would need to reconsider my position as a shareholder.

Twitter has extraordinary potential. I will unlock it.

/s/ Elon Musk

Elon Musk

About this email: Musk tells Twitter's chairman he invested because he believes in Twitter as the platform for free speech, says it must be transformed as a private company, and offers \$54.20 a share in cash as a best and final offer.

Notes: Letter delivered to Twitter on April 13, 2022 and filed by Musk with the SEC the next day; the filing does not say whether it was transmitted by email. The same exhibit also contains a script Musk sent by text/voice, which is excluded here as a text message. Paragraph breaks reconstructed from the retrieval tool's numbered paragraph listing.

First all-staff email: remote work ends, dire economy

From: Elon Musk

Date: November 9, 2022 (Sent late on Nov. 9 Pacific time (about 2:39 a.m. ET Nov. 10 per Business Insider))

To: All Twitter employees

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Sorry that this is my first email to the whole company but there is no way to sugarcoat the message.

Frankly, the economic picture ahead is dire especially for a company like ours that is so dependent on advertising in a challenging economic climate. Moreover, 70% of our advertising is brand, rather than specific performance, which makes us doubly vulnerable!

That is why the priority over the past ten days has been to develop and launch Twitter Blue Verified subscriptions (huge props to the team!).

Without significant subscription revenue, there is a good chance Twitter will not survive the upcoming economic downturn. We need roughly half of our revenue to be subscription.

Of course, we will still then be significantly reliant on advertising, so I am spending time with our sales & partnerships teams to ensure that Twitter continues to be appealing to advertisers.

This is the Spaces discussion that Robin, Yoel and I hosted today: [Link to Elon Q&A: Advertising & the Future removed]

The road ahead is arduous and will require intense work to succeed. We are also changing Twitter policy such that remote work is no longer allowed unless you have a specific exception. Managers will send the exception lists to me for review and approval.

Starting tomorrow (Thursday), everyone is required to be in the office for a minimum of 40 hours per week. Obviously, if you are physically unable to travel to an office or have a critical personal obligation, then your absence is understandable.

I look forward to working with you to take Twitter to a whole new level. The potential is truly incredible!

Thanks,

Elon

About this email: In his first company-wide email, Musk warns the economic picture is dire, says Twitter needs half its revenue from subscriptions to survive, and ends remote work with a 40-hour in-office minimum starting the next day.

Notes: CNBC removed the Spaces link. Business Insider's transcription differs trivially (e.g. 'exceptions lists', 'review an approval').

'A Fork in the Road': extremely hardcore ultimatum

From: Elon Musk

Date: November 16, 2022

To: All Twitter employees

Subject: A Fork in the Road

FULL TEXT • COMPANY-WIDE MEMO • LEAKED TO PRESS • WIDELY REPORTED

Going forward, to build a breakthrough Twitter 2.0 and succeed in an increasingly competitive world, we will need to be extremely hardcore. This will mean working long hours at high intensity. Only exceptional performance will constitute a passing grade.

Twitter will also be much more engineering-driven. Design and product management will still be very important and report to me, but those writing great code will constitute the majority of our team and have the greatest sway.

At its heart, Twitter is a software and servers company, so I think this makes sense.

If you are sure that you want to be part of the new Twitter, please click yes on the link below:

[Link removed]

Anyone who has not done so by 5pm ET tomorrow (Thursday) will receive three months of severance.

Whatever decision you make, thank you for your efforts to make Twitter successful.

Elon

About this email: Musk tells staff that Twitter 2.0 will require being 'extremely hardcore', with long hours at high intensity, and gives them until 5pm ET the next day to click yes or leave with three months of severance.

Notes: Sent late on the night of Nov. 15-16, 2022; first reported by The Washington Post. Link to the opt-in form removed by CNBC. The email later featured in severance litigation and arbitration by former Twitter employees.

Remote work allowed if manager vouches for excellence

From: Elon Musk

Date: November 17, 2022

To: All Twitter employees

Subject: re: Fork in the Road

FULL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Regarding remote work, all that is required for approval is that your manager takes responsibility for ensuring that you are making an excellent contribution. It is also expected that you have in-person meetings with your colleagues on a reasonable cadence, ideally weekly, but not less than once per month.

About this email: Hours before the ultimatum deadline, Musk softens his remote-work stance: remote work is approved if a manager takes responsibility for the employee's excellent contribution, with in-person meetings at least monthly.

Notes: Body as printed by CNBC; greeting/sign-off, if any, not shown.

Sources: [CNBC](#); [Fortune](#); [Bloomberg \(via Yahoo\)](#)

Remote engineers: short technical interviews by video

From: Elon Musk

Date: November 18, 2022 (Minutes after the 10th-floor summons)

To: Twitter employees (software engineers working remotely)

EXCERPT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Only those who cannot get to Twitter HQ or have a family emergency are excused

[...]

These will be short, technical interviews that allow me to better understand the Twitter tech stack

About this email: Musk tells engineers working remotely to email their code summaries anyway so he can try to speak with them by video, excusing only those who cannot get to HQ or have a family emergency, and describes the sessions as short technical interviews.

Notes: Fragments from Reuters ('These will be short...') and CNBC ('Only those who cannot get to Twitter HQ...'); their order within the email is not confirmed, and The Daily Beast renders the excusal line as 'only those who cannot physically get to Twitter HQ are excused'. Sources disagree on whether this was a separate email or part of the next one.

Fly to SF if possible; 'at Twitter HQ until midnight'

From: Elon Musk

Date: November 18, 2022 (Shortly after the remote-work follow-up)

To: Twitter employees (software engineers)

PARTIAL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

If possible, I would appreciate it if you could fly to SF to be present in person

[...]

I will be at Twitter HQ until midnight and then back again tomorrow morning

About this email: Musk asks engineers outside San Francisco to fly in to be present in person if they can, adding that he will be at Twitter HQ until midnight and back the next morning.

Notes: First sentence as quoted by Reuters, second by Fortune, which reports both as part of the same short email.

Leak warning: violate your NDA and Twitter will seek damages

From: Elon Musk

Date: December 10, 2022 (Reported Dec. 10 by Zoe Schiffer; Platformer says it was sent Friday Dec. 9, with a pledge due by 5 p.m. Saturday)

To: All Twitter employees

PARTIAL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

As evidenced by the many detailed leaks of confidential Twitter information, a few people at our company continue to act in a manner contrary to the company's interests and in violation of their NDA

[...]

This will be said only once: If you clearly and deliberately violate the NDA that you signed when you joined, you accept liability to the full extent of the law & Twitter will immediately seek damages

[...]

but breaking your word by sending detailed info to the media [...] will receive the response it deserves

About this email: Musk warns staff that detailed leaks show a few people are violating their NDAs, threatens to seek damages from deliberate leakers, and requires employees to sign a pledge acknowledging the policy.

Notes: Schiffer deliberately did not publish the full email to protect sources, so only these passages are public. The third passage is quoted by sources around a paraphrase (sending detailed info to the media 'with the intent to harm Twitter').

'Performance Awards' email after weekend layoffs

From: Elon Musk

Date: February 27, 2023 (Monday Feb. 27, 2023, 10:48 a.m. per The Verge (via APH Networks))

To: Remaining Twitter employees

Subject: Performance Awards

PARTIAL TEXT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

This past week, we completed a difficult organizational overhaul focused on improving future execution, using as much feedback as we could gather from the entire company. Those who remain are highly regarded by those around them.

About this email: After another round of weekend layoffs, Musk tells remaining staff the company completed a difficult organizational overhaul and that they will receive very significant stock and performance awards on March 24.

Notes: First reported by The Verge (blocked for retrieval in this session). The remainder, promising 'very significant' stock and performance awards on March 24, is only paraphrased or partially quoted in retrievable sources.

Stock grants at \$20 billion valuation; 'inverse start-up'

From: Elon Musk

Date: March 24, 2023 (Sent Friday March 24, 2023 (some reports say March 25))

To: Twitter employees

EXCERPT · COMPANY-WIDE MEMO · LEAKED TO PRESS · WIDELY REPORTED

Twitter is being reshaped rapidly

[...]

can be thought of as an inverse startup

[...]

I see a clear, but difficult, path to a >\$250B valuation

[...]

liquid stock, but without the stock price chaos and lawsuit burdens of a public company

About this email: Announcing new equity grants, Musk tells staff the awards value Twitter at about \$20 billion, less than half what he paid, says the company came close to running out of money, and describes a path to a \$250 billion valuation with liquidity events every six months.

Notes: Email reviewed by The Information, Platformer, The Wall Street Journal and The New York Times; no outlet retrievable in this session printed the full text. Fragments are stitched from several reports and wording varies slightly between outlets ('inverse start-up' / 'inverse startup').

To NPR: 'marinating in the Kool-Aid'

From: Elon Musk

Date: April 2023 (Sent between April 6 and April 12, 2023; quoted in NPR's April 12 story)

To: Bobby Allyn (NPR technology reporter)

PARTIAL TEXT · PRESS & JOURNALISTS · PUBLISHED BY RECIPIENT · CONFIRMED

If you really think that the government has no influence on the entity they're funding then you've been marinating in the Kool-Aid for too long

About this email: Pressed on how he justifies labeling NPR given its small share of government funding and editorial independence, Musk tells the reporter that anyone who thinks government funding brings no influence has been 'marinating in the Kool-Aid'.

Notes: NPR also reports that in these exchanges Musk said he was relying on a Wikipedia page of publicly funded broadcasters, and that he later tweeted a screenshot of Allyn's April 12 email asking for his reaction, followed by 'Defund @NPR' (a tweet, not archived here).

Musk: investors 'very negative on SolarCity' - show solar roof before vote

From: Elon Musk

Date: September 16, 2016

To: Peter Rive (SolarCity co-founder and CTO)

PARTIAL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · WIDELY REPORTED

Latest feedback from major investors is very negative on SolarCity. We need to show them what the integrated product looks like. They just don't get it. Needs to happen before the vote, so maybe aim for October 28th for a joint solar roof and Powerwall 2 unveiling.

About this email: Two months before the shareholder vote on the SolarCity deal, Musk tells Peter Rive that major investors are very negative and that a joint solar roof and Powerwall 2 unveiling must happen before the vote.

Notes: Unsealed in the Delaware SolarCity litigation in autumn 2019. The article quotes the email continuously; it is unclear whether this is the entire message. The PlainSite docket (primary documents) could not be reached in this session.

Sources: [Business Insider \(republished by Entrepreneur\)](#), reporting on unsealed filings in *In re Tesla Motors, Inc. Stockholder Litigation* (Del. Ch. C.A. No. 12711-VCS); PlainSite docket for *In re Tesla Motors, Inc. Stockholder Litigation*

Musk: SolarCity must solve its 'liquidity crisis' before the vote

From: Elon Musk

Date: September 18, 2016 (date and recipient per Business Insider; CNBC says only 'September' 2016)

To: Brad Buss (former SolarCity CFO, Tesla director) and SolarCity executives

PARTIAL TEXT · BOARD, INVESTORS & ADVISERS · COURT RECORD · WIDELY REPORTED

Three things need to happen to change investor sentiment: SolarCity solving its liquidity crisis, an LOI with Panasonic to address solar cell production risk, and a joint product demo. Should be able to do all those before the shareholder vote.

About this email: Musk lists three things needed to change investor sentiment about the SolarCity acquisition: fixing SolarCity's liquidity crisis, a Panasonic letter of intent on solar cells, and a joint product demo.

Notes: CNBC quotes the text and says Musk 'wrote to SolarCity execs in September' 2016; Business Insider describes an email dated Sept. 18, 2016 to Brad Buss saying SolarCity needed to solve its liquidity crisis to persuade investors. The two descriptions are treated here as the same email; that identification is an inference.

Sources: [CNBC](#), citing unsealed court documents in *In re Tesla Motors, Inc. Stockholder Litigation*; [Business Insider via Entrepreneur](#) (dates the email Sept. 18, 2016 and names Brad Buss as recipient)

Musk forwards Epstein's solar query: 'Are we in New Mexico?'

From: Elon Musk

Date: October 2012 (forwarded after Epstein's 4 Oct 2012 email; exact date not given)

To: Peter Rive (SolarCity)

EXCERPT · EXECUTIVE & INTERNAL · GOVERNMENT RELEASE · WIDELY REPORTED

Are we in New Mexico?

About this email: Musk forwards Epstein's request for a SolarCity contact to his cousin Peter Rive, asking whether SolarCity operates in New Mexico.

Notes: Released by the U.S. Department of Justice on 2026-01-30 as part of the Epstein files (about 3 million pages). The text here is only what news outlets quoted from the DOJ PDF; the DOJ file itself sits behind an age-verification page and could not be retrieved, and '=' characters are encoding artifacts in the released files. Being named in the files is not evidence of wrongdoing, and no record of Musk actually visiting the island appears in the reporting. Musk's public response on X (31 Jan 2026, as quoted by TIME): "No one pushed harder than me to have the Epstein files released and I'm glad that has finally happened" and "I had very little correspondence with Epstein and declined repeated invitations to go to his island or fly on his 'Lolita Express'"; NBC also quotes him: "I have never been to any Epstein parties ever and have many times call for the prosecution of those who committed crimes." Fortune identifies the recipient of the forward as Peter Rive; no further replies are recorded in the reporting.

Epstein asks Musk for a SolarCity contact

From: Jeffrey Epstein

Date: October 4, 2012

To: Elon Musk

EXCERPT · OUTSIDE & PERSONAL · GOVERNMENT RELEASE · WIDELY REPORTED

Is there any one at Solar City that my guys can talk to about electrifying t=e [sic] caribbean island? or the new mexico ranch.

About this email: Epstein asks whether someone at SolarCity could talk to his staff about electrifying his Caribbean island or New Mexico ranch.

Notes: Released by the U.S. Department of Justice on 2026-01-30 as part of the Epstein files (about 3 million pages). The text here is only what news outlets quoted from the DOJ PDF; the DOJ file itself sits behind an age-verification page and could not be retrieved, and '=' characters are encoding artifacts in the released files. Being named in the files is not evidence of wrongdoing, and no record of Musk actually visiting the island appears in the reporting. Musk's public response on X (31 Jan 2026, as quoted by TIME): "No one pushed harder than me to have the Epstein files released and I'm glad that has finally happened" and "I had very little correspondence with Epstein and declined repeated invitations to go to his island or fly on his 'Lolita Express'"; NBC also quotes him: "I have never been to any Epstein parties ever and have many times call for the prosecution of those who committed crimes." Email sent TO Musk. Per Fortune, Musk forwarded it to his cousin Peter Rive of SolarCity (see next entry). 404 Media prints a slightly normalized spelling of the same sentence.

Musk tells Epstein he and Talulah Riley are headed to St Barts

From: Elon Musk

Date: October 20, 2012

To: Jeffrey Epstein

PARTIAL TEXT · OUTSIDE & PERSONAL · GOVERNMENT RELEASE · WIDELY REPORTED

The world needs more romance

[...]

Talulah and I are headed to St Barth's at the end of the year. I assume yo= will most likely be on your island?

About this email: Musk tells Epstein that he and Talulah Riley will be in St Barts at year-end and asks whether Epstein will be on his island.

Notes: Released by the U.S. Department of Justice on 2026-01-30 as part of the Epstein files (about 3 million pages). The text here is only what news outlets quoted from the DOJ PDF; the DOJ file itself sits behind an age-verification page and could not be retrieved, and '=' characters are encoding artifacts in the released files. Being named in the files is not evidence of wrongdoing, and no record of Musk actually visiting the island appears in the reporting. Musk's public response on X (31 Jan 2026, as quoted by TIME): "No one pushed harder than me to have the Epstein files released and I'm glad that has finally happened" and "I had very little correspondence with Epstein and declined repeated invitations to go to his island or fly on his 'Lolita Express'"; NBC also quotes him: "I have never been to any Epstein parties ever and have many times call for the prosecution of those who committed crimes." DOJ document EFTA02702478 per Lead Stories. The opening phrase 'The world needs more romance' is quoted by 404 Media with an ellipsis before the rest; 'yo=' is an encoding artifact for 'you'.

Musk on Christmas Day: 'Do you have any parties planned?'

From: Elon Musk

Date: December 25, 2012

To: Jeffrey Epstein

PARTIAL TEXT · OUTSIDE & PERSONAL · GOVERNMENT RELEASE · WIDELY REPORTED

Do you have any parties planned? I've been working to the edge of sanity this year and so, once my kids head home after Christmas, I really want to hit the party scene in St Barts or elsewhere and let loose. The invitation is much appreciated, but a peaceful island experience is the opposite of what I'm looking for.

About this email: Musk tells Epstein he has worked 'to the edge of sanity' and wants to party in St Barts after his kids go home, and that a peaceful island visit is not what he is looking for.

Notes: Released by the U.S. Department of Justice on 2026-01-30 as part of the Epstein files (about 3 million pages). The text here is only what news outlets quoted from the DOJ PDF; the DOJ file itself sits behind an age-verification page and could not be retrieved, and '=' characters are encoding artifacts in the released files. Being named in the files is not evidence of wrongdoing, and no record of Musk actually visiting the island appears in the reporting. Musk's public response on X (31 Jan 2026, as quoted by TIME): "No one pushed harder than me to have the Epstein files released and I'm glad that has finally happened" and "I had very little correspondence with Epstein and declined repeated invitations to go to his island or fly on his 'Lolita Express'"; NBC also quotes him: "I have never been to any Epstein parties ever and have many times call for the prosecution of those who committed crimes." Lead Stories cites EFTA01912578; TIME says it was sent at 6am. The quoted passage may be the whole message body, but that could not be checked against the DOJ file. Gizmodo quotes an earlier Epstein line in the chain: "you are welcome to stay or just come for the day, plenty of room i will=send heli to get you".

Musk to Epstein on requests to bring Tesla to Israel

From: Elon Musk

Date: 2013 (Fortune gives only the year)

To: Jeffrey Epstein

PARTIAL TEXT · OUTSIDE & PERSONAL · GOVERNMENT RELEASE · WIDELY REPORTED

Not a week passes without a request from someone important in Israel (and other countries) wanting to bring Tesla there. What they don't appreciate is that Tesla is production constrained, not demand constrained. When production has increased to the point of addressing the major markets, then we will start shipping to tiny markets.

About this email: After Epstein said former Israeli prime minister Ehud Barak wanted to discuss bringing Tesla to Israel, Musk answered that Tesla was production constrained and would serve small markets later.

Notes: Released by the U.S. Department of Justice on 2026-01-30 as part of the Epstein files (about 3 million pages). The text here is only what news outlets quoted from the DOJ PDF; the DOJ file itself sits behind an age-verification page and could not be retrieved, and '=' characters are encoding artifacts in the released files. Being named in the files is not evidence of wrongdoing, and no record of Musk actually visiting the island appears in the reporting. Musk's public response on X (31 Jan 2026, as quoted by TIME): "No one pushed harder than me to have the Epstein files released and I'm glad that has finally happened" and "I had very little correspondence with Epstein and declined repeated invitations to go to his island or fly on his 'Lolita Express'"; NBC also quotes him: "I have never been to any Epstein parties ever and have many times call for the prosecution of those who committed crimes." Epstein had written that Ehud Barak "is very clever about many things that you have in the past shown interest in, when you are next on my coast let me know."

Musk to Epstein on sleep and productivity

From: Elon Musk

Date: March 2013 (Business Insider says 'early March' 2013)

To: Jeffrey Epstein

EXCERPT · OUTSIDE & PERSONAL · GOVERNMENT RELEASE · SINGLE-SOURCE

Normally I would agree, as I have found that my total daily productivity is optimal at around 6 to 6.5 hours of sleep.

About this email: After Epstein wrote 'now its time for fun' and suggested Tesla would do better if Musk slept more, Musk replied that his productivity is optimal at about 6 to 6.5 hours of sleep.

Notes: Released by the U.S. Department of Justice on 2026-01-30 as part of the Epstein files. The text here is only what news outlets quoted from the DOJ PDFs; the DOJ files sit behind an age-verification page and could not be retrieved. Being named in the files is not evidence of wrongdoing. Musk's public response on X (31 Jan 2026): "I had very little correspondence with Epstein and declined repeated invitations to go to his island or fly on his 'Lolita Express', but was well aware that some email correspondence with him could be misinterpreted and used by detractors to smear my name." Epstein's lines in the same exchange, per Business Insider: "now its time for fun" and "benefit analysis would probably show , tesla doing better with you getting more sleep". Business Insider also quotes a February 2013 email from Musk's assistant: "Shall we organize a lunch for Elon and Jeffrey to get together at SpaceX in the coming weeks?" and "Elon is generally available at SpaceX on Mon, Thurs and Fri each week."

Musk declines Epstein's UN General Assembly invitation

From: Elon Musk

Date: September 11, 2013 (The Independent dates the exchange to 11 Sep 2013; Fortune says only September 2013)

To: Jeffrey Epstein

PARTIAL TEXT · OUTSIDE & PERSONAL · GOVERNMENT RELEASE · WIDELY REPORTED

I run and lead product design/engineering for two complicated companies. Moreover, SpaceX is about to launch what is arguably the most advanced rocket in history. Flying to NY to see UN diplomats do nothing would be an unwise use of time.

About this email: Invited by Epstein to New York during the UN General Assembly, Musk declines, saying he runs two complicated companies and the trip would be an unwise use of time.

Notes: Released by the U.S. Department of Justice on 2026-01-30 as part of the Epstein files (about 3 million pages). The text here is only what news outlets quoted from the DOJ PDF; the DOJ file itself sits behind an age-verification page and could not be retrieved, and '=' characters are encoding artifacts in the released files. Being named in the files is not evidence of wrongdoing, and no record of Musk actually visiting the island appears in the reporting. Musk's public response on X (31 Jan 2026, as quoted by TIME): "No one pushed harder than me to have the Epstein files released and I'm glad that has finally happened" and "I had very little correspondence with Epstein and declined repeated invitations to go to his island or fly on his 'Lolita Express'"; NBC also quotes him: "I have never been to any Epstein parties ever and have many times call for the prosecution of those who committed crimes." Epstein's invitation, as quoted: "Any plans for ny" and "the opening of the general assembly has many interesting people coming to the house." Epstein's later reply: "just kidding, there is no one over 25 and all very cute."

Chief of staff drafts 'pedo guy' apology for Musk

From: Sam Teller

Date: July 17, 2018

To: Elon Musk

EXCERPT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

I understand that my recent behavior has probably embarrassed you and I'm sorry. I apologize to Vernon Unsworth and am reaching out to him to personally convey this, as well as my deep appreciation for his work in saving the kids. ...

About this email: Two days after the 'pedo guy' tweet, Sam Teller sends Musk a recommended apology to employees and to Vernon Unsworth, based on feedback from trusted team members.

Notes: Only the beginning of Teller's proposed apology text is quoted in Plaintiff's Additional Material Fact 4, citing Wilson Decl. Ex. 16 (MUSK_1706-07). The quoted words are the draft apology Teller recommended Musk send.

Sources: [Unsworth v. Musk \(C.D. Cal. 2:18-cv-08048\)](#), [Plaintiff's Statement of Genuine Disputes, Dkt. 76](#) (via [CourtListener/RECAP](#))

Musk rejects apology advice after 'pedo guy' tweet

From: Elon Musk

Date: July 17, 2018

To: Sam Teller

PARTIAL TEXT · EXECUTIVE & INTERNAL · COURT RECORD · CONFIRMED

After sleeping on this, I'm not happy about the suggested approach. It would have been particularly foolish and craven of my to do it last night, right after a share drop, as my apology would simply have been dismissed as a disingenuous and cowardly attempt to restore the stock price.

About this email: Musk tells his chief of staff he is unhappy with the proposed apology, saying that apologising right after a share-price drop would have looked like a cowardly attempt to restore the stock.

Notes: Quoted in Plaintiff's Additional Material Fact 5, citing Wilson Decl. Ex. 16; the filing may not reproduce the whole email. 'craven of my' is as printed. Musk tweeted an apology the next day, July 18, 2018.

BuzzFeed's Ryan Mac asks Musk about Unsworth's legal letter

From: Ryan Mac (BuzzFeed News)

Date: August 29, 2018

To: Elon Musk

Subject: BuzzFeed News: Unsworth legal letter

FULL TEXT · PRESS & JOURNALISTS · COURT RECORD · CONFIRMED

Hi Elon,

Ryan from BuzzFeed News here. We're reporting a story out about you receiving a letter from a lawyer representing British diver Vernon Unsworth. The letter, dated August 6, was sent to your Los Angeles home and discusses potential legal proceedings against you for libel. Given the Twitter conversation yesterday, I was hoping you could talk about the letter and whether you had seen it yet. I'm happy to chat on the phone if that works better for you.

Best,

Ryan Mac

About this email: BuzzFeed reporter Ryan Mac asks Musk for comment on a letter from Vernon Unsworth's lawyer threatening a libel claim.

Notes: Musk Decl. Ex. L (also Wilson Decl. Ex. 19). The exhibit prints the chain newest-first with nested 'On ... wrote:' lines; times given here are a best reading of those lines. Sent Wed Aug 29, 2018, about 7:40 AM. Signature block omitted.

Musk to BuzzFeed: 'Have you actually done any research at all?'

From: Elon Musk

Date: August 29, 2018

To: Ryan Mac (BuzzFeed News)

Subject: Re: BuzzFeed News: Unsworth legal letter

FULL TEXT · PRESS & JOURNALISTS · COURT RECORD · CONFIRMED

Have you actually done any research at all? For example, you incorrectly state that he is a diver, which shows that you know essentially nothing and have not even bothered to research basic facts.

About this email: Musk's first reply to Ryan Mac disputes that Unsworth is a diver and accuses the reporter of not researching basic facts.

Notes: Musk Decl. Ex. L (also Wilson Decl. Ex. 19). The exhibit prints the chain newest-first with nested 'On ... wrote:' lines; times given here are a best reading of those lines. Sent Wed Aug 29, 2018 (about 9 AM).

'Stop defending child rapists' email to BuzzFeed's Ryan Mac

From: Elon Musk

Date: August 30, 2018

To: Ryan Mac (BuzzFeed News)

Subject: RE: BuzzFeed News: Unsworth legal letter

FULL TEXT · PRESS & JOURNALISTS · PUBLISHED BY RECIPIENT · CONFIRMED

Off the record

I suggest that you call people you know in Thailand, find out what's actually going on and stop defending child rapists, you fucking asshole. He's an old, single white guy from England who's been traveling to or living in Thailand for 30 to 40 years, mostly Pattaya Beach, until moving to Chiang Rai for a child bride who was about 12 years old at the time. There's only one reason people go to Pattaya Beach. It isn't where you'd go for caves, but it is where you'd go for something else. Chiang Rai is renowned for child sex-trafficking.

He may claim to know how to cave dive, but he wasn't on the cave dive rescue team and most of the actual dive team refused to hang out with him. I wonder why ...

As for this alleged threat of a lawsuit, which magically appeared when I raised the issue (nothing was sent or raised beforehand), I fucking hope he sues me.

About this email: Prefacing the email 'Off the record' (a condition BuzzFeed had not agreed to), Musk tells reporter Ryan Mac to stop 'defending child rapists', makes unsupported accusations about British caver Vernon Unsworth, and says he hopes Unsworth sues.

Notes: Sent Thu, Aug 30, 2018 at 6:43 PM. Published by BuzzFeed News on Sept 4, 2018 and later central to Unsworth v. Musk (C.D. Cal. 2:18-cv-08048), where it was a trial exhibit; Musk testified he believed the email was off the record. The accusations in the email were unsubstantiated; Unsworth denied them. The court exhibit (Musk Decl. Ex. L) shows the email also contained a Google search link for 'chiang rai child trafficking' between the second and third paragraphs, which BuzzFeed's published version omits.

'On background' follow-up to BuzzFeed on the mini-sub

From: Elon Musk

Date: August 30, 2018

To: Ryan Mac (BuzzFeed News)

Subject: Fwd: Letters

FULL TEXT · PRESS & JOURNALISTS · PUBLISHED BY RECIPIENT · CONFIRMED

On background

Unsworth also said I was asked to leave by the Thai govt, which is utterly false. Thai Prime Minister thanked me personally per attached docs. I went all the way to area 3 with the Thai SEAL team, who were awesome. Never saw Unsworth at any point. Was told he was banned from the site.

It is also total bs that the mini-sub wouldn't fit through the caves. It was designed and built to specifications provided to me directly by Stanton and the actual dive team. The only reason it wasn't used was that they were able to drain almost all the water out of the caves, so the underwater portion was very short, and the monsoon arrived later than expected.

Those pumps were critical. Some of the Tesla team helped with electrical power, but major credit to whoever provided those pumps. They were amazing. I'm told they were from some company in India.

About this email: In a second email marked 'On background', Musk disputes Unsworth's claims that he was asked to leave the cave site and that the mini-submarine would not have fit, and credits the pumps that drained the cave.

Notes: Sent Thu, Aug 30, 2018 at 7:16 PM, forwarding letters from Thai officials. BuzzFeed said it had not agreed to 'on background' terms either.

Ryan Mac follows up after doing 'due diligence'

From: Ryan Mac (BuzzFeed News)

Date: August 30, 2018

To: Elon Musk

Subject: Re: BuzzFeed News: Unsworth legal letter

FULL TEXT · PRESS & JOURNALISTS · COURT RECORD · CONFIRMED

Hey Elon, just wanted to make sure I did my due diligence to research basic facts and follow up here.

Thanks,
Ryan Mac

About this email: Mac follows up the next day; Musk's reply to this message was the 'child rapists' email.

Notes: Musk Decl. Ex. L (also Wilson Decl. Ex. 19). The exhibit prints the chain newest-first with nested 'On ... wrote:' lines; times given here are a best reading of those lines. Sent Thu Aug 30, 2018, about 6:07 PM. Signature block omitted.

Musk to PR adviser: 'Still, I'm a fucking idiot'

From: Elon Musk

Date: September 4, 2018

To: Juleanna Glover (outside PR adviser)

PARTIAL TEXT · OUTSIDE & PERSONAL · COURT RECORD · CONFIRMED

Yes, this is extremely bad. I didn't expect BuzzFeed to publish an off the record email. My intent was to have them investigate and come to their own conclusions, not publish my email directly. Still, I'm a fucking idiot.

About this email: After BuzzFeed published his 'child rapist' email, Musk tells his outside PR adviser the situation is 'extremely bad' and that he had meant for BuzzFeed to investigate, not publish.

Notes: Quoted 'in material part' in Plaintiff's Additional Material Fact 65, citing Wilson Decl. Ex. 34 (email correspondence dated Sept 4-5, 2018 between Musk, Juleanna Glover and others). The filing identifies the recipient only as Musk's outside public relations contact; press reports name Juleanna Glover. The full exhibit could not be retrieved.

Sources: [Unsworth v. Musk \(C.D. Cal. 2:18-cv-08048\)](#), [Plaintiff's Statement of Genuine Disputes, Dkt. 76 \(via CourtListener/RECAP\)](#); [Unsworth opposition to summary judgment, Dkt. 75](#); [BuzzFeed News](#); [Gizmodo](#); [Gizmodo](#)

Musk: 'one of the dumbest things I've ever done'

From: Elon Musk

Date: September 4, 2018

To: Juleanna Glover (outside PR adviser)

PARTIAL TEXT · OUTSIDE & PERSONAL · COURT RECORD · CONFIRMED

Completely agree. I was told a lot of bad things this guy did and was upset that no one cared to investigate, so responded in what I felt was off the record. In the past, BuzzFeed has respected emails prefaced with 'off the record', but this time they did not. It was still one of the dumbest things I've ever done and this distraction couldn't come at a worse time.

About this email: In a second email to his PR adviser, Musk says he had been told bad things about Unsworth, was upset nobody investigated, and calls his email to BuzzFeed one of the dumbest things he has done.

Notes: Quoted 'in material part' in Plaintiff's Additional Material Fact 65, citing Wilson Decl. Ex. 34. The full exhibit could not be retrieved.

Sources: [Unsworth v. Musk \(C.D. Cal. 2:18-cv-08048\)](#), [Plaintiff's Statement of Genuine Disputes, Dkt. 76 \(via CourtListener/RECAP\)](#); [Unsworth opposition to summary judgment, Dkt. 75](#); [BuzzFeed News](#); [Gizmodo](#)

Ryan Mac: 'I didn't agree for the conversation to be off the record'

From: Ryan Mac (BuzzFeed News)

Date: September 4, 2018

To: Elon Musk

Subject: Re: BuzzFeed News: Unsworth legal letter

FULL TEXT · PRESS & JOURNALISTS · COURT RECORD · CONFIRMED

Hi Elon,

I didn't agree for the conversation to be off the record, but appreciate the response. To follow up, I've tried to report out some of these accusations on my own but have not found anything to corroborate the claims. Are you able to share anything that you've found about Vernon Unsworth? Do you have any evidence or documentation showing he took a 12-year-old child bride, that he is a child rapist, or that he was kicked off the rescue site, as you stated in your other email? Also are you able to share your correspondence with Rick Stanton showing your discussion of the submarine specs?

With regards to your statement about the legal threat not coming up until you raised the issue on Twitter, the legal letter was dated on Aug. 6 and sent to your Los Angeles home and to one of your SpaceX emails. Did you not see the letter prior to your tweets?

Thank you,
Ryan

About this email: Mac tells Musk he never agreed to off-the-record terms, says he could not corroborate the accusations and asks for evidence.

Notes: Musk Decl. Ex. L (also Wilson Decl. Ex. 19). The exhibit prints the chain newest-first with nested 'On ... wrote:' lines; times given here are a best reading of those lines. Sent Tue Sep 4, 2018, about 8:49 AM. 'that be

was kicked off' is as printed.

Sources: [Unsworth v. Musk \(C.D. Cal. 2:18-cv-08048\)](#), [Declaration of Elon Musk ISO summary judgment, Dkt. 60 \(via CourtListener/RECAP\)](#); [BuzzFeed News](#); [Unsworth opposition to summary judgment, Dkt. 75](#)

Musk: publishing would 'destroy your journalistic credibility'

From: Elon Musk

Date: September 4, 2018

To: Ryan Mac (BuzzFeed News)

Subject: Re: BuzzFeed News: Unsworth legal letter

FULL TEXT · PRESS & JOURNALISTS · COURT RECORD · CONFIRMED

Off the record

We haven't had a conversation at all. I sent you an off the record email, which very clearly and unambiguously said 'off the record'. If you want to publish off the record comments and destroy your journalistic credibility, that's up to you.

As for answering more questions, I would be happy to do so, but not with someone who just told me that they will not honor accepted rules of journalism.

About this email: Musk insists his earlier email was unambiguously off the record and warns Mac that publishing it would destroy his credibility.

Notes: Musk Decl. Ex. L (also Wilson Decl. Ex. 19). The exhibit prints the chain newest-first with nested 'On ... wrote:' lines; times given here are a best reading of those lines. Sent Tue Sep 4, 2018, about 10:53 AM.

Sources: [Unsworth v. Musk \(C.D. Cal. 2:18-cv-08048\)](#), [Declaration of Elon Musk ISO summary judgment, Dkt. 60 \(via CourtListener/RECAP\)](#); [BuzzFeed News](#); [Unsworth opposition to summary judgment, Dkt. 75](#)

Ryan Mac offers to go off the record going forward

From: Ryan Mac (BuzzFeed News)

Date: September 4, 2018

To: Elon Musk

Subject: Re: BuzzFeed News: Unsworth legal letter

FULL TEXT · PRESS & JOURNALISTS · COURT RECORD · CONFIRMED

Hi Elon,

While I'd rather chat on the record, I'm happy to go off record with you moving forward so you can answer specific questions regarding the allegations you've made.

Thanks,

Ryan

About this email: Mac offers to speak off the record from that point so Musk can answer questions about his allegations.

Notes: Musk Decl. Ex. L (also Wilson Decl. Ex. 19). The exhibit prints the chain newest-first with nested 'On ... wrote:' lines; times given here are a best reading of those lines. Sent Tue Sep 4, 2018, about 12:22 PM.

Sources: [Unsworth v. Musk \(C.D. Cal. 2:18-cv-08048\)](#), [Declaration of Elon Musk ISO summary judgment, Dkt. 60 \(via CourtListener/RECAP\)](#); [BuzzFeed News](#); [Unsworth opposition to summary judgment, Dkt. 75](#)

Musk: ask Unsworth about his history in Thailand

From: Elon Musk

Date: September 4, 2018

To: Ryan Mac (BuzzFeed News)

Subject: Re: BuzzFeed News: Unsworth legal letter

FULL TEXT · PRESS & JOURNALISTS · COURT RECORD · CONFIRMED

Off the record

I suggest you ask Unsworth to describe his whole - 30 year history of visiting Thailand. What was he doing in Pattaya Beach for the better part of a decade when there are no caves of note in the area?

About this email: In a further 'off the record' email on the day BuzzFeed published, Musk tells Mac to question Unsworth about his decades of visits to Thailand.

Notes: Musk Decl. Ex. L (also Wilson Decl. Ex. 19). The exhibit prints the chain newest-first with nested 'On ... wrote:' lines; times given here are a best reading of those lines. Sent Tue Sep 4, 2018, about 1:18 PM. '- 30 year' is as transcribed (possibly '~30 year' in the original).

Sources: [Unsworth v. Musk \(C.D. Cal. 2:18-cv-08048\)](#), [Declaration of Elon Musk ISO summary judgment, Dkt. 60 \(via CourtListener/RECAP\)](#); [BuzzFeed News](#); [Unsworth opposition to summary judgment, Dkt. 75](#)

Ryan Mac after publication: still happy to talk

From: Ryan Mac (BuzzFeed News)

Date: September 4, 2018

To: Elon Musk

Subject: Re: BuzzFeed News: Unsworth legal letter

FULL TEXT · PRESS & JOURNALISTS · COURT RECORD · CONFIRMED

Hey Elon, I'm sure you've seen the story at this point. Still happy to talk with you on whatever terms you want as long as we set them beforehand. Let me know if you want to do a phone call.

Best,

R

About this email: After BuzzFeed published Musk's emails, Mac says he is still willing to talk on agreed terms.

Notes: Musk Decl. Ex. L (also Wilson Decl. Ex. 19). The exhibit prints the chain newest-first with nested 'On ... wrote:' lines; times given here are a best reading of those lines. Sent Tue Sep 4, 2018, about 5:30 PM.
